

Clinical trial results:

Phase II/III study for evaluation of the diagnostic performance of [18F] CTT1057 PET imaging for the detection of PSMA positive tumors using histopathology as a standard of truth (GuideView)

Summary

EudraCT number	2020-003958-67
Trial protocol	FR ES IT
Global end of trial date	24 November 2023

Results information

Result version number	v1
This version publication date	09 November 2024
First version publication date	09 November 2024

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	24 November 2023
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	24 November 2023
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objectives were:

- Evaluate the patient-level sensitivity of vidoflufolastat (18F)
- Evaluate the region-level specificity of vidoflufolastat (18F)

Due to EudraCT system limitations, which EMA is aware of, data using 999 as data points in this record are not an accurate representation of the clinical trial results. Please use <https://www.novctrd.com> for complete trial results.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	07 September 2021
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	France: 45
Country: Number of subjects enrolled	Italy: 54
Country: Number of subjects enrolled	Spain: 80
Country: Number of subjects enrolled	Switzerland: 12
Country: Number of subjects enrolled	United States: 4
Worldwide total number of subjects	195
EEA total number of subjects	179

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0

Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	92
From 65 to 84 years	103
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

195 patients were enrolled. 184 participants received vidoflufolastat (18F) and 184 underwent PET/CT. 173 patients completed the study and 184 patients completed treatment.

Pre-assignment

Screening details:

A total of 195 participants were enrolled. 184 participants completed the study treatment phase (PET imaging completed)

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	PET/CT imaging with vidoflufolastat (18F).
-----------	--

Arm description:

Single intravenous dose of approximately 370 Mega-Becquerel (MBq) on Day 1 and subsequent PET/CT scan

Arm type	Experimental
Investigational medicinal product name	vidoflufolastat (18F)
Investigational medicinal product code	AAA405
Other name	[18F]CTT1057
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

Single intravenous dose of approximately 370 Mega-Becquerel (MBq) on Day 1 and subsequent PET/CT scan

Number of subjects in period 1	PET/CT imaging with vidoflufolastat (18F).
Started	195
Completed	173
Not completed	22
Consent withdrawn by subject	9
Physician decision	6
Adverse event, non-fatal	2
Technical Problems	2
Protocol deviation	3

Baseline characteristics

Primary: Patient-level sensitivity of vidoflufolastat (18F) - % Sensitivity

End point title	Patient-level sensitivity of vidoflufolastat (18F) - %
-----------------	--

End point description:

Sensitivity of vidoflufolastat (18F) Positron Emission Tomography (PET) imaging, considering Prostate Specific Membrane Antigen (PSMA) positive patients as those who show at least one pathological vidoflufolastat (18F) uptake either in the primary tumor and/or metastatic Pelvic Lymph Node (PLN) regions, with anatomically localized correspondence with the Standard of Truth (SoT).

End point type	Primary
----------------	---------

End point timeframe:

vidoflufolastat (18F) PET imaging acquired at Day 1 assessed against histopathology as Standard of Truth (SoT) obtained during surgery within 6 weeks from vidoflufolastat (18F) scan

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Not applicable for a single treatment arm study.

End point values	Central Reader 1	Central Reader 2	Central Reader 3	
Subject group type	Subject analysis set	Subject analysis set	Subject analysis set	
Number of subjects analysed	172	172	172	
Units: % Sensitivity				
number (confidence interval 95%)	88.8 (83.00 to 93.09)	88.2 (82.32 to 92.62)	86.8 (80.74 to 91.56)	

Statistical analyses

No statistical analyses for this end point

Primary: Region-level specificity of vidoflufolastat (18F) - % Specificity

End point title	Region-level specificity of vidoflufolastat (18F) - % Specificity ^[2]
-----------------	--

End point description:

Specificity of vidoflufolastat (18F) PET imaging, defined as proportion of PLN regions that test negative for lymph nodes on vidoflufolastat (18F) among those that are lymph node negative on the SoT.

End point type	Primary
----------------	---------

End point timeframe:

vidoflufolastat (18F) PET imaging acquired at Day 1 assessed against histopathology as Standard of Truth (SoT) obtained during surgery within 6 weeks from vidoflufolastat (18F) scan

Notes:

[2] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Not applicable for a single treatment arm study.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse Events are reported from the single dose of study treatment administration until 14 days afterwards, for a maximum time frame of approx. 14 days.

Assessment type	Systematic
-----------------	------------

Dictionary used

Dictionary name	MedDRA
-----------------	--------

Dictionary version	26.1

Reporting groups

Reporting group title	All Subjects
-----------------------	--------------

Reporting group description:

All Subjects

Serious adverse events	All Subjects		
Total subjects affected by serious adverse events			
subjects affected / exposed	2 / 184 (1.09%)		
number of deaths (all causes)	0		
number of deaths resulting from adverse events	0		
Cardiac disorders			
Myocardial ischaemia			
subjects affected / exposed	1 / 184 (0.54%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Infections and infestations			
Sepsis syndrome			
subjects affected / exposed	1 / 184 (0.54%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		

Frequency threshold for reporting non-serious adverse events: 0 %

Non-serious adverse events	All Subjects		
Total subjects affected by non-serious adverse events			
subjects affected / exposed	23 / 184 (12.50%)		
Investigations			

<p>Blood creatine phosphokinase increased</p> <p>subjects affected / exposed</p> <p>occurrences (all)</p>	<p>1 / 184 (0.54%)</p> <p>1</p>		
<p>Amylase increased</p> <p>subjects affected / exposed</p> <p>occurrences (all)</p>	<p>1 / 184 (0.54%)</p> <p>1</p>		
<p>Vascular disorders</p> <p>Hot flush</p> <p>subjects affected / exposed</p> <p>occurrences (all)</p> <p>Hypertension</p> <p>subjects affected / exposed</p> <p>occurrences (all)</p>	<p>1 / 184 (0.54%)</p> <p>1</p> <p>5 / 184 (2.72%)</p> <p>5</p>		
<p>Nervous system disorders</p> <p>Presyncope</p> <p>subjects affected / exposed</p> <p>occurrences (all)</p> <p>Neuropathy peripheral</p> <p>subjects affected / exposed</p> <p>occurrences (all)</p> <p>Headache</p> <p>subjects affected / exposed</p> <p>occurrences (all)</p> <p>Dizziness</p> <p>subjects affected / exposed</p> <p>occurrences (all)</p>	<p>2 / 184 (1.09%)</p> <p>2</p> <p>1 / 184 (0.54%)</p> <p>1</p> <p>1 / 184 (0.54%)</p> <p>1</p> <p>2 / 184 (1.09%)</p> <p>2</p>		
<p>General disorders and administration site conditions</p> <p>Asthenia</p> <p>subjects affected / exposed</p> <p>occurrences (all)</p> <p>Feeling hot</p> <p>subjects affected / exposed</p> <p>occurrences (all)</p> <p>Pyrexia</p> <p>subjects affected / exposed</p> <p>occurrences (all)</p>	<p>1 / 184 (0.54%)</p> <p>1</p> <p>1 / 184 (0.54%)</p> <p>1</p> <p>1 / 184 (0.54%)</p> <p>1</p>		

Gastrointestinal disorders Abdominal pain subjects affected / exposed occurrences (all) Diarrhoea subjects affected / exposed occurrences (all)	 1 / 184 (0.54%) 1 1 / 184 (0.54%) 1		
Reproductive system and breast disorders Scrotal oedema subjects affected / exposed occurrences (all)	 1 / 184 (0.54%) 1		
Respiratory, thoracic and mediastinal disorders Cough subjects affected / exposed occurrences (all)	 1 / 184 (0.54%) 1		
Skin and subcutaneous tissue disorders Skin discolouration subjects affected / exposed occurrences (all) Pruritus subjects affected / exposed occurrences (all)	 1 / 184 (0.54%) 1 1 / 184 (0.54%) 1		
Renal and urinary disorders Urinary incontinence subjects affected / exposed occurrences (all)	 1 / 184 (0.54%) 1		
Psychiatric disorders Insomnia subjects affected / exposed occurrences (all)	 1 / 184 (0.54%) 1		
Infections and infestations Oral herpes subjects affected / exposed occurrences (all) COVID-19 subjects affected / exposed occurrences (all)	 1 / 184 (0.54%) 1 1 / 184 (0.54%) 1		

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
20 December 2021	The main purpose of the amendment was to update the inclusion criterion on the definition of high-risk prostate cancer per D'Amico classification to also include participants with clinical stage T2c or higher at initial diagnosis (instead of T2c only) as they were also considered high-risk per D'Amico classification. Other clarifications and corrections of discrepancies or errors were implemented across the protocol.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Due to EudraCT system limitations, which EMA is aware of, data using 999 as data points in this record are not an accurate representation of the clinical trial results. Please use <https://www.novctrd.com> for complete trial results.

Notes:
