

Clinical trial results:

The Impact of Camostat Mesilate on COVID-19 Infection: An investigator-initiated randomized, placebo-controlled, phase IIa trial

Summary

EudraCT number	2020-001200-42
Trial protocol	DK SE
Global end of trial date	22 April 2021

Results information

Result version number	v1 (current)
This version publication date	18 June 2023
First version publication date	18 June 2023

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	22 April 2021
Is this the analysis of the primary completion data?	Yes
Primary completion date	22 April 2021
Global end of trial reached?	Yes
Global end of trial date	22 April 2021
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The overall objective of the study is to evaluate the efficacy of Camostat Mesilate against COVID-19 infection among adults with COVID-19 infection.

Protection of trial subjects:

Safety will be monitored by vital signs, clinical laboratory tests, history and physical examinations if needed and the rate and severity of AE.

If indicated in the opinion of the investigator, a physical examination will be performed ad hoc. Routine biochemistry (safety) will be performed within +/-12 hours of the first dosing of camostat mesilate. Subsequent dosing will be postponed in case of unacceptable laboratory values in the judgment of the investigator. Laboratory tests may be repeated, as clinically indicated, to obtain acceptable values before participants are withdrawn from the study.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	04 April 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Sweden: 6
Country: Number of subjects enrolled	Denmark: 199
Worldwide total number of subjects	205
EEA total number of subjects	205

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0

Adolescents (12-17 years)	0
Adults (18-64 years)	116
From 65 to 84 years	79
85 years and over	10

Subject disposition

Recruitment

Recruitment details:

The site PI (physician) or delegated study physician/nurse will obtain written informed consent from each subject before any study-specific activity is initiated, using a consent form prospectively approved by The Ethics Committee.

Pre-assignment

Screening details:

Less than 48 hours since time of hospital admission OR if hospital-acquired COVID-19 is suspected, less than 48 hrs since onset of symptoms

Period 1

Period 1 title	Dosing/follow-up (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description: -

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

x3 daily for 5 days

Arm title	Camostat
------------------	----------

Arm description: -

Arm type	Experimental
Investigational medicinal product name	Camostat mesilate
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

200 mg x3 daily for 5 days

Number of subjects in period 1	Placebo	Camostat
Started	68	137
Completed	68	137
