

Clinical trial results:

A randomized, subject and investigator blinded, placebo-controlled multicenter study to assess the efficacy and safety of CMK389 in patients with moderate to severe atopic dermatitis.

Summary

EudraCT number	2020-003406-31
Trial protocol	HU DE FR CZ ES
Global end of trial date	13 December 2022

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	13 December 2022
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	13 December 2022
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective of the trial was to assess the efficacy of CMK389 in participants with moderate to severe atopic dermatitis.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	20 April 2021
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Czechia: 15
Country: Number of subjects enrolled	France: 4
Country: Number of subjects enrolled	Germany: 38
Country: Number of subjects enrolled	Hungary: 3
Country: Number of subjects enrolled	Poland: 8
Country: Number of subjects enrolled	Spain: 3
Worldwide total number of subjects	71
EEA total number of subjects	71

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0

Adolescents (12-17 years)	0
Adults (18-64 years)	71
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Participants took part in 18 investigative sites in 6 countries.

Pre-assignment

Screening details:

There was a screening period of up to 4 weeks to assess participants eligibility.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	CMK389 10mg/kg i.v.
------------------	---------------------

Arm description:

CMK389 10 mg/kg monthly i.v. dose

Arm type	Experimental
Investigational medicinal product name	CMK389
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

CMK389 10mg/kg intravenously monthly

Arm title	CMK389 300mg s.c.
------------------	-------------------

Arm description:

CMK389 300mg monthly s.c. dose

Arm type	Experimental
Investigational medicinal product name	CMK389
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

CMK389 300 mg subcutaneous monthly

Arm title	Placebo i.v.
------------------	--------------

Arm description:

Placebo monthly i.v. dose

Arm type	Placebo
Investigational medicinal product name	CMK389
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Placebo intravenously monthly

Arm title	Placebo s.c.
------------------	--------------

Arm description:

Placebo monthly s.c. dose

Arm type	Placebo
Investigational medicinal product name	CMK389
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Placebo subcutaneous monthly

Not completed	2
Adverse events	1
Subject/Guardian decision	1
Lost to follow-up	-

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: There were 4 participants who were randomized to the CMK389 10 mg/kg i.v. group but never received any dose of study treatment. They have not been included in the tables of Disposition and Baseline Characteristics.

Primary: Number of participants with Investigator Global assessment (IGA) response

End point title	Number of participants with Investigator Global assessment (IGA) response ^[1]
End point description: The Investigator Global assessment (IGA) scale used was vIGA-AD TM (Validated Investigator Global Assessment scale for Atopic Dermatitis). The IGA rating scale was used to determine the severity of atopic dermatitis and clinical response to treatment. It reflected a participant's overall disease severity for the whole body based on a 5-point scale. The 5-point scale included: clear, almost clear, mild, moderate, and severe disease. IGA response is defined as clear or almost clear and at least a 2 point-reduction from baseline at week 16.	
End point type	Primary
End point timeframe: Baseline, Week 16	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only analyzed descriptively

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
03 March 2021	The main purpose of this amendment is to address requests from Health Authorities (HA) and Ethics Committees (EC) received during review of the clinical trial application, which includes the creation of an independent Data Monitoring Committee (DMC) for this proof of concept study.
04 March 2022	The main purpose of this amendment is to address Health Authority (HA) request and to update and clarify language in selected sections of the protocol. In accordance with the HA request and to avoid ambiguity, a sentence in the rescue medication section stating that investigator should consult with sponsor's medical lead before study drug discontinuation has been deleted. Furthermore, in order to resolve previously detected issues in the protocol, the content of several sections have been updated with clarifications.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
