Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	03 January 2024
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	03 January 2024
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

Systemic Lupus Erythematosus (SLE) is an immune-mediated disease associated with inflammation of multiple organ systems. This study will evaluate how well elsubrutinib and upadacitinib given alone or as the ABBV-599 combination (elsubrutinib/upadacitinib) works within the body, in participants who completed study M19-130. This study will assess the change in disease symptoms.

ABBV-599 is an investigational drug being developed for the treatment of Systemic Lupus Erythematosus (SLE). Adult participants with a diagnosis of SLE will be enrolled and will receive oral elsubrutinib capsules and/or oral upadacitinib tablets once daily for up to 56 weeks. Participants who were receiving elsubrutinib and/or upadacitinib in M19-130 will continue to receive the same treatment in this study. Participants who were receiving placebo in M19-130 will be re-randomized to one of the 2 combination treatment arms in this study.

Protection of trial subjects:

Subjects or their legally authorized representative (if required per local regulations) must have understood and personally, voluntarily signed and dated an informed consent, approved by an independent ethics committee (IEC)/institutional review board (IRB), prior to the initiation of any screening or study-specific procedures. In Japan, subjects under 20 years of age must have voluntarily signed and dated an informed consent, in addition to their parent or legal guardian. Legally authorized representation did not apply in the case of Germany and France, and protected persons such as minors, adults under guardianship, pregnant women, persons deprived of their liberty and persons incapable or unable to express their consent were not included in the study.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	27 July 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Argentina: 19
Country: Number of subjects enrolled	Australia: 3
Country: Number of subjects enrolled	Bulgaria: 3
Country: Number of subjects enrolled	China: 6
Country: Number of subjects enrolled	Colombia: 15
Country: Number of subjects enrolled	Germany: 3
Country: Number of subjects enrolled	Hungary: 9
Country: Number of subjects enrolled	Italy: 1

Country: Number of subjects enrolled	Japan: 13
Country: Number of subjects enrolled	Korea, Republic of: 1
Country: Number of subjects enrolled	Mexico: 15
Country: Number of subjects enrolled	New Zealand: 3
Country: Number of subjects enrolled	Poland: 9
Country: Number of subjects enrolled	Puerto Rico: 10
Country: Number of subjects enrolled	Spain: 9
Country: Number of subjects enrolled	Taiwan: 16
Country: Number of subjects enrolled	United Kingdom: 4
Country: Number of subjects enrolled	United States: 46
Worldwide total number of subjects	185
EEA total number of subjects	34

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	180
From 65 to 84 years	5
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

Subjects who completed Study M19-130 were eligible to enroll in this study. Only those subjects who met all of the specified eligibility criteria had the option to enter this long-term extension (LTE) study to receive continued therapy, provided the subject was willing and the investigator believed that continuing therapy was appropriate.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Carer, Assessor

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	ABBV-599 High Dose -> ABBV-599 High Dose

Arm description:

Participants received elsubrutinib 60 mg capsules once a day by mouth and upadacitinib 30 mg film-coated tablets once a day by mouth for 48 weeks in Study M19-130. Participants continued on this regimen in the current study (M20-186) for up to 56 weeks.

Arm type	Experimental
Investigational medicinal product name	Elsubrutinib
Investigational medicinal product code	
Other name	ABBV-105
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Capsule; Oral

Investigational medicinal product name	Upadacitinib
Investigational medicinal product code	
Other name	ABT-494, RINVOQ
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Film-coated tablet; Oral

<b>Arm title</b>	Els Pbo/Upa 30 mg -> Els Pbo/Upa 30 mg
------------------	--

Arm description:

Participants received placebo capsules for elsubrutinib once a day by mouth and upadacitinib 30 mg film-coated tablets once a day by mouth for 48 weeks in Study M19-130. Participants continued on this regimen in the current study (M20-186) for up to 56 weeks.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Placebo for Elsubrutinib

### Primary: Number of Participants With Treatment-Emergent Adverse Events

End point title	Number of Participants With Treatment-Emergent Adverse Events <sup>[1]</sup>
End point description: Adverse event (AE): any untoward medical occurrence in a patient/clinical investigation subject administered a pharmaceutical product and which doesn't necessarily have a causal relationship with this Tx. Serious adverse event (SAE): an event that results in death, is life-threatening, requires or prolongs hospitalization, results in a congenital anomaly, persistent or significant disability/incapacity or is an important medical event that, based on medical judgment, may jeopardize the subject and may require medical or surgical intervention to prevent any of the outcomes listed above. Treatment-emergent events (TEAEs) are defined as an adverse event with an onset date that is on or after the first dose of study drug from Study M20-186, and no more than 30 days after the last dose of study drug from Study M20-186. For more details on adverse events please see the Adverse Event section.	
Analysis population: subjects rcvd $\geq 1$ dose of study drug in Study M20-186, grouped by Tx rcvd	
End point type	Primary

End point timeframe:

From the first dose of study drug in Study M20-186 up to 30 days after the last dose of study drug, up to 442 days

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Descriptive data are summarized for this end point per protocol.

End point values	ABBV-599 High Dose -> ABBV-599 High Dose	Els Pbo/Upa 30 mg -> Els Pbo/Upa 30 mg	Els Pbo/Upa Pbo -> ABBV-599 High Dose	ABBV-599 Low -> ABBV-599 Low

## Statistical analyses

No statistical analyses for this end point

## Secondary: Percentage of Participants Achieving Systemic Lupus Erythematosus (SLE) Responder Index (SRI)-4

End point title	Percentage of Participants Achieving Systemic Lupus Erythematosus (SLE) Responder Index (SRI)-4 <sup>[2]</sup>
-----------------	--

End point description:

SLE Responder Index (SRI)-4 is defined as follows with all criteria compared to Baseline in Study M19-130:

- ≥4-point reduction in Systemic Lupus Erythematosus Disease Activity Index 2000 (SLEDAI-2K) score
- No worsening of the overall condition (< 0.3 point increase in Physician's Global Assessment [PhGA])
- No new British Isles Lupus Assessment Group (BILAG) A or more than 1 new BILAG B disease activity scores (i.e., no organ system changes from baseline B/C/D/E to A and no more than 1 organ system changes from baseline C/D/E to B). A letter score is assigned to each organ system with following indications: A = severe, B = moderate, C = mild, D = inactive with prior history, and E = inactive with no history.

Analysis population: Full Analysis Set: all randomized subjects who received at least 1 dose of study drug in Study M20-186; as observed (AO) analysis.

End point type	Secondary
----------------	-----------

End point timeframe:

Baseline of Study M19-130 (Week 0), Weeks 56, 64, 72, 80, 88, 96, 104

Notes:

[2] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period. Justification: When 50% of planned participants in Study M19-130 had completed Week 24 or withdrawn from the study, the ABBV-599 Low Dose and elsubrutinib 60 mg treatment groups were terminated as these groups did not meet projected efficacy. Per protocol, terminated groups were removed from the efficacy analyses.

## Secondary: Change From Baseline in Daily Prednisone Dose Over Time

End point title	Change From Baseline in Daily Prednisone Dose Over Time <sup>[4]</sup>
-----------------	--

End point description:

Participants' current use of steroid therapy was assessed at each study visit, and the amount of daily prednisone was documented.

Analysis population: Full Analysis Set: all randomized participants who received at least 1 dose of study drug in Study M20-186; as observed (AO) analysis.

End point type	Secondary
----------------	-----------

End point timeframe:

Baseline of M19-130 (Week 0), Weeks 56, 64, 72, 80, 88, 96, 104

Notes:

[4] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period. Justification: When 50% of planned participants in Study M19-130 had completed Week 24 or withdrawn from the study, the ABBV-599 Low Dose and elsubrutinib 60 mg treatment groups were terminated as these groups did not meet projected efficacy. Per protocol, terminated groups were removed from the efficacy analyses.

End point values	ABBV-599 High Dose -> ABBV-599 High Dose	Els Pbo/Upa 30 mg -> Els Pbo/Upa 30 mg	Els Pbo/Upa Pbo -> ABBV-599 High Dose	
Subject group type	Reporting group	Reporting group	Reporting group

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

All-cause mortality and adverse events were collected from the time informed consent was signed through the end of the study.

Adverse event reporting additional description:

Median time on follow-up was for 422 days for the ABBV-599 High -> ABBV-599 High group; 423 days for the Upa -> Upa and Pbo -> ABBV-599 High groups; 245 days for the ABBV-599 Low -> ABBV-599 Low group; 163 days for the Els -> Els group; and 142.5 days for the Pbo -> ABBV-599 Low group.

Assessment type	Systematic

### Reporting groups

Reporting group title	ABBV-599 High Dose -> ABBV-599 High Dose
-----------------------	--

Reporting group description:

Participants received elsubrutinib 60 mg capsules once a day by mouth and upadacitinib 30 mg filmcoated tablets once a day by mouth for 48 weeks in Study M19-130. Participants continued on this regimen in the current study (M20-186) for up to 56 weeks.

Reporting group title	Els Pbo/Upa 30 mg -> Els Pbo/Upa 30 mg
-----------------------	--

Reporting group description:

Participants received placebo capsules for elsubrutinib once a day by mouth and upadacitinib 30 mg film-coated tablets once a day by mouth for 48 weeks in Study M19-130. Participants continued on this regimen in the current study (M20-186) for up to 56 weeks.

Reporting group title	Els Pbo/Upa Pbo -> ABBV-599 High Dose
-----------------------	---------------------------------------

Reporting group description:

Participants received placebo capsules for elsubrutinib once a day by mouth and placebo film-coated tablets for upadacitinib once a day by mouth for 48 weeks in Study M19-130. Participants received elsubrutinib 60 mg capsules once a day by mouth and upadacitinib 30 mg film-coated tablets once a day in the current study (M20-186) for up to 56 weeks.

Reporting group title	ABBV-599 Low -> ABBV-599 Low
-----------------------	------------------------------

Reporting group description:

Participants received elsubrutinib 60 mg capsules once a day by mouth and upadacitinib 15 mg filmcoated tablets once a day by mouth for 48 weeks in Study M19-130. Participants continued on this regimen in the current study (M20-186) for up to 56 weeks.

Reporting group title	Els 60 mg/Upa Pbo -> Els 60 mg/Upa Pbo
-----------------------	--

Reporting group description:

Participants received elsubrutinib 60 mg capsules once a day by mouth and placebo film-coated tablets for upadacitinib once a day by mouth for 48 weeks in Study M19-130. Participants continued on this regimen in the current study (M20-186) for up to 56 weeks.

Reporting group title	Els + Upa Pbo -> ABBV-599 Low
-----------------------	-------------------------------

Reporting group description:

Participants received placebo capsules for elsubrutinib once a day by mouth and placebo film-coated tablets for upadacitinib once a day by mouth for 48 weeks in Study M19-130. Participants received elsubrutinib 60 mg capsules once a day by mouth and upadacitinib 15 mg film-coated tablets once a day by mouth for 48 weeks in the current study (M20-186) for up to 56 weeks.

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
21 July 2020	<p>Version 2.0/Amendment 1</p> <ul style="list-style-type: none"><li>• Revised the objectives to assess longer term safety, tolerability, and efficacy data</li><li>• Added a reassessment of treatment assignments based on Study M19-130 interim analysis</li><li>• Clarified eligibility criteria referring to active, chronic, or recurrent viral or bacterial infections</li><li>• Added leflunomide, cyclosporine and tacrolimus to list of permitted concomitant medications</li><li>• Added discontinuation criteria for subjects with serious infections and/or TB</li></ul>
28 October 2020	<p>Version 3.0/Amendment 2</p> <ul style="list-style-type: none"><li>• Incorporated necessary protocol modifications to account for COVID-19 infections</li><li>• Added 2 additional efficacy endpoints: change in PhGA from M19-130 Baseline and change in PtGA from M19-130 Baseline</li><li>• Added the following as areas of safety interest: active TB; adjudicated GI perforations; and adjudicated embolic and thrombotic events (non- cardiac, non-CNS) including venous thromboembolic events defined as pulmonary embolism and deep vein thrombosis</li><li>• Removed the following from the list of areas of safety interest: increased serum creatinine and CPK elevation</li><li>• Added further clarification that Study M20-186 is primarily a study of longer-term safety and that efficacy outcomes are considered secondary</li></ul>
26 October 2021	<p>Version 4.0/Amendment 3</p> <ul style="list-style-type: none"><li>• Treatment groups were clarified based on the completed Study M19-130 Interim Analysis</li><li>• Clarified that subjects will need to successfully complete 48 weeks of Study M19-130 on placebo or a group that is currently active after the planned Study M19-130 Interim Analysis and meet all eligibility criteria to be considered eligible to enroll into LTE Study M20-186</li><li>• Added the statement, "At the Sponsor's discretion, doses of study drug(s) selected for continuation in LTE Study M20-186 may be reassigned or discontinued at any time based on the outcome assessment of the Study M19-130 Interim Analysis."</li><li>• Added the statement, "If the study is partially terminated, a subject in a terminated group will be asked to return for a PD visit and to perform a 30-day follow-up phone call after the last dose of study drug."</li></ul>

Notes:

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
