Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	10 June 2022
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	10 June 2022
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Primary Efficacy Objectives:

- To demonstrate the efficacy of a 2-dose schedule of CVnCoV in the prevention of first episodes of virologically-confirmed cases of COVID-19 of any severity in Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2) naïve participants.

Primary Safety Objectives

- To evaluate the safety of CVnCoV administered as a 2-dose schedule to participants 18 years of age and older.
- To evaluate the reactogenicity of CVnCoV administered as a 2-dose schedule to participants 18 years of age and older participating in Phase 2b of the trial.

Protection of trial subjects:

This trial was conducted in compliance with Good Clinical Practice (GCP), including the archiving of essential documents.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	11 December 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Peru: 7452
Country: Number of subjects enrolled	Argentina: 6762
Country: Number of subjects enrolled	Mexico: 6293
Country: Number of subjects enrolled	Colombia: 4356
Country: Number of subjects enrolled	Panama: 3005
Country: Number of subjects enrolled	Dominican Republic: 1767
Country: Number of subjects enrolled	Spain: 2917
Country: Number of subjects enrolled	Germany: 2811
Country: Number of subjects enrolled	Netherlands: 2160
Country: Number of subjects enrolled	Belgium: 2157
Worldwide total number of subjects	39680
EEA total number of subjects	10045

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	36740
From 65 to 84 years	2906
85 years and over	34

Subject disposition

Recruitment

Recruitment details:

This trial was performed in Argentina, Belgium, Colombia, the Dominican Republic, Germany, Mexico, the Netherlands, Panama, Peru and Spain between 11 December 2020 and 10 June 2022.

Pre-assignment

Screening details:

Of the 39680 participants who were randomized, 39540 participants received at least one dose vaccine.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Blinding implementation details:

The trial was converted to an open-label design as of protocol amendment v4 (25 November 2021).

Arms

Are arms mutually exclusive?	Yes
Arm title	CVnCoV 12 µg Vaccine

Arm description:

Participants in the Phase 2b and Phase 3 periods were vaccinated with CVnCoV 12 µg as an intramuscular injection by needle in the deltoid area, preferably in the non-dominant arm, on Day 1 and Day 29.

Arm type	Experimental
Investigational medicinal product name	CVnCoV
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intramuscular use

Dosage and administration details:

CVnCoV 12 µg administered as an intramuscular injection.

Arm title	Placebo
------------------	---------

Arm description:

Participants in the Phase 2b and Phase 3 periods were vaccinated with matching placebo as an intramuscular injection by needle in the deltoid area, preferably in the non-dominant arm, on Day 1 and Day 29.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intramuscular use

Dosage and administration details:

Matching placebo administered as an intramuscular injection.

Number of subjects in period 1 ^[1]	CVnCoV 12 µg Vaccine	Placebo
Started	19787	19753
Phase 2b Participants	2007 ^[2]	1987 ^[3]
Phase 3 Participants	17780	17766
Rolled Over to Open Label Phase	8513 ^[4]	0 ^[5]
Completed	11451	4161
Not completed	8336	15592
Physician decision	78	40
Consent withdrawn by subject	4625	5594
Adverse event, non-fatal	14	13
Miscellaneous	80	64
Protocol Specified Withdrawal Criterion Met	49	2230
Participant Received Alternate Authorised Vaccine	1407	6552
Study Terminated by Sponsor	64	17
Lost to follow-up	2019	1082

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: The number of participants in the baseline period included only participants randomized into Phase 2b or 3 who received at least one dose of CVnCoV or placebo.

[2] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: The milestones include Phase 2b and Phase 3 participants as well as participants who rolled over to the Open Label Phase.

[3] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: The milestones include Phase 2b and Phase 3 participants as well as participants who rolled over to the Open Label Phase.

[4] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: The milestones include Phase 2b and Phase 3 participants as well as participants who rolled over to the Open Label Phase.

[5] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: The milestones include Phase 2b and Phase 3 participants as well as participants who rolled over to the Open Label Phase.

Statistical analyses

Statistical analysis title	CVnCoV 12 µg Vaccine Versus Placebo
----------------------------	-------------------------------------

Statistical analysis description:

Proportion of cases coming from the CVnCoV group among all cases.

Comparison groups	Placebo v CVnCoV 12 µg Vaccine
Number of subjects included in analysis	25062
Analysis specification	Pre-specified
Analysis type	superiority ^[1]
Parameter estimate	Proportion
Point estimate	0.364
Confidence interval	
level	95.83 %
sides	2-sided
lower limit	0.299
upper limit	0.433

Notes:

[1] - Derived from an exact 2-sided 95.826% Pearson-Clopper confidence interval (CI) on proportion of cases coming from the CVnCoV group among all cases.

Statistical analysis title	CVnCoV 12 µg Vaccine Versus Placebo
-----------------------------------	-------------------------------------

Statistical analysis description:

Vaccine efficacy (VE) calculated as $VE = 1 - p/(1-p) * 1/r$ where p represents the proportion of cases coming from the CVnCoV group among all cases and r represents the ratio of total follow-up time of subjects in the CVnCoV group over the total follow-up time of participants in the placebo group.

Comparison groups	CVnCoV 12 µg Vaccine v Placebo
Number of subjects included in analysis	25062
Analysis specification	Pre-specified
Analysis type	superiority ^[2]
P-value	= 0.016 ^[3]
Method	Exact Binomial Test
Parameter estimate	Vaccine Efficacy
Point estimate	48.2
Confidence interval	
level	95.83 %
sides	2-sided
lower limit	31
upper limit	61.4

Notes:

[2] - 2-sided 95.826% CI on VE, derived from the exact 2-sided 95.826% Pearson-Clopper CI on proportion of cases coming from the CVnCoV group among all cases.

[3] - 1-sided p-value from the exact binomial test on proportion of cases coming from the CVnCoV group among all cases (equivalent to a test on VE with H0: VE ≤ 30%). Statistically significant if lower than 0.02087.

Primary: Number of Participants Who Experienced One or More Medically-attended Adverse Events (AE)

End point title	Number of Participants Who Experienced One or More Medically-attended Adverse Events (AE) ^[4]
-----------------	--

End point description:

Medically-attended AEs were defined as AEs with medically-attended visits that were not routine visits for physical examination or vaccination, such as visits for hospitalization, an emergency room visit, or an otherwise unscheduled visit to or from medical personnel (medical doctor) for any reason. Clinic visits for COVID-19 testing resulting in negative test results were not considered as medically attended visits, if there is no confirmed diagnosis and no prescribed concomitant medication.

The Investigator assessed the relationship between trial vaccine and occurrence of each AE.

The analysis set used was the safety analysis set (SAS). Participants were censored at the first day after unblinding or at the day after receiving the authorized/licensed vaccine, whichever was earlier.

End point type	Primary
End point timeframe:

Primary: Number of Participants Who Experienced One or More Serious AE (SAE)

End point title	Number of Participants Who Experienced One or More Serious AE (SAE) ^[5]
-----------------	--

End point description:

An SAE was defined as any untoward medical occurrence that, at any dose:

- Resulted in death.
- Was life-threatening.
- Required inpatient hospitalization or prolongation of existing hospitalization.
- Resulted in persistent disability/incapacity.
- Was a congenital anomaly/birth defect in the offspring of the participant.
- Was an important medical event.

The Investigator assessed the relationship between trial vaccine and occurrence of each SAE.

The analysis set used was the SAS. Participants were censored at the first day after unblinding or at the day after receiving the authorized/licensed vaccine, whichever was earlier.

End point type	Primary
End point timeframe:	
Day 1 to Day 393	
Notes:

Secondary: Phase 2b Participants Only: Duration of Solicited AEs

End point title	Phase 2b Participants Only: Duration of Solicited AEs
-----------------	---

End point description:

Solicited local AEs (injection site pain, redness, swelling, and itching) and solicited systemic AEs (fever, headache, fatigue, chills, myalgia, arthralgia, nausea/vomiting, and diarrhea) were recorded on the day of vaccination and the following 7 days using an eDiary. Duration is calculated as consecutive days with a respective solicited AE regardless of the grade of the AE. AEs ongoing after Day 8 are included. In each case only the longest consecutive duration is displayed.

Solicited local AEs (CVnCoV 12 µg Vaccine, Placebo):

- Injection site pain N = 1674, 417
- Redness N = 89, 25
- Swelling N = 149, 17
- Itching N = 141, 93

Solicited systemic AEs (CVnCoV 12 µg Vaccine, Placebo):

- Fever N = 617, 13
- Headache N = 1541, 806
- Fatigue N = 1603, 845
- Chills N = 1011, 162
- Myalgia N = 1327, 378

Secondary: Number of Participants Who Experienced a First Episode of Virologically-confirmed (RT-PCR Positive) Moderate to Severe Case of COVID-19

End point title	Number of Participants Who Experienced a First Episode of Virologically-confirmed (RT-PCR Positive) Moderate to Severe Case of COVID-19
-----------------	---

End point description:

Moderate COVID-19 cases were defined by any one of the following:

- Shortness of breath or difficulty breathing.
- Respiratory rate ≥ 20 to < 30 breaths per minute.
- Abnormal SpO2 but still $> 93\%$ on room air at sea level.
- Clinical or radiographic evidence of lower respiratory tract disease.
- Radiologic evidence of deep vein thrombosis (DVT).

Severe COVID-19 cases were defined by any one of the following:

- Clinical signs at rest indicative of severe systemic illness (respiratory rate ≥ 30 breaths per minute, heart rate ≥ 125 per minute, SpO2 $\leq 93\%$ on room air at sea level or PaO2/FiO2 < 300 mm Hg).
- Respiratory failure (defined as needing high flow-oxygen, noninvasive ventilation, mechanical ventilation or ECMO).
- Evidence of shock (SBP < 90 mm Hg, DBP < 60 mmHg, or requiring vasopressors).
- Significant renal, hepatic, or neurologic dysfunction
- Admission to intensive care unit (ICU).
- Death.

The analysis set used was the EAS.

-----------------	--

End point description:

The characterization of SARS-CoV-2 variants were implemented by viral whole genome sequencing of nasopharyngeal swab samples of participants followed by comparison with previously sequenced and typed genomes.

The following phylogenetic clustering was applied:

1. "Wild type" virus: WT/D614G, lineages A.1/B.1 without the variant of concerns (VOCs) (i.e., without B.1.1.7 [Alpha], B.1.351 [Beta], B.1.429 [Epsilon]).
2. "UK" VOC: B.1.1.7 (Alpha).

A case of COVID-19 was defined as follows:

- Virologically-confirmed case of COVID-19 defined as a positive SARS-CoV-2 specific RT-PCR test in a person with clinically symptomatic COVID-19.
- Symptom onset \geq 15 days after second vaccination.
- First episode of virologically-confirmed COVID-19.
- Participant was SARS-CoV-2 naïve at baseline and Day 43.

--------------------	------

Reporting groups

Reporting group title	Placebo
-----------------------	---------

Reporting group description:

Participants in the Phase 2b and Phase 3 periods were vaccinated with matching placebo as an intramuscular injection by needle in the deltoid area, preferably in the non-dominant arm, on Day 1 and Day 29.

Reporting group title	CVnCoV 12 µg Vaccine
-----------------------	----------------------

Reporting group description:

Participants in the Phase 2b and Phase 3 periods were vaccinated with CVnCoV 12 µg as an intramuscular injection by needle in the deltoid area, preferably in the non-dominant arm, on Day 1 and Day 29.

Serious adverse events	Placebo	CVnCoV 12 µg Vaccine	
Total subjects affected by serious adverse events			
subjects affected / exposed	54 / 19753 (0.27%)	71 / 19787 (0.36%)	
number of deaths (all causes)	14	17	
number of deaths resulting from adverse events	8	6	
Neoplasms benign, malignant and unspecified (incl cysts and polyps)			
Basal cell carcinoma	Additional description: Basal cell carcinoma		
subjects affected / exposed	0 / 19753 (0.00%)	3 / 19787 (0.02%)	
occurrences causally related to treatment / all	0 / 0	0 / 3	
deaths causally related to treatment / all	0 / 0	0 / 0	
Breast cancer	Additional description: Breast cancer		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Cervix carcinoma stage 0	Additional description: Cervix carcinoma stage 0		

subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Clear cell renal cell carcinoma	Additional description: Clear cell renal cell carcinoma		
subjects affected / exposed	1 / 19753 (0.01%)	0 / 19787 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Glioblastoma	Additional description: Glioblastoma		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Metastatic malignant melanoma	Additional description: Metastatic malignant melanoma		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Papillary thyroid cancer	Additional description: Papillary thyroid cancer		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Phaeochromocytoma	Additional description: Phaeochromocytoma		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Prostate cancer	Additional description: Prostate cancer		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Squamous cell carcinoma	Additional description: Squamous cell carcinoma		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
T-cell lymphoma	Additional description: T-cell lymphoma		

subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Thyroid adenoma	Additional description: Thyroid adenoma		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Vascular disorders			
Deep vein thrombosis	Additional description: Deep vein thrombosis		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	1 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Superficial vein thrombosis	Additional description: Superficial vein thrombosis		
subjects affected / exposed	1 / 19753 (0.01%)	0 / 19787 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Venous thrombosis limb	Additional description: Venous thrombosis limb		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	1 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Pregnancy, puerperium and perinatal conditions			
Pregnancy on oral contraceptive	Additional description: Pregnancy on oral contraceptive		
subjects affected / exposed	0 / 19753 (0.00%)	2 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 2	
deaths causally related to treatment / all	0 / 0	0 / 0	
Pregnancy with injectable contraceptive	Additional description: Pregnancy with injectable contraceptive		
subjects affected / exposed	1 / 19753 (0.01%)	0 / 19787 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
General disorders and administration site conditions			
Chest pain	Additional description: Chest pain		

subjects affected / exposed	1 / 19753 (0.01%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 1	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Non-cardiac chest pain	Additional description: Non-cardiac chest pain		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Immune system disorders			
Hypersensitivity	Additional description: Hypersensitivity		
subjects affected / exposed	1 / 19753 (0.01%)	0 / 19787 (0.00%)	
occurrences causally related to treatment / all	1 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Reproductive system and breast disorders			
Fallopian tube cyst	Additional description: Fallopian tube cyst		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Hydrosalpinx	Additional description: Hydrosalpinx		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Respiratory, thoracic and mediastinal disorders			
Acute pulmonary oedema	Additional description: Acute pulmonary oedema		
subjects affected / exposed	1 / 19753 (0.01%)	0 / 19787 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 1	0 / 0	
Atelectasis	Additional description: Atelectasis		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Pleural effusion	Additional description: Pleural effusion		

subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Pulmonary embolism	Additional description: Pulmonary embolism		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	1 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Respiratory failure	Additional description: Respiratory failure		
subjects affected / exposed	1 / 19753 (0.01%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 1	0 / 1	
deaths causally related to treatment / all	0 / 1	0 / 1	
Psychiatric disorders			
Attention deficit hyperactivity disorder	Additional description: Attention deficit hyperactivity disorder		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Depression	Additional description: Depression		
subjects affected / exposed	3 / 19753 (0.02%)	0 / 19787 (0.00%)	
occurrences causally related to treatment / all	0 / 3	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Major depression	Additional description: Major depression		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Mixed anxiety and depressive disorder	Additional description: Mixed anxiety and depressive disorder		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Suicidal ideation	Additional description: Suicidal ideation		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Investigations			

HIV test positive	Additional description: HIV test positive		
subjects affected / exposed	1 / 19753 (0.01%)	0 / 19787 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Injury, poisoning and procedural complications			
Accident	Additional description: Accident		
subjects affected / exposed	1 / 19753 (0.01%)	0 / 19787 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 1	0 / 0	
Ankle fracture	Additional description: Ankle fracture		
subjects affected / exposed	1 / 19753 (0.01%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 1	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Cartilage injury	Additional description: Cartilage injury		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Chest injury	Additional description: Chest injury		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Clavicle fracture	Additional description: Clavicle fracture		
subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Craniocerebral injury	Additional description: Craniocerebral injury		
subjects affected / exposed	1 / 19753 (0.01%)	0 / 19787 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Epicondylitis	Additional description: Epicondylitis		
subjects affected / exposed	1 / 19753 (0.01%)	0 / 19787 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	

Fibula fracture	Additional description: Fibula fracture		
	subjects affected / exposed	1 / 19753 (0.01%)	0 / 19787 (0.00%)
	occurrences causally related to treatment / all	0 / 1	0 / 0
	deaths causally related to treatment / all	0 / 0	0 / 0
Hand fracture	Additional description: Hand fracture		
	subjects affected / exposed	1 / 19753 (0.01%)	0 / 19787 (0.00%)
	occurrences causally related to treatment / all	0 / 1	0 / 0
	deaths causally related to treatment / all	0 / 0	0 / 0
Humerus fracture	Additional description: Humerus fracture		
	subjects affected / exposed	1 / 19753 (0.01%)	0 / 19787 (0.00%)
	occurrences causally related to treatment / all	0 / 1	0 / 0
	deaths causally related to treatment / all	0 / 0	0 / 0
Joint dislocation	Additional description: Joint dislocation		
	subjects affected / exposed	1 / 19753 (0.01%)	0 / 19787 (0.00%)
	occurrences causally related to treatment / all	0 / 1	0 / 0
	deaths causally related to treatment / all	0 / 0	0 / 0
Ligament rupture	Additional description: Ligament rupture		
	subjects affected / exposed	0 / 19753 (0.00%)	1 / 19787 (0.01%)
	occurrences causally related to treatment / all	0 / 0	0 / 1

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
17 February 2021	<p>The following changes were made:</p> <ul style="list-style-type: none">• The planned extension study was removed from the protocol for this trial and was submitted as a separate protocol.• Several COVID-19 vaccines have been authorized for emergency use since the original protocol and guidance was added on the handling of participant participation and data from participants who request to be unblinded due to being eligible to receive an authorized/licensed vaccine to prevent COVID-19.• The secondary safety objective was reclassified as a primary objective.• Instructions added that gene sequencing should be performed in participants with a positive RT PCR test to identify mutations in the S protein.• Samples for CMI and genomic biomarkers could also be taken in Phase 3 and not only in the Phase 2b immunogenicity subset.• It was clarified throughout the protocol that:<ul style="list-style-type: none">- COVID-19 is not to be reported as an AE.- Different types of AEs, and any concomitant medication used for the treatment therefore, should only be collected during the specified reporting periods.- Participants may receive the second dose if they develop COVID 19 between the first and second doses (after being symptom-free for 2 weeks).
29 March 2021	<p>The following changes were made:</p> <ul style="list-style-type: none">• The co-primary objective (and corresponding endpoint) regarding the efficacy of CVnCoV in the prevention of moderate to severe COVID 19 was changed to a key secondary objective. Subsequently, the corresponding statistical calculations were also updated.• Various strains have been identified since the original protocol and therefore a key secondary efficacy objective was added to demonstrate the efficacy of CVnCoV in the prevention of COVID 19 caused by the "wild type" (ie, WT/D614G lineages A.1/B.1 without VOC B.1.1.7, B.1.351, B.1.429) and "UK" (B.1.1.7) strains. An exploratory objective was added to demonstrate the efficacy on any other strains was also added.• The number of participants with exploratory immunogenicity assessment decreased from 400 to 200.
25 November 2021	<p>The following changes were made:</p> <ul style="list-style-type: none">• To unblind all remaining blinded participants and inform them of the treatment received.• To monitor safety of the following participants remaining in the open-label phase after unblinding:<ul style="list-style-type: none">- Participants who had received CVnCoV and received/would receive an AV through their national vaccination program.- Participants who had received CVnCoV and continued follow-up in the trial as initially planned, without receiving an AV.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
