

## Clinical trial results:

### Phase 2 Multicenter, Randomized, Double-Blind, Placebo-Controlled, Parallel-Group Study to Assess the Efficacy, Safety, Tolerability, and Pharmacokinetics of NBI-827104 in Pediatric Subjects with Epileptic Encephalopathy with Continuous Spike-and-Wave During Sleep Summary

EudraCT number	2020-003141-11
Trial protocol	DK FR ES DE
Global end of trial date	18 October 2022

#### Results information

Result version number	v1 (current)
This version publication date	28 April 2023
First version publication date	28 April 2023

#### Trial information

##### Trial identification

Sponsor protocol code	NBI-827104-CSWS2010
-----------------------	---------------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT04625101
WHO universal trial number (UTN)	-

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	18 October 2022
Is this the analysis of the primary completion data?	Yes
Primary completion date	18 October 2022
Global end of trial reached?	Yes
Global end of trial date	18 October 2022
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary objective of this study was to assess the effect of NBI-827104 on the overnight epileptiform video electroencephalogram (video EEG) activity in pediatric participants with epileptic encephalopathy with continuous spike-wave discharges during sleep (EECSWS).

Protection of trial subjects:

The study was conducted in full compliance with International Council for Harmonisation (ICH) Technical Requirements for Pharmaceuticals for Human Use GCP guidelines and with the laws and regulations of the country in which the study was conducted.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	26 April 2021
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 3
Country: Number of subjects enrolled	Denmark: 3
Country: Number of subjects enrolled	Switzerland: 2
Country: Number of subjects enrolled	United Kingdom: 2
Country: Number of subjects enrolled	United States: 14
Worldwide total number of subjects	24
EEA total number of subjects	6

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	21
Adolescents (12-17 years)	3

Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

Participants were enrolled at 14 clinical sites in the United States and Europe.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

### Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

<b>Arm title</b>	NBI-827104
------------------	------------

Arm description:

NBI-827104 administered orally daily for up to 13 weeks.

Arm type	Experimental
Investigational medicinal product name	NBI-827104
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

NBI-827104 was administered per dose and schedule specified in the arm description.

<b>Arm title</b>	Placebo
------------------	---------

Arm description:

Placebo administered orally daily for up to 13 weeks.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Placebo was administered per dose and schedule specified in the arm description.

Number of subjects in period 1	NBI-827104	Placebo
Started	16	8
Completed	15	7
Not completed	1	1
Protocol deviation	1	-
Withdrawal by subject	-	1

## Baseline characteristics

### Reporting groups

Reporting group title	NBI-827104
-----------------------	------------

Reporting group description:

NBI-827104 administered orally daily for up to 13 weeks.

Reporting group title	Placebo
-----------------------	---------

Reporting group description:

Placebo administered orally daily for up to 13 weeks.

Reporting group values	NBI-827104	Placebo	Total
Number of subjects	16	8	24
Age categorical			
Units: Subjects			
In utero	0	0	0
Preterm newborn infants (gestational age < 37 wks)	0	0	0
Newborns (0-27 days)	0	0	0
Infants and toddlers (28 days-23 months)	0	0	0
Children (2-11 years)	14	7	21
Adolescents (12-17 years)	2	1	3
Adults (18-64 years)	0	0	0
From 65-84 years	0	0	0
85 years and over	0	0	0
Gender categorical			
Units: Subjects			
Female	7	3	10
Male	9	5	14
Race			
Units: Subjects			
White	15	7	22
Black or African American	0	1	1
Other	1	0	1
Ethnicity			
Units: Subjects			
Hispanic or Latino	3	0	3
Not Hispanic or Latino	13	8	21

## End points

### End points reporting groups

Reporting group title	NBI-827104
Reporting group description: NBI-827104 administered orally daily for up to 13 weeks.	
Reporting group title	Placebo
Reporting group description: Placebo administered orally daily for up to 13 weeks.	

### Primary: Ratio of Spike-Wave Index (SWI) During First Hour of Nonrapid Eye Movement (NREM) Sleep at Week 6

End point title	Ratio of Spike-Wave Index (SWI) During First Hour of Nonrapid Eye Movement (NREM) Sleep at Week 6
End point description: The ratio of SWI at the end of Week 6 to baseline during the first hour (60 minutes) of NREM sleep based on centralized video-EEG reading, where baseline was defined as the last value measured prior to intake of study treatment on Day 1. Full Analysis Set included all randomized participants who had at least 1 dose of study treatment and at least 1 efficacy video EEG assessment.	
End point type	Primary
End point timeframe: Baseline to Week 6	

End point values	NBI-827104	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	14 <sup>[1]</sup>	6 <sup>[2]</sup>		
Units: Ratio				
least squares mean (standard error)	-0.02 (± 0.02)	0.01 (± 0.04)		

Notes:

[1] - One participant did not have a Week 6 video-EEG and was excluded from the analysis.

[2] - One participant did not have an evaluable Week 6 video-EEG and was excluded from the analysis.

### Statistical analyses

Statistical analysis title	Change from Baseline to the end of Week 6
Comparison groups	NBI-827104 v Placebo
Number of subjects included in analysis	20
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.4326
Method	ANCOVA

### Secondary: Ratio of SWI During First Hour of NREM Sleep at Week 12

End point title	Ratio of SWI During First Hour of NREM Sleep at Week 12
End point description:	
The ratio of SWI at the end of Week 12 to baseline during the first hour (60 minutes) of NREM sleep based on centralized video-EEG reading, where baseline was defined as the last value measured prior to intake of study treatment on Day 1. Full Analysis Set included all randomized participants who had at least 1 dose of study treatment and at least 1 efficacy video EEG assessment.	
End point type	Secondary
End point timeframe:	
Baseline to Week 12	

<b>End point values</b>	NBI-827104	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	15	7		
Units: Ratio				
least squares mean (standard error)	-0.05 ( $\pm$ 0.02)	0.03 ( $\pm$ 0.03)		

## Statistical analyses

No statistical analyses for this end point

## Secondary: Number of Participants Considered as Responders as Assessed by the Caregiver Global Impression of Change (CaGI-C) Score

End point title	Number of Participants Considered as Responders as Assessed by the Caregiver Global Impression of Change (CaGI-C) Score
End point description:	
The CaGI-C is a 7-point scale that rates the caregiver's assessment of the overall improvement in the participants symptoms since the initiation of study treatment, ranging from 1 (very much improved) to 7 (very much worse). A responder was defined as a participant with a score of 1 (very much improved) or 2 (much improved). Full Analysis Set included all randomized participants who had at least 1 dose of study treatment and at least 1 efficacy video EEG assessment.	
End point type	Secondary
End point timeframe:	
Week 6 and Week 12	

<b>End point values</b>	NBI-827104	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	15	7		
Units: Count of Participants				
Week 6	1	1		
Week 12	2	1		

## Statistical analyses

No statistical analyses for this end point

### Secondary: Number of Participants Considered as Responders as Assessed by the Clinician Global Impression of Change (CGI-C) Score

End point title	Number of Participants Considered as Responders as Assessed by the Clinician Global Impression of Change (CGI-C) Score
-----------------	--

End point description:

The CGI-C is a 7-point scale that rates the clinician's assessment of overall improvement in the participant's symptoms since the initiation of study treatment, ranging from 1 (very much improved) to 7 (very much worse). A responder was defined as a participant with a score of 1 (very much improved) or 2 (much improved).

Full Analysis Set included all randomized participants who had at least 1 dose of study treatment and at least 1 efficacy video EEG assessment.

End point type	Secondary
----------------	-----------

End point timeframe:

Week 6 and Week 12

End point values	NBI-827104	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	15	7		
Units: Count of Participants				
Week 6	1	1		
Week 12	1	1		

## Statistical analyses

No statistical analyses for this end point

### Secondary: Number of Participants Considered as Responders as Assessed by the Clinical Global Impression of Severity (CGI-S) Scores

End point title	Number of Participants Considered as Responders as Assessed by the Clinical Global Impression of Severity (CGI-S) Scores
-----------------	--

End point description:

The CGI-S is a 7-point scale that rates the clinician's assessment of overall symptom severity, ranging from 1 (normal, not at all ill) to 7 (among the most extremely ill patients). A responder was defined as a participant with at least 1-point improvement in the CGI-S score from baseline.

Full Analysis Set included all randomized participants who had at least 1 dose of study treatment and at least 1 efficacy video EEG assessment.

End point type	Secondary
----------------	-----------

End point timeframe:

Baseline to Week 6 and Baseline to Week 12

<b>End point values</b>	NBI-827104	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	15	7		
Units: Count of Participants				
Week 6	3	1		
Week 12	4	4

No statistical analyses for this end point

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Day 1 (after dosing) to Week 17

Adverse event reporting additional description:

Safety analysis set included all randomized participants who had at least 1 dose of study treatment.

Assessment type	Systematic

Metabolism and nutrition disorders Decreased appetite subjects affected / exposed occurrences (all)	3 / 16 (18.75%) 3	1 / 8 (12.50%) 1	

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
03 May 2021	<ul style="list-style-type: none"><li>- A requirement that at least 4 days of baseline seizure diary data should be obtained prior to randomization was added.</li><li>- Added permitted medications</li></ul>
05 August 2021	<ul style="list-style-type: none"><li>- The option for participants to enroll directly into an open-label extension study after the completion of the Week 12 study visit was added.</li><li>- Updated inclusion criterion for contraception</li><li>- Added prohibited medication</li><li>- Reduced the total blood volume collected during the study</li><li>- Added additional requirements for study treatment discontinuation</li></ul>

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
