Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	08 April 2021
Is this the analysis of the primary completion data?	Yes
Primary completion date	08 February 2021
Global end of trial reached?	Yes
Global end of trial date	08 April 2021
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

To evaluate the effect of ravulizumab + best supportive care (BSC) compared with BSC alone on the survival of participants with acute respiratory distress syndrome due to coronavirus disease 2019 (COVID-19).

Protection of trial subjects:

This study was conducted in accordance with the ethical principles of Good Clinical Practice, according to the International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use Harmonized Tripartite Guideline, in addition to following the laws and regulations of the country or countries in which a study is conducted.

Background therapy:

Best supportive care

Evidence for comparator: -

Actual start date of recruitment	10 May 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Japan: 4
Country: Number of subjects enrolled	France: 28
Country: Number of subjects enrolled	Spain: 9
Country: Number of subjects enrolled	United Kingdom: 9
Country: Number of subjects enrolled	United States: 152
Worldwide total number of subjects	202
EEA total number of subjects	37

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0

Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	95
From 65 to 84 years	104
85 years and over	3

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

Of the 210 participants screened, 8 (3.8%) participants were screen failures. A total of 202 participants were randomized and treated.

Period 1

Period 1 title	Overall (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Group 1 - Ravulizumab + BSC

Arm description:

Ravulizumab: Weight-based doses of ravulizumab were administered intravenously on Days 1, 5, 10, and 15. BSC: Participants received medications, therapies, and interventions per standard hospital treatment protocols.

Arm type	Experimental
Investigational medicinal product name	ALXN1210
Investigational medicinal product code	
Other name	Ultomiris, Ravulizumab
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Participants randomized to ravulizumab + BSC received a weight-based dose of ravulizumab on Day 1, followed by weight-based doses of 600 milligrams (mg) or 900 mg ravulizumab on Days 5 and 10, and thereafter a single dose of 900 mg ravulizumab on Day 15. No additional doses were allowed during the Primary Evaluation Period (Day 1 through Day 29).

Arm title	Group 2 - BSC alone
------------------	---------------------

Arm description:

Participants received medications, therapies, and interventions per standard hospital treatment protocols.

Arm type	No intervention
No investigational medicinal product assigned in this arm	

Number of subjects in period 1	Group 1 - Ravulizumab + BSC	Group 2 - BSC alone
Started	135	67
Intent to Treat (ITT) Population	135	66
Pharmacokinetic (PK)	127	52 ^[1]
Safety Population	127	67
Completed	125	58
Not completed	10	9

Not qualified due to anaphylaxis	1	-
Consent withdrawn by subject	2	3
Physician decision	2	1
Adverse event	1	-
Unable to provide consent	-	1
Did not meet inclusion/exclusion criteria	2	-
Lost to follow-up	2	4

Notes:

[1] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: The data reported in the intermediate milestones is applicable to the number of participants in the respective populations. The PK population is smaller than the number of subjects in the arm because fewer patients contributed samples.

Baseline characteristics

Reporting groups

Reporting group title	Group 1 - Ravulizumab + BSC
Reporting group description:	
Ravulizumab: Weight-based doses of ravulizumab were administered intravenously on Days 1, 5, 10, and 15. BSC: Participants received medications, therapies, and interventions per standard hospital treatment protocols.	
Reporting group title	Group 2 - BSC alone
Reporting group description:	
Participants received medications, therapies, and interventions per standard hospital treatment protocols.

Statistical analyses

Statistical analysis title	Survival (Based On All-Cause Mortality) At Day 29
Comparison groups	Group 1 - Ravulizumab + BSC v Group 2 - BSC Alone

Number of subjects included in analysis	201
Analysis specification	Pre-specified
Analysis type	other
P-value	= 0.6059 ^[1]
Method	Mantel-Haenszel
Parameter estimate	Risk difference (RD)
Point estimate	-0.0205
Confidence interval	
level	95 %
sides	2-sided
lower limit	-0.1703
upper limit	0.1293

Notes:

[1] - One-sided Mantel-Haenszel test of the difference in two proportions stratified by intubated or not intubated on Day 1 and a family-wise Type I error of 0.025.

Secondary: Number Of Days Free Of Mechanical Ventilation At Day 29

End point title	Number Of Days Free Of Mechanical Ventilation At Day 29
End point description:	
The number of days free of mechanical ventilation was defined as the total number of days from Day 1 to Day 29 without invasive or non-invasive mechanical ventilation. The ITT Population consisted of all randomized participants. Participants were analyzed as randomized. Here, 'Number of Participants Analyzed' signifies those participants who were evaluable for this outcome measure.	
End point type	Secondary
End point timeframe:	
Day 29	

End point values	Group 1 - Ravulizumab + BSC	Group 2 - BSC Alone		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	129	62		
Units: Days				
least squares mean (confidence interval 95%)				
Overall	6.79 (4.79 to 8.80)	6.81 (4.19 to 9.43)		

Statistical analyses

No statistical analyses for this end point

Secondary: Number of Days the Participants were Alive and Not in ICU

End point title	Number of Days the Participants were Alive and Not in ICU
End point description:	
The number of days that the participants were alive and not in the ICU from Day 1 through Day 29 are presented. The ITT Population consisted of all randomized participants. Participants were analyzed as randomized. Here, 'Number of Participants Analyzed' signifies those participants who were evaluable for this outcome measure.	
End point type	Secondary

End point timeframe:
Day 1 through Day 29

End point values	Group 1 - Ravulizumab + BSC	Group 2 - BSC Alone		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	129	62		
Units: Days				
least squares mean (confidence interval 95%)				
Overall	6.09 (4.31 to 7.87)	6.71 (4.38 to 9.03)		

Statistical analyses

No statistical analyses for this end point

Secondary: Change From Baseline In Sequential Organ Failure Assessment (SOFA) At Day 29

End point title	Change From Baseline In Sequential Organ Failure Assessment (SOFA) At Day 29
-----------------	--

End point description:

Baseline was defined as the last available assessment on or before Day 1 for all participants. Participants were evaluated using the SOFA score, an assessment tool that included a review of 6 organ systems: respiratory, renal, hepatic, cardiac, coagulation, and central nervous system. Each organ system was scored from 0 to 4 points using the worst value observed within the previous 24 hours. The total score ranged from 0 to 24, with a higher score indicating a worse condition. The ITT Population consisted of all randomized participants. Participants were analyzed as randomized. Here, 'Number of Participants Analyzed' signifies those participants who were evaluable for this outcome measure.

End point type	Secondary

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Day 1 through Day 90

Adverse event reporting additional description:

Data for All-Cause Mortality was collected for ITT Population (randomized participants; participants analyzed as randomized [N=135, 66]). Serious and Other (Not Including Serious) Adverse Events were collected for Safety Population (randomized participants who received at least 1 dose of study drug; participants analyzed as treated [N=127, 67]).

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
13 April 2020	- Clarified the informed consent process for participants who were unconscious and whose legally acceptable representative was not immediately available. - Appended Investigator guidance regarding the management of potential drug infusion reactions during ravulizumab administration.
17 April 2020	- Relocated "Survival (based on all-cause mortality) at Day 60 and Day 90" from the list of exploratory endpoints to the list of secondary endpoints. - Clarified that participants discharged from the hospital before the end of the Primary Evaluation Period would be contacted via telephone on Day 29 to determine health status (for example, survival, mechanical ventilation, hospitalization, intensive care unit, and dialysis). - Removed the definition of Full Analysis Set and added definition of Intent to Treat. - Revised analyses of selected endpoints.
09 June 2020	- Updated the inclusion and exclusion criteria, study endpoints and objectives, and the schedule of activities. Participant reported outcomes (Short Form 12 and EuroQol 5 Dimension 5 Level) were added and implemented change to align content in Section 9 (Statistical Considerations) with version 1 and version 2 of the statistical analysis plan.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
13 January 2021	Enrollment of participants was paused on 13-Jan-2021. At that time, 202 participants had been randomized. An interim analysis for efficacy and futility was conducted on data from the first 122 participants who completed the Primary Evaluation Period. The analysis showed that the study met the prespecified stopping criteria for futility. After review of all participant data, Alexion terminated the study on 01-Sep-2021.	-

Notes:

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Enrollment of participants was paused on 13-Jan-2021. Subsequent analysis showed that the study met the prespecified stopping criteria for futility. After review of all participant data, Alexion terminated the study on 01-Sep-2021.
