

Clinical trial results:

A Phase 2 interventional, multicenter, randomized open label study to determine the effective and tolerable dose of KAF156 and Lumefantrine Solid Dispersion Formulation in combination, given once daily for 1, 2 and 3-days to adults and children with uncomplicated Plasmodium falciparum malaria

Summary

EudraCT number	2020-003284-25
Trial protocol	Outside EU/EEA
Global end of trial date	28 June 2021

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	28 June 2021
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	28 June 2021
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective was to determine the effective doses of KAF156 combined with LUM-SDF given daily over 1, 2, or 3 days for treatment of uncomplicated malaria caused by *P. falciparum*.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	02 August 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Burkina Faso: 29
Country: Number of subjects enrolled	Côte d'Ivoire: 40
Country: Number of subjects enrolled	Gabon: 42
Country: Number of subjects enrolled	Vietnam: 41
Country: Number of subjects enrolled	Thailand: 7
Country: Number of subjects enrolled	Kenya: 137
Country: Number of subjects enrolled	India: 2
Country: Number of subjects enrolled	Mozambique: 30
Country: Number of subjects enrolled	Uganda: 134
Country: Number of subjects enrolled	Mali: 62
Worldwide total number of subjects	524
EEA total number of subjects	0

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0

Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	179
Adolescents (12-17 years)	197
Adults (18-64 years)	148
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Participants were recruited from 13 sites in 10 countries.

Pre-assignment

Screening details:

Before being enrolled in the study, participants underwent a prescreening evaluation to ascertain the Plasmodium falciparum parasitemia count.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Single blind
Roles blinded	Assessor ^[1]

Arms

Are arms mutually exclusive?	Yes
Arm title	PK Run-in Cohort: KAF 200 mg and LUM 960 mg QD for 1 day

Arm description:

Participants received a single oral dose of KAF156 200 mg and LUM-SDF 960 mg

Arm type	Experimental
Investigational medicinal product name	KAF156
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Administered in combination with LUM-SDF once daily (QD) for 1 day at 200 mg.

Investigational medicinal product name	Lumefantrine Solid Dispersion Formulation
Investigational medicinal product code	
Other name	LUM-SDF / LUM
Pharmaceutical forms	Oral solution in sachet
Routes of administration	Oral use

Dosage and administration details:

Administered in combination with KAF156 once daily (QD) for 1 day at 960 mg.

Arm title	Part A - Cohort 1: KAF 400 mg and LUM 960 mg QD for 1 day
------------------	---

Arm description:

Participants received a single oral dose of KAF156 400 mg and LUM-SDF 960 mg

Arm type	Experimental
Investigational medicinal product name	Lumefantrine Solid Dispersion Formulation
Investigational medicinal product code	
Other name	LUM-SDF / LUM
Pharmaceutical forms	Oral solution in sachet
Routes of administration	Oral use

Dosage and administration details:

Administered in combination with KAF156 oncedaily (QD) for 1 day at 960 mg.

Investigational medicinal product name	KAF156
Investigational medicinal product code	
Other name	

Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Administered in combination with LUM-SDF once daily (QD) for 1 day at 400 mg.

Arm title	Part A - Cohort 2: KAF 800 mg and LUM 960 mg QD for 1 day
------------------	---

Arm description:

Participants received a single oral dose of KAF156 800 mg and LUM-SDF 960 mg

Arm type	Experimental
Investigational medicinal product name	Lumefantrine Solid Dispersion Formulation
Investigational medicinal product code	
Other name	LUM-SDF / LUM
Pharmaceutical forms	Oral solution in sachet
Routes of administration	Oral use

Dosage and administration details:

Administered in combination with KAF156 oncedaily (QD) for 1 day at 960 mg.

Investigational medicinal product name	KAF156
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Administered in combination with LUM-SDF once daily (QD) for 1 day at 800 mg.

Arm title	Part A - Cohort 3: KAF 400 mg and LUM 960 mg QD for 2 days
------------------	--

Arm description:

Participants received KAF156 400 mg and LUM-SDF 960 mg once daily via oral administration for 2 days

Arm type	Experimental
Investigational medicinal product name	Lumefantrine Solid Dispersion Formulation
Investigational medicinal product code	
Other name	LUM-SDF / LUM
Pharmaceutical forms	Oral solution in sachet
Routes of administration	Oral use

Dosage and administration details:

Administered in combination with KAF156 oncedaily (QD) for 2 days at 960 mg.

Investigational medicinal product name	KAF156
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Administered in combination with LUM-SDF once daily (QD) for 2 days at 400 mg.

Arm title	Part A - Cohort 4: KAF 200 mg and LUM 480 mg QD for 3 days
------------------	--

Arm description:

Participants received KAF156 200 mg and LUM-SDF 480 mg once daily via oral administration for 3 days

Arm type	Experimental
Investigational medicinal product name	KAF156
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:	
Administered in combination with LUM-SDF once daily (QD) for 3 days at 200 mg.	
Investigational medicinal product name	Lumefantrine Solid Dispersion Formulation
Investigational medicinal product code	
Other name	LUM-SDF / LUM
Pharmaceutical forms	Oral solution in sachet
Routes of administration	Oral use
Dosage and administration details:	
Administered in combination with KAF156 oncedaily (QD) for 3 days at 480 mg.	
Arm title	Part A - Cohort 5: KAF 400 mg and LUM 480 mg QD for 3 days
Arm description:	
Participants received KAF156 400 mg and LUM-SDF 480 mg once daily via oral administration for 3 days	
Arm type	Experimental
Investigational medicinal product name	Lumefantrine Solid Dispersion Formulation
Investigational medicinal product code	
Other name	LUM-SDF / LUM
Pharmaceutical forms	Oral solution in sachet
Routes of administration	Oral use
Dosage and administration details:	
Administered in combination with KAF156 oncedaily (QD) for 3 days at 480 mg.	
Investigational medicinal product name	KAF156
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
Administered in combination with LUM-SDF once daily (QD) for 3 days at 400 mg.	
Arm title	Part A - Cohort 6: KAF 400 mg and LUM 960 mg QD for 3 days
Arm description:	
Participants received KAF156 400 mg and LUM-SDF 960 mg once daily via oral administration for 3 days	
Arm type	Experimental
Investigational medicinal product name	KAF156
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
Administered in combination with LUM-SDF once daily (QD) for 3 days at 400 mg.	
Investigational medicinal product name	Lumefantrine Solid Dispersion Formulation
Investigational medicinal product code	
Other name	LUM-SDF / LUM
Pharmaceutical forms	Oral solution in sachet
Routes of administration	Oral use
Dosage and administration details:	
Administered in combination with KAF156 oncedaily (QD) for 3 days at 960 mg.	
Arm title	Part A - Cohort 7: Coartem
Arm description:	
Participants received Coartem twice daily via oral administration for 3 days	
Arm type	Active comparator

Investigational medicinal product name	Coartem
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Dispersible tablet
Routes of administration	Oral use
Dosage and administration details:	
Administered twice daily for 3 days as active comparator	
Arm title	Part B - Cohort 1: KAF 400 mg and LUM 960 mg QD for 1 day
Arm description:	
Participants received a single oral dose of KAF156 400 mg and LUM-SDF 960 mg	
Arm type	Experimental
Investigational medicinal product name	Lumefantrine Solid Dispersion Formulation
Investigational medicinal product code	
Other name	LUM-SDF / LUM
Pharmaceutical forms	Oral solution in sachet
Routes of administration	Oral use
Dosage and administration details:	
Administered in combination with KAF156 oncedaily (QD) for 1 day at 960 mg.	
Investigational medicinal product name	KAF156

Reporting group description:	
Participants received Coartem twice daily via oral administration for 3 days	

Primary: Part A and Part B: Number of participants with Polymerase Chain Reaction (PCR)-corrected adequate clinical and parasitological response (ACPR) at Day 29

End point title	Part A and Part B: Number of participants with Polymerase Chain Reaction (PCR)-corrected adequate clinical and parasitological response (ACPR) at Day 29 ^{[1][2]}
End point description:	
PCR-corrected ACPR defined as the absence of parasitaemia was evaluated at Day 29 (i.e., 28 days post first dose) based on the short half-life of the study drugs. Microscopic species identification was confirmed and determined by PCR genotyping methods to establish malaria recrudescence/reinfection.	

A participant was considered as PCR-corrected ACPR at Day 29 if the participant did not meet any of the criteria of early treatment failure, late clinical failure or late parasitological failure and was absence of parasitaemia on Day 29 irrespective of axillary temperature unless the presence of parasitaemia after 7 days was due to reinfection based on PCR. A presence of parasitaemia after 7 days of treatment initiation was considered as a reinfection only if the parasitaemia was clear before Day 8 and none of the parasite strain(s) detected on Day 8 or later matched with the parasite strain at baseline based on PCR.

No statistical analysis was planned for this primary outcome.

End point type	Primary
----------------	---------

End point timeframe:

28 days post first dose

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical analysis was planned for this endpoint

[2] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: No statistical analysis was planned for this endpoint

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse events were reported from first dose of study treatment until end of study treatment plus 40, 41 or 42 days post treatment depending on whether the participant received treatment during 1, 2 or 3 consecutive days respectively.

Assessment type	Systematic

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
14 February 2017	PK Run-in Part was included in the amended study protocol. This first part of the study will explore the PK and safety of KAF156 given in combination with LUM-SDF to understand the impact of LUM-SDF on KAF156 exposure as victim drug.
13 April 2018	Protocol was amended to correct several errors/inconsistencies, and provide clarifications.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
