Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	15 January 2024
Is this the analysis of the primary completion data?	Yes
Primary completion date	21 November 2023
Global end of trial reached?	Yes
Global end of trial date	21 November 2023
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate the efficacy of GSK3511294 100 mg (SC) every 26 weeks versus placebo in participants with severe uncontrolled asthma with an eosinophilic phenotype on top of existing asthma therapy

Protection of trial subjects:

NA

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	17 March 2021
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Czechia: 34
Country: Number of subjects enrolled	France: 1
Country: Number of subjects enrolled	Germany: 38
Country: Number of subjects enrolled	Ireland: 3
Country: Number of subjects enrolled	Italy: 8
Country: Number of subjects enrolled	Poland: 74
Country: Number of subjects enrolled	Spain: 74
Country: Number of subjects enrolled	United Kingdom: 12
Country: Number of subjects enrolled	United States: 62
Country: Number of subjects enrolled	Canada: 9
Country: Number of subjects enrolled	China: 59
Country: Number of subjects enrolled	Russian Federation: 21
Worldwide total number of subjects	395
EEA total number of subjects	232

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0

Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	8
Adults (18-64 years)	287
From 65 to 84 years	100
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Of 395 participants who were randomized, 382 participants were included in Full analysis set (FAS) population. FAS included all randomized participants who received at least 1 dose of study drug excluding 11 participants from 1 site with GCP violation. Two participants were randomized in error & did not receive any study drug.

Pre-assignment

Screening details:

In this study, out of 622 participants screened, 395 participants were randomized to the study. In total 382 participants received at least one dose of study drug & included in the FAS.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Participants received placebo subcutaneous (SC) injection once every 26 weeks (week 0 and week 26). Participants were to be maintained on their existing baseline maintenance asthma standard of care (SOC) treatment throughout the study.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Matching Placebo once every 26 weeks

Arm title	GSK3511294
------------------	------------

Arm description:

Participants received a 100 milligram (mg) dose of GSK3511294 SC injection once every 26 weeks (week 0 and week 26). Participants were to be maintained on their existing baseline maintenance asthma SOC treatment throughout the study.

Arm type	Experimental
Investigational medicinal product name	GSK3511294
Investigational medicinal product code	
Other name	Depemokimab
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

100 milligram (mg) once every 26 weeks

Number of subjects in period 1^[1]	Placebo	GSK3511294
Started	132	250
Completed	122	237
Not completed	10	13
Consent withdrawn by subject	5	5
Physician decision	-	1
Adverse event, non-fatal	2	-
Pregnancy	1	1
Lost to follow-up	-	2
Lack of efficacy	2	4

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Of 395 participants who were randomized, 11 participants from one of the site were excluded from the full analysis population due to data integrity concerns & GCP violations, and two randomized participants did not receive any study treatment. A total of 382 participants received treatment and were included in the Full analysis set population

Baseline characteristics

Reporting groups

Reporting group title	Placebo
Reporting group description:	
Participants received placebo subcutaneous (SC) injection once every 26 weeks (week 0 and week 26). Participants were to be maintained on their existing baseline maintenance asthma standard of care (SOC) treatment throughout the study.	
Reporting group title	GSK3511294
Reporting group description:	
Participants received a 100 milligram (mg) dose of GSK3511294 SC injection once every 26 weeks (week 0 and week 26). Participants were to be maintained on their existing baseline maintenance asthma SOC treatment throughout the study.

End points

End points reporting groups

Reporting group title	Placebo
Reporting group description: Participants received placebo subcutaneous (SC) injection once every 26 weeks (week 0 and week 26). Participants were to be maintained on their existing baseline maintenance asthma standard of care (SOC) treatment throughout the study.	
Reporting group title	GSK3511294
Reporting group description: Participants received a 100 milligram (mg) dose of GSK3511294 SC injection once every 26 weeks (week 0 and week 26). Participants were to be maintained on their existing baseline maintenance asthma SOC treatment throughout the study.	

Primary: Annualized Rate of Clinically Significant Exacerbations Over 52 Weeks

End point title	Annualized Rate of Clinically Significant Exacerbations Over 52 Weeks
End point description: Clinically significant exacerbations of asthma were defined as worsening of asthma which required use of systemic corticosteroids (CSs) and/or hospitalization and/or Emergency Department (ED) visit. For all participants, IV or oral steroids (e.g., prednisone) for at least 3 days or a single IM CS dose is required. For participants on maintenance systemic CSs, at least double the existing maintenance dose for at least 3 days is required. Exacerbations occurring from the start of randomized study treatment up to the Week 52 visit, including exacerbations reported after early discontinuation from study treatment by participants who remained in the study, were included in the analysis. Annualized rate of exacerbations was analyzed using a generalized linear model assuming a negative binomial distribution. The analysis was performed on the Full Analysis Set population.	
End point type	Primary
End point timeframe: Up to Week 52	

End point values	Placebo	GSK3511294		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	132	249		
Units: Exacerbation per participant per year				
least squares mean (confidence interval 95%)	1.11 (0.86 to 1.43)	0.46 (0.36 to 0.58)		

Statistical analyses

Statistical analysis title	Statistical Analysis 1
Statistical analysis description: To demonstrate the superiority of GSK3511294 100 mg SC + SoC following two doses (at Week 0 and at Week 26) compared with placebo + SoC, assessed by the annualized rate of clinically significant exacerbations measured over the study intervention period of 52 weeks.	
Comparison groups	Placebo v GSK3511294

Number of subjects included in analysis	381
Analysis specification	Pre-specified
Analysis type	superiority ^[1]
P-value	< 0.001
Method	Negative binomial distribution
Parameter estimate	Rate Ratio
Point estimate	0.42
Confidence interval	
level	95 %
sides	2-sided
lower limit	0.3
upper limit	0.59

Notes:

[1] - Analysis performed using a negative binomial model with covariates of treatment, exacerbation history (2, 3, 4+), baseline ICS dose (medium, high), geographical region, baseline percent predicted FEV1, and offset of log (total time in the study in years)

Secondary: Change From Baseline in Asthma Control Questionnaire-5 (ACQ-5) Score at Week 52

End point title	Change From Baseline in Asthma Control Questionnaire-5 (ACQ-5) Score at Week 52
-----------------	---

End point description:

The ACQ-5 is a five-item questionnaire developed as a measure of participants asthma symptom control. The questions are designed to be self-completed by the participant. The 5 questions enquired to recall how their asthma had been during the previous week and to respond about the frequency and/or severity of symptoms (nocturnal awakening on waking in the morning, activity limitation, and shortness of breath, wheeze). The overall ACQ-5 response option is the mean score of all 5 questions representing 0 with no impairment/limitation & 6 as total impairment/ limitation. Higher scores indicated more limitations and lower score with better asthma control. Change from Baseline was defined as value at the indicated time point minus Baseline value. The analysis was performed on the Full Analysis set population.

Secondary: Change From Baseline in St. George's Respiratory Questionnaire (SGRQ) Total Score at Week 52

End point title	Change From Baseline in St. George's Respiratory Questionnaire (SGRQ) Total Score at Week 52
-----------------	--

End point description:

The SGRQ is a 50-item patient-reported outcome tool used to measure Quality of Life in participants with airway obstruction diseases. The questions are designed to be self-completed by the participant. The total score was calculated by the symptom score, activity and impact score; and summarizing the impact of the disease on overall health status. Scores are expressed as a percentage of overall impairment where 100 representing worst possible health status and 0 indicating best possible health status. Higher scores also indicating greater impairment of quality of life. Change from Baseline was defined as value at the indicated time point minus Baseline value. The analysis was performed on the Full Analysis set population.

Secondary: Change From Baseline in Asthma Nighttime Symptom Diary (ANSD) Weekly Mean Score at Week 52

End point title	Change From Baseline in Asthma Nighttime Symptom Diary (ANSD) Weekly Mean Score at Week 52
-----------------	--

End point description:

The ANSD is a 6-item self-administered patient-reported diary developed by the patient related outcomes (PRO) Consortium's Asthma Working Group (in accordance with the Food and Drug Administration's PRO Guidance) to facilitate comprehensive and reliable assessment of asthma symptoms from a participant's perspective. ANSD was to be completed before going to bed and refers to asthma symptoms during the day. Participants were required to score based on 6 patient-reported symptoms as difficulty breathing, wheezing, shortness of breath, chest tightness, chest pain, and cough at their worst during the respective timeframes using an 11-point numeric rating scale (NRS) ranging from 0 (None) to 10 (As bad as you can imagine). Higher scores indicate more severe symptoms. Change from Baseline was defined as value at the indicated time point minus Baseline value. The analysis was performed for participants in the FAS population for whom at least one ADSD/ANSD questionnaire were administered.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Serious adverse events (SAEs), deaths (all causes) and non-serious adverse events (non-SAEs) were collected from the start of the study intervention till follow up week 56.

Adverse event reporting additional description:

SAEs, deaths and non-SAEs were reported for the Safety Population which included all participants who received at least 1 dose of study treatment excluding participants from one study site due to concerns about data integrity and GCP violation.

deaths causally related to treatment / all	0 / 0	0 / 0	

COVID-19			
subjects affected / exposed	0 / 250 (0.00%)	2 / 132 (1.52%)	
occurrences causally related to treatment / all	0 / 0	0 / 2	
deaths causally related to treatment / all	0 / 0	0 / 0	
Bronchopulmonary aspergillosis			
subjects affected / exposed	0 / 250 (0.00%)	1 / 132 (0.76%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Pneumonia			
subjects affected / exposed	1 / 250 (0.40%)	3 / 132 (2.27%)	
occurrences causally related to treatment / all	0 / 1	0 / 3	
deaths causally related to treatment / all	0 / 0	0 / 0	
Metabolism and nutrition disorders			
Hypoglycaemia			
subjects affected / exposed	1 / 250 (0.40%)	0 / 132 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	

Frequency threshold for reporting non-serious adverse events: 3 %

Non-serious adverse events	GSK3511294	Placebo	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	145 / 250 (58.00%)	78 / 132 (59.09%)	
Vascular disorders			
Hypertension			
subjects affected / exposed	9 / 250 (3.60%)	7 / 132 (5.30%)	
occurrences (all)	10	7	
Nervous system disorders			
Headache			
subjects affected / exposed	12 / 250 (4.80%)	10 / 132 (7.58%)	
occurrences (all)	17	13	
Gastrointestinal disorders			
Gastrooesophageal reflux disease			
subjects affected / exposed	2 / 250 (0.80%)	4 / 132 (3.03%)	
occurrences (all)	3	4	
Respiratory, thoracic and mediastinal disorders			

Cough subjects affected / exposed occurrences (all)	9 / 250 (3.60%) 23	6 / 132 (4.55%) 7	
Rhinitis allergic subjects affected / exposed occurrences (all)	11 / 250 (4.40%) 15	4 / 132 (3.03%) 4	
Musculoskeletal and connective tissue disorders Back pain subjects affected / exposed occurrences (all)	6 / 250 (2.40%) 6	7 / 132 (5.30%) 11	
Infections and infestations Bronchitis subjects affected / exposed occurrences (all)	12 / 250 (4.80%) 18	5 / 132 (3.79%) 5	
COVID-19 subjects affected / exposed occurrences (all)	51 / 250 (20.40%) 51	27 / 132 (20.45%) 30	
Nasopharyngitis subjects affected / exposed occurrences (all)	29 / 250 (11.60%) 37	25 / 132 (18.94%) 32	
Pharyngitis subjects affected / exposed occurrences (all)	8 / 250 (3.20%) 8	2 / 132 (1.52%) 2	
Lower respiratory tract infection subjects affected / exposed occurrences (all)	10 / 250 (4.00%) 10	5 / 132 (3.79%) 7	
Laryngitis subjects affected / exposed occurrences (all)	9 / 250 (3.60%) 9	4 / 132 (3.03%) 4	
Influenza subjects affected / exposed occurrences (all)	19 / 250 (7.60%) 21	2 / 132 (1.52%) 2	
Respiratory tract infection subjects affected / exposed occurrences (all)	8 / 250 (3.20%) 9	6 / 132 (4.55%) 11	
Upper respiratory tract infection			

subjects affected / exposed	25 / 250 (10.00%)	14 / 132 (10.61%)	
occurrences (all)	39	22	
Sinusitis			
subjects affected / exposed	11 / 250 (4.40%)	6 / 132 (4.55%)	
occurrences (all)	14	6	
Rhinitis			
subjects affected / exposed	15 / 250 (6.00%)	10 / 132 (7.58%)	
occurrences (all)	17	16	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
17 August 2021	Amendment 1
08 April 2022	Amendment 2

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
