

Clinical trial results:

BACILLUS CALMETTE-GUÉRIN VACCINATION TO PREVENT SERIOUS RESPIRATORY TRACT INFECTION AND COVID-19 IN VULNERABLE ELDERLY – AN ADAPTIVE RANDOMIZED CONTROLLED TRIAL

Summary

EudraCT number	2020-003470-47
Trial protocol	NL
Global end of trial date	22 July 2021

Results information

Result version number	v1 (current)
This version publication date	03 August 2022
First version publication date	03 August 2022

Trial information

Trial identification

Sponsor protocol code	74730.041.20
-----------------------	--------------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT04537663
WHO universal trial number (UTN)	-

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	03 March 2022
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	22 July 2021
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Primary Objective:

To determine in vulnerable elderly the effect of BCG vaccination on the adaptive primary endpoint, based on the accrual of events:

- the incidence of COVID-19 (selected as primary endpoint), or
- the incidence of clinically relevant RTI (potentially including COVID-19) (selected as secondary endpoint)

Protection of trial subjects:

Safety Follow up after injection by weekly calls

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	31 August 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Netherlands: 6112
Worldwide total number of subjects	6112
EEA total number of subjects	6112

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	1355
From 65 to 84 years	4627

85 years and over	130
-------------------	-----

Subject disposition

Recruitment

Recruitment details:

Patients were recruited in hospitals and were eligible for enrollment in the trial if they were 60 years of age or older and at risk of severe COVID-19, had no contra-indications for BCG-vaccination, and did not have a documented COVID-19 infection prior to enrollment. Participants who had previously received BCG at any age were eligible.

Pre-assignment

Screening details:

Hospitals screened for patients with chronic underlying disease or recent hospitalization or major surgery and checked eligibility criteria, or GPs referred patients, or participants self-referred to the study team.

Period 1

Period 1 title	overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Assessor

Blinding implementation details:

Vaccinations are prepared in a double blind set up- Placebo/ active vaccin

Arms

Are arms mutually exclusive?	Yes
Arm title	Active

Arm description:

0.1 mL of BCG (Danish strain 1331, SSI, Denmark) via intradermal injection preferably in the left upper arm

Arm type	Active comparator
Investigational medicinal product name	BCG Vaccination
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder and solvent for emulsion for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

eenmalig 0,11ml (=0,1ml + 0,01ml overmaat) intradermaal toedienen

Aangevraagd #JC BCG-PRIME

BCG SSI PDR+SOLV

0,75 MG/ML

(98171291)

Subject analysis set description: All subjects randomized and consenting to the intervention	

Primary: Cumulative incidence of COVID-19 - primary analysis

End point title	Cumulative incidence of COVID-19 - primary analysis
End point description: Participants potentially meeting one of the two candidate primary endpoints will be adjudicated by a blinded committee. Each episode can be classified as COVID-19 or clinically relevant RTI or both. The number of primary endpoints will be continuously monitored and a decision will be made according to a straightforward prespecified process. When the number of COVID-19 episodes first reaches its target of 67 episodes, COVID-19 will be declared primary endpoint and will be analyzed.	
End point type	Primary
End point timeframe: From randomization until at least 67 episodes of COVID-19 in unique individuals were identified.	

End point values	Active	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	3058	3054		
Units: percentage				
number (not applicable)				
COVID-19	57	50		
No COVID-19	3001	3004		

Statistical analyses

Statistical analysis title	Cumulative incidence
Statistical analysis description: Reported as the cumulative incidence by treatment arm. Competing risk analysis using Fine and Gray regression with mortality as potential competing event and adjusted for site of enrolment, age (categorized as 60-69, 70-79 and ≥ 80 years), chronic cardiovascular disease (including hypertension), diabetes mellitus (type 1 and 2), and chronic pulmonary disease. The effect was reported as a sub-distribution hazard ratio (SDHR) with 95% CI.	
Comparison groups	Active v Placebo

Number of subjects included in analysis	6112
Analysis specification	Pre-specified
Analysis type	superiority ^[1]
Parameter estimate	Hazard ratio (HR)
Point estimate	1.13
Confidence interval	
level	95 %
sides	2-sided
lower limit	0.77
upper limit	1.65

Notes:

[1] - Fine and Gray regression

Primary: Cumulative incidence of COVID-19 - final analysis

End point title	Cumulative incidence of COVID-19 - final analysis
End point description:	After the primary analysis the DSMB recommended continuation of the trial without unblinding. This analysis includes all primary endpoints of the total 6-month study duration.
End point type	Primary
End point timeframe:	Total follow-up duration of 6 months from administration of study vaccine.

Notes:

[5] - Fine & Gray regression

Secondary: Clinically relevant RTI

End point title	Clinically relevant RTI
-----------------	-------------------------

End point description:

An episode meeting all of the following criteria:

- Respiratory tract infection (RTI), defined as new onset or sudden aggravation of:
 - At least one respiratory symptom (cough, sore throat, runny or congested nose, dyspnea, loss of smell or taste, signs at auscultation or percussions of the lungs)
 - At least one systemic symptom (fever, headache, muscle ache, sweats or chills, tiredness, confusion)
- Requirement of a medical intervention. A medical intervention was defined as the initiation of antibiotic, antiviral or corticosteroid treatment in primary or secondary care, adaptation in pulmonary maintenance medication, or hospitalization.

End point type	Secondary

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Up to 4 weeks after administration of study vaccine for injection site reactions. Up to 6 months after administration of study vaccine for adverse events that required medical consultation.

Adverse event reporting additional description:

Injection site reaction events were solicited for up to 4 weeks after administration of study vaccine by means of a weekly questionnaire. Medical consultations were reported by means of a bi-weekly questionnaire up to 6-month after administration of study vaccine and medical records of these consultations were screened for (serious) adverse events.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
13 October 2020	<p>The research population will include older adults, both females and males, who are vulnerable according to the below definition. Recruitment of patients is planned from August till December 1th.</p> <p>b. Inclusion criteria</p> <p>In order to be eligible to participate in this study, a participant must meet the following criteria:</p> <p>Age ≥ 60 years</p> <p>Meeting at least one of the following criteria:</p> <p>a) Having a chronic somatic disease*</p> <p>b) Having undergone major surgery**</p> <p>c) Planned to be discharged from the hospital or discharged from the hospital less than 6 weeks ago; a hospital admission is defined as an overnight stay.</p> <p>Departments of interest are those that in the opinion of the principle investigator admit mostly vulnerable elderly and include but are not limited to: cardiology, pulmonology, internal medicine, neurology.</p> <p>d) Attending the thrombosis care service</p> <p>* Chronic somatic diseases do not include risk factors such as hypertension or obesity unless the participant receives medication targeted against the risk factor.</p> <p>** Major surgery is any invasive operative procedure in which a more extensive resection is performed, e.g. a body cavity is entered, organs are removed, or normal anatomy is altered. In general, if a mesenchymal barrier is opened (pleural cavity, peritoneum, meninges), the surgery is considered major.</p> <p>c. Exclusion criteria</p> <p>A potential participant who meets any of the following criteria will be excluded from participation in this study:</p> <p>Fever ($>38^{\circ}\text{C}$) within the past 24 hours</p> <p>Suspicion of current active viral or bacterial infection; the requirement to finish an antibiotic course upon discharge is not an exclusion criterion when the infection is controlled in the opinion of the attending physician</p> <p>Vaccination with live vaccine in the past four weeks or planned vaccination with live vaccine during the next four weeks</p> <p>Severely immunocompromised participants. This exclusion category comprises:</p> <p>a) known infection by the human ion 2.0,</p>

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Non-serious adverse events other than injection site reactions occurring in the first 4 weeks after study vaccine administration were only systematically inquired if a medical consultation was required.

Notes:
