Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	26 June 2024
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	26 June 2024
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

To compare the efficacy of abemaciclib plus physician's choice ET versus placebo plus physician's choice ET in the study population.

Protection of trial subjects:

This study was conducted in accordance with International Conference on Harmonization (ICH) Good Clinical Practice, and the principles of the Declaration of Helsinki, in addition to following the laws and regulations of the country or countries in which a study is conducted.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	10 May 2021
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 8
Country: Number of subjects enrolled	Austria: 1
Country: Number of subjects enrolled	Belgium: 4
Country: Number of subjects enrolled	France: 2
Country: Number of subjects enrolled	Germany: 3
Country: Number of subjects enrolled	Greece: 8
Country: Number of subjects enrolled	Hungary: 1
Country: Number of subjects enrolled	Italy: 2
Country: Number of subjects enrolled	Argentina: 9
Country: Number of subjects enrolled	Australia: 2
Country: Number of subjects enrolled	Brazil: 6
Country: Number of subjects enrolled	China: 27
Country: Number of subjects enrolled	Israel: 1
Country: Number of subjects enrolled	Japan: 10
Country: Number of subjects enrolled	Mexico: 2
Country: Number of subjects enrolled	Korea, Republic of: 6
Country: Number of subjects enrolled	Switzerland: 2
Country: Number of subjects enrolled	Taiwan: 4
Country: Number of subjects enrolled	United Kingdom: 5

Country: Number of subjects enrolled	United States: 8
Worldwide total number of subjects	111
EEA total number of subjects	29

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	98
From 65 to 84 years	13
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

The study was terminated early due to inability to enroll study participants. Data was not collected after termination and outcome measures were not assessed.

Pre-assignment

Screening details:

Completers were defined as participants who received abemaciclib and were allowed to stay on treatment in the study. Participants receiving placebo discontinued after the study was terminated.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	150 mg Abemaciclib + Endocrine Therapy (ET)

Arm description:

Participants received 150 milligrams (mg) of abemaciclib administered twice daily (BID) orally along with standard adjuvant endocrine therapy (ET).

Arm type	Experimental
Investigational medicinal product name	Abemaciclib
Investigational medicinal product code	
Other name	LY2835219
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Administered orally.

Arm title	Placebo + ET
------------------	--------------

Arm description:

Participants received placebo administered BID orally along with standard adjuvant ET.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Administered orally.

Number of subjects in period 1	150 mg Abemaciclib + Endocrine Therapy (ET)	Placebo + ET
Started	55	56
Received At Least One Dose of Study Drug	55	56
Completed	25	0
Not completed	30	56
Consent withdrawn by subject	11	3
Physician decision	2	1
Disease Relapse	1	-
Adverse event, non-fatal	3	1
Non-compliance With Study Drug	2	-
Study Terminated by IRB/ERB	-	2
Study Terminated by Sponsor	10	48
Protocol deviation	1	1

End points

End points reporting groups

Reporting group title	150 mg Abemaciclib + Endocrine Therapy (ET)
Reporting group description:	
Participants received 150 milligrams (mg) of abemaciclib administered twice daily (BID) orally along with standard adjuvant endocrine therapy (ET).	
Reporting group title	Placebo + ET
Reporting group description:	
Participants received placebo administered BID orally along with standard adjuvant ET.	

Primary: Invasive Disease Free Survival (IDFS)

End point title	Invasive Disease Free Survival (IDFS) ^[1]
End point description:	
IDFS, as defined by the STEEP System, is measured from the date of randomization to the date of first occurrence of one of the following events: ipsilateral invasive breast tumor recurrence, regional invasive breast cancer recurrence, distant recurrence, contralateral invasive breast cancer, second primary non-breast invasive cancer, death attributable to any cause. Study was terminated early. Data was not collected for this outcome and outcome measures were not assessed.	
End point type	Primary
End point timeframe:	
Randomization to Recurrence or Death from Any Cause (up to 890 days)	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Study was terminated early. Data was not collected after termination and outcome measures were not assessed.

End point values	150 mg Abemaciclib + Endocrine Therapy (ET)	Placebo + ET		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	0 ^[2]	0 ^[3]		
Units: Months				
arithmetic mean (standard deviation)	()	()		

Notes:

[2] - Study was terminated early, and no outcome measures were assessed.

[3] - Study was terminated early, and no outcome measures were assessed.

Statistical analyses

No statistical analyses for this end point

Secondary: Overall Survival (OS)

End point title	Overall Survival (OS)
End point description:	
OS is defined as the time from randomization until death from any cause. Study was terminated early. Data was not collected for this outcome and outcome measures were not assessed.	
End point type	Secondary
End point timeframe:	
Randomization to Death from Any Cause (up to 890 days)	

End point values	150 mg Abemaciclib + Endocrine Therapy (ET)	Placebo + ET		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	0 ^[4]	0 ^[5]		
Units: Months				
arithmetic mean (standard deviation)	()	()		

Notes:

[4] - Study was terminated early, and no outcome measures were assessed.

[5] - Study was terminated early, and no outcome measures were assessed.

Statistical analyses

No statistical analyses for this end point

Secondary: Distant Relapse-Free Survival (DRFS)

End point title	Distant Relapse-Free Survival (DRFS)
-----------------	--------------------------------------

End point description:

DRFS is defined as the time from randomization to distant recurrence or death from any cause, whichever occurs first.

Study was terminated early. Data was not collected for this outcome and outcome measures were not assessed.

End point type	Secondary
----------------	-----------

End point timeframe:

Randomization to Distant Recurrence or Death from Any Cause (up to 890 days)

number (not applicable)				

Notes:

[8] - Study was terminated early, and no outcome measures were assessed.

[9] - Study was terminated early, and no outcome measures were assessed.

Statistical analyses

No statistical analyses for this end point

Secondary: Change From Baseline in the European Organization for Research and Treatment of Cancer Quality of Life Questionnaire Core 30 (EORTC QLQ-C30) Scale Score

End point title	Change From Baseline in the European Organization for Research and Treatment of Cancer Quality of Life Questionnaire Core 30 (EORTC QLQ-C30) Scale Score
-----------------	--

End point description:

The EORTC QLQ-C30 (v. 3.0) is a self-administered, cancer-specific questionnaire with multidimensional scales assessing 15 domains (5 functional domains, 9 symptoms, and global health status). A linear transformation will be applied to standardize the raw scores to range between 0 and 100 per developer guidelines. For the functional domains and global health status scale, higher scores represent a better level of functioning. For symptom scales, higher scores represent a greater degree of symptoms. Study was terminated early. Data was not collected for this outcome and outcome measures were not assessed.

End point type	Secondary
----------------	-----------

End point timeframe:

Cycle 1 up to 390 days

End point values	150 mg Abemaciclib + Endocrine Therapy (ET)	Placebo + ET		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	0 ^[10]	0 ^[11]		
Units: Score on a scale				
arithmetic mean (standard error)	()	()		

Notes:

[10] - Study was terminated early, and no outcome measures were assessed.

[11] - Study was terminated early, and no outcome measures were assessed.

Statistical analyses

No statistical analyses for this end point

Secondary: Change From Baseline in the EuroQOL 5 Dimension 5 Level (EQ-5D 5L) Index Score

End point title	Change From Baseline in the EuroQOL 5 Dimension 5 Level (EQ-5D 5L) Index Score
-----------------	--

End point description:

The EQ-5D-5L is a standardized instrument for use as a measure of self-reported health status. Participants completed the 5-level (no problem, slight problem, moderate problem, severe problem, and inability or extreme problem), 5-dimension (mobility, self-care, usual activities, pain/discomfort, and anxiety/depression) questionnaire concerning their current health state. Five dimensions of health status are each assessed with 5 response options and scored as a composite index which are anchored on a scale of 0 to 1 with a higher score representing better health status. Study was terminated early. Data was not collected for this outcome and outcome measures were not assessed.

End point type	Secondary
----------------	-----------

End point timeframe:

Cycle 1 up to 390 days

End point values	150 mg Abemaciclib + Endocrine Therapy (ET)	Placebo + ET		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	0 ^[12]	0 ^[13]		
Units: Score on a scale				
arithmetic mean (standard error)	()	()		

Notes:

[12] - Study was terminated early, and no outcome measures were assessed.

[13] - Study was terminated early, and no outcome measures were assessed.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Baseline Up To 890 Days

Adverse event reporting additional description:

All participants who received at least one dose of study drug. Gender specific events occurring only in male or female participants have had the number of participants at risk adjusted accordingly. Based on the planned safety analysis, adverse event analysis was planned as per the cohorts corresponding regimen received.

Assessment type	Systematic

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
06 April 2021	- Updated inclusion and exclusion criteria for clarity; - Corrections made in Risk Assessment table and CYP3A guidance text.
20 May 2021	- Modified definition of high risk with regard to histologic grade, restricting it to participants with histologic Grade 3 disease; - Updated inclusion criteria to provide more clarity on related treatment discontinuation.
14 February 2022	- Added details about participant enrolment and unblinding; - Updated objectives section for this amendment; - Updated end of study and study completion definitions; - Specified that study will not evaluate compliance/PK assessments and safety data capture instructions.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

The study was terminated early due to inability to enroll study participants.

Notes:
