

Clinical trial results:

A double blind, randomized, placebo-controlled, adaptive 14-week Phase IIb trial to evaluate the efficacy and safety of vafidemstat in an adult borderline personality disorder (BPD) population (PORTICO)

Summary

EudraCT number	2020-003469-20
Trial protocol	ES DE BG
Global end of trial date	13 November 2023

Results information

Result version number	v1 (current)
This version publication date	02 January 2025
First version publication date	02 January 2025

Trial information

Trial identification

Sponsor protocol code	CL07-ORY-2001

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	27 June 2024
Is this the analysis of the primary completion data?	Yes
Primary completion date	13 November 2023
Global end of trial reached?	Yes
Global end of trial date	13 November 2023
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

- To investigate the efficacy of vafidemstat in the treatment of agitation and aggression in adult BPD patients
- To investigate the efficacy of vafidemstat in the treatment of adult BPD patients

Protection of trial subjects:

No specific protection of trial subjects was put in place

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	08 March 2021
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 17
Country: Number of subjects enrolled	Bulgaria: 28
Country: Number of subjects enrolled	Germany: 37
Country: Number of subjects enrolled	United States: 116
Country: Number of subjects enrolled	Serbia: 13
Worldwide total number of subjects	211
EEA total number of subjects	82

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	211

From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

Main selection criteria: adult men/ women 18-65 years; DSM-5 diagnostic criteria for BPD met at least 3 months before Screening; AAPI-CR A/A subscale score ≥ 16 (severity X frequency); sum of A/A subscale severity scores ≥ 6 ; maintain pre-screening psychotherapy and permitted concomitant medications, should not initiate them during the trial.

Period 1

Period 1 title	Treatment (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Full analysis set population

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

During the 12-week, double-blind, randomized, placebo-controlled Treatment period, from Visit 2 to Visit 8, participants were randomized to:

- Vafidemstat: participants received 1 capsule with 1.2 mg/day of vafidemstat from Monday to Friday and 1 capsule of placebo from Saturday to Sunday.
- Placebo: participants received 1 capsule of placebo per day.

During the 2-week, participant-blind, run-out safety follow-up period, from Visit 8 to Visit 9, all participants received 1 capsule of placebo per day.

Arm title	Vafidemstat 1.2 mgr
------------------	---------------------

End point type	Secondary
End point timeframe:	
Over time: from Baseline-Week 0 to Week 12	

End point values	Placebo	Vafidemstat 1.2 mgr		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	105	106		
Units: Arbitrary unit				
least squares mean (standard error)	-7.21 (± 1.490)	-8.41 (± 1.507)		

Statistical analyses

Statistical analysis title	2ary endpoint: STAI-State Anxiety Raw Score
Comparison groups	Placebo v Vafidemstat 1.2 mgr
Number of subjects included in analysis	211
Analysis specification	Pre-specified
Analysis type	other
P-value	= 0.4942
Method	Mixed models analysis
Parameter estimate	Mean difference (final values)
Point estimate	-1.2
Confidence interval	
level	95 %
sides	2-sided
lower limit	-4.64
upper limit	2.25
Variability estimate	Standard error of the mean
Dispersion value	1.745

Secondary: Difference in the STAI-Trait Anxiety Raw Score over time (from Baseline to Week 12)

End point title	Difference in the STAI-Trait Anxiety Raw Score over time (from Baseline to Week 12)
End point description:

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Treatment-emergent adverse events reported from Baseline-Week 0 to Week 14

Adverse event reporting additional description:

Safety set population

Assessment type	Systematic
-----------------	------------

Dictionary used

Dictionary name	MedDRA
-----------------	--------

Dictionary version	26.0
--------------------	------

Reporting groups

Reporting group title	Placebo
-----------------------	---------

Reporting group description:

Safety set population

Reporting group title	Vafidemstat 1.2 mgr
-----------------------	---------------------

Reporting group description:

Safety set population

Serious adverse events	Placebo	Vafidemstat 1.2 mgr	
Total subjects affected by serious adverse events			
subjects affected / exposed	0 / 104 (0.00%)	1 / 106 (0.94%)	
number of deaths (all causes)	0	0	
number of deaths resulting from adverse events	0	0	
Infections and infestations			
Kidney infection			
subjects affected / exposed	0 / 104 (0.00%)	1 / 106 (0.94%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	

Frequency threshold for reporting non-serious adverse events: 5 %

Non-serious adverse events	Placebo	Vafidemstat 1.2 mgr	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	40 / 104 (38.46%)	27 / 106 (25.47%)	
Nervous system disorders			
Headache			
subjects affected / exposed	17 / 104 (16.35%)	13 / 106 (12.26%)	
occurrences (all)	18	16	
Tension headache			

subjects affected / exposed occurrences (all)	6 / 104 (5.77%) 17	5 / 106 (4.72%) 11	
Infections and infestations Nasopharyngitis subjects affected / exposed occurrences (all)	18 / 104 (17.31%) 22	9 / 106 (8.49%) 11	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
12 February 2021	Modification of study endpoints' evaluation times. Reason: changes on statistical methods. Sample size increased. Reason: changes in study statistical considerations. Amendments to Statistical Methods section. Reason: changes in study statistical considerations. Other minor changes and clarifications in different protocol sections.
12 July 2021	Addition of a paragraph on reproductive and developmental toxicology in Section 1.3. Reason: to provide a more accurate dose justification. Addition of the CSSRS to the list of safety assessments in Section 7.3 (Safety Assessments). Reason: clarification of its safety purpose. Addition of "Overdose should be reported as an adverse event" in Section 8.5. Reason: safety reporting clarification. Amendments to the Statistical Methods section. Reason: to implement a more precise and appropriate statistical methodology. Other minor changes and clarifications added to different protocol sections.
28 September 2021	Update of Concomitant Medication section and addition of new text informing participants of serotoninergic syndrome. Reason: to adhere with regulatory requirements. Update of the Laboratory Safety Assessments section. Reason: to provide clarity on safety requirements. Modification of Statistical Analysis section. Reason: to adhere with regulatory requirements. Update of Study Procedures to include qualitative research data obtention and update of Pharmacokinetic Assessment, only for the US sites. Reason: to adhere with regulatory requirements.
08 August 2022	Changes on several inclusion and exclusion criteria. Reason: flexibilization of the conditions for participant inclusion. Update of Concomitant Medication section. Reason: to account for the potential addiction to benzodiazepines. Update of Statistical Methods and Study Design sections to further detail the Interim analysis strategy. Reason: to implement regulatory suggestions.
24 May 2023	Update of Statistical Analysis & Determination of Sample Size sections regarding effect size and sample size: increase of sample size. Reason: to implement regulatory suggestions. Modifications in the Concomitant Medication and Follow-up of Participants after AEs sections. Reason: to provide clarity on participants safety.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
