

## Clinical trial results:

### A Phase 2, Multi-Arm Study of Magrolimab in Patients with Solid Tumors Summary

EudraCT number	2020-005265-14
Trial protocol	ES FR
Global end of trial date	01 October 2024

#### Results information

Result version number	v1 (current)
This version publication date	09 May 2025
First version publication date	09 May 2025

#### Trial information

##### Trial identification

Sponsor protocol code	GS-US-548-5918
-----------------------	----------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT04827576
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Gilead Sciences
Sponsor organisation address	333 Lakeside Drive, Foster City, CA, United States, 94404
Public contact	Gilead Clinical Study Information Center, Gilead Sciences, GileadClinicalTrials@gilead.com
Scientific contact	Gilead Clinical Study Information Center, Gilead Sciences, GileadClinicalTrials@gilead.com

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	01 October 2024
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	01 October 2024
Was the trial ended prematurely?	Yes

Notes:

## General information about the trial

Main objective of the trial:

The goals of this clinical study was to learn about the safety, tolerability, dosing and effectiveness of magrolimab in combination with docetaxel in participants with solid tumors.

Protection of trial subjects:

The protocol and consent/assent forms were submitted by each investigator to a duly constituted Independent Ethics Committee (IEC) or Institutional Review Board (IRB) for review and approval before study initiation. All revisions to the consent/assent forms (if applicable) after initial IEC/IRB approval were submitted by the investigator to the IEC/IRB for review and approval before implementation in accordance with regulatory requirements. This study was conducted in accordance with recognized international scientific and ethical standards, including but not limited to the International Conference on Harmonization guideline for Good Clinical Practice (ICH GCP) and the original principles embodied in the Declaration of Helsinki.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 October 2021
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	France: 18
Country: Number of subjects enrolled	Poland: 6
Country: Number of subjects enrolled	Spain: 40
Country: Number of subjects enrolled	United Kingdom: 3
Country: Number of subjects enrolled	United States: 39
Worldwide total number of subjects	106
EEA total number of subjects	64

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23	0

months)	
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	57
From 65 to 84 years	49
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Participants were enrolled at study sites in Spain, Poland, France, United States and the United Kingdom.

### Pre-assignment

Screening details:

159 participants were screened.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Safety Run-in Cohort 1 (Magrolimab + Docetaxel)

Arm description:

Participants with solid tumors (including metastatic non small cell lung cancer (mNSCLC), metastatic urothelial cancer (mUC), and metastatic small cell lung cancer (mSCLC)) received 1 mg/kg magrolimab intravenously (IV) on Day 1, 30 mg/kg IV on Days 8 and 15 of cycle 1; 30 mg/kg IV on Days 1, 8 and 15 of Cycle 2; 60 mg/kg IV on Day 1 of Cycle 3 and onwards for up to 113 weeks; and 75 mg/m<sup>2</sup> docetaxel IV on Day 1 of each cycle for up to 113 weeks; each cycle length = 21 days.

Arm type	Experimental
Investigational medicinal product name	Docetaxel
Investigational medicinal product code	
Other name	Taxotere®
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

Administered intravenously

Investigational medicinal product name	Magrolimab
Investigational medicinal product code	
Other name	GS-4721
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

Administered intravenously

<b>Arm title</b>	Phase 2 Cohort 1a, mNSCLC (Magrolimab + Docetaxel)
------------------	--

Arm description:

Participants with mNSCLC received 1 mg/kg magrolimab IV on Day 1, 30 mg/kg IV on Days 8 and 15 of cycle 1; 30 mg/kg IV on Days 1, 8 and 15 of Cycle 2; 60 mg/kg IV on Day 1 of Cycle 3 and onwards for up to 90 weeks; and 75 mg/m<sup>2</sup> docetaxel IV on Day 1 of each cycle for up to 69 weeks; each cycle length = 21 days.

Arm type	Experimental
Investigational medicinal product name	Docetaxel
Investigational medicinal product code	
Other name	Taxotere®
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:	
Administered intravenously.	
Investigational medicinal product name	Magrolimab
Investigational medicinal product code	
Other name	GS-4721
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use
Dosage and administration details:	
Administered intravenously.	
<b>Arm title</b>	Phase 2 Cohort 1b, mUC (Magrolimab + Docetaxel)
Arm description:	
Participants with mUC received 1 mg/kg magrolimab IV on Day 1, 30 mg/kg IV on Days 8 and 15 of cycle 1; 30 mg/kg IV on Days 1, 8 and 15 of Cycle 2; 60 mg/kg IV on Day 1 of Cycle 3 and onwards for up to 68 weeks; and 75 mg/m <sup>2</sup> docetaxel IV on Day 1 of each cycle for up to 68 weeks; each cycle length = 21 days.	
Arm type	Experimental
Investigational medicinal product name	Docetaxel
Investigational medicinal product code	
Other name	Taxotere®
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use
Dosage and administration details:	
Administered intravenously.	
Investigational medicinal product name	Magrolimab
Investigational medicinal product code	
Other name	GS-4721
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use
Dosage and administration details:	
Administered intravenously.	
<b>Arm title</b>	Phase 2 Cohort 1c, mSCLC (Magrolimab + Docetaxel)
Arm description:	
Participants with mSCLC received 1 mg/kg magrolimab IV on Day 1, 30 mg/kg IV on Days 8 and 15 of cycle 1; 30 mg/kg IV on Days 1, 8 and 15 of Cycle 2; 60 mg/kg IV on Day 1 of Cycle 3 and onwards for up to 72 weeks; and 75 mg/m <sup>2</sup> docetaxel IV on Day 1 of each cycle for up to 72 weeks; each cycle length = 21 days.	
Arm type	Experimental
Investigational medicinal product name	Docetaxel
Investigational medicinal product code	
Other name	Taxotere®
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use
Dosage and administration details:	
Administered intravenously

## Baseline characteristics

### Reporting groups

Reporting group title	Safety Run-in Cohort 1 (Magrolimab + Docetaxel)
Reporting group description: Participants with solid tumors (including metastatic non small cell lung cancer (mNSCLC), metastatic urothelial cancer (mUC), and metastatic small cell lung cancer (mSCLC)) received 1 mg/kg magrolimab intravenously (IV) on Day 1, 30 mg/kg IV on Days 8 and 15 of cycle 1; 30 mg/kg IV on Days 1, 8 and 15 of Cycle 2; 60 mg/kg IV on Day 1 of Cycle 3 and onwards for up to 113 weeks; and 75 mg/m <sup>2</sup> docetaxel IV on Day 1 of each cycle for up to 113 weeks; each cycle length = 21 days.	
Reporting group title	Phase 2 Cohort 1a, mNSCLC (Magrolimab + Docetaxel)
Reporting group description: Participants with mNSCLC received 1 mg/kg magrolimab IV on Day 1, 30 mg/kg IV on Days 8 and 15 of cycle 1; 30 mg/kg IV on Days 1, 8 and 15 of Cycle 2; 60 mg/kg IV on Day 1 of Cycle 3 and onwards for up to 90 weeks; and 75 mg/m <sup>2</sup> docetaxel IV on Day 1 of each cycle for up to 69 weeks; each cycle length = 21 days.	
Reporting group title	Phase 2 Cohort 1b, mUC (Magrolimab + Docetaxel)
Reporting group description: Participants with mUC received 1 mg/kg magrolimab IV on Day 1, 30 mg/kg IV on Days 8 and 15 of cycle 1; 30 mg/kg IV on Days 1, 8 and 15 of Cycle 2; 60 mg/kg IV on Day 1 of Cycle 3 and onwards for up to 68 weeks; and 75 mg/m <sup>2</sup> docetaxel IV on Day 1 of each cycle for up to 68 weeks; each cycle length = 21 days.	
Reporting group title	Phase 2 Cohort 1c, mSCLC (Magrolimab + Docetaxel)
Reporting group description: Participants with mSCLC received 1 mg/kg magrolimab IV on Day 1, 30 mg/kg IV on Days 8 and 15 of cycle 1; 30 mg/kg IV on Days 1, 8 and 15 of Cycle 2; 60 mg/kg IV on Day 1 of Cycle 3 and onwards for up to 72 weeks; and 75 mg/m <sup>2</sup> docetaxel IV on Day 1 of each cycle for up to 72 weeks; each cycle length = 21 days.	

Reporting group values	Safety Run-in Cohort 1 (Magrolimab + Docetaxel)	Phase 2 Cohort 1a, mNSCLC (Magrolimab + Docetaxel)	Phase 2 Cohort 1b, mUC (Magrolimab + Docetaxel)

## End points

### End points reporting groups

Reporting group title	Safety Run-in Cohort 1 (Magrolimab + Docetaxel)
Reporting group description: Participants with solid tumors (including metastatic non small cell lung cancer (mNSCLC), metastatic urothelial cancer (mUC), and metastatic small cell lung cancer (mSCLC)) received 1 mg/kg magrolimab intravenously (IV) on Day 1, 30 mg/kg IV on Days 8 and 15 of cycle 1; 30 mg/kg IV on Days 1, 8 and 15 of Cycle 2; 60 mg/kg IV on Day 1 of Cycle 3 and onwards for up to 113 weeks; and 75 mg/m <sup>2</sup> docetaxel IV on Day 1 of each cycle for up to 113 weeks; each cycle length = 21 days.	
Reporting group title	Phase 2 Cohort 1a, mNSCLC (Magrolimab + Docetaxel)
Reporting group description: Participants with mNSCLC received 1 mg/kg magrolimab IV on Day 1, 30 mg/kg IV on Days 8 and 15 of cycle 1; 30 mg/kg IV on Days 1, 8 and 15 of Cycle 2; 60 mg/kg IV on Day 1 of Cycle 3 and onwards for up to 90 weeks; and 75 mg/m <sup>2</sup> docetaxel IV on Day 1 of each cycle for up to 69 weeks; each cycle length = 21 days.	
Reporting group title	Phase 2 Cohort 1b, mUC (Magrolimab + Docetaxel)
Reporting group description: Participants with mUC received 1 mg/kg magrolimab IV on Day 1, 30 mg/kg IV on Days 8 and 15 of cycle 1; 30 mg/kg IV on Days 1, 8 and 15 of Cycle 2; 60 mg/kg IV on Day 1 of Cycle 3 and onwards for up to 68 weeks; and 75 mg/m <sup>2</sup> docetaxel IV on Day 1 of each cycle for up to 68 weeks; each cycle length = 21 days.	
Reporting group title	Phase 2 Cohort 1c, mSCLC (Magrolimab + Docetaxel)
Reporting group description: Participants with mSCLC received 1 mg/kg magrolimab IV on Day 1, 30 mg/kg IV on Days 8 and 15 of cycle 1; 30 mg/kg IV on Days 1, 8 and 15 of Cycle 2; 60 mg/kg IV on Day 1 of Cycle 3 and onwards for up to 72 weeks; and 75 mg/m <sup>2</sup> docetaxel IV on Day 1 of each cycle for up to 72 weeks; each cycle length = 21 days.	

### Primary: Percentage of Participants Experiencing Treatment-Emergent Adverse Events (TEAEs)

End point title	Percentage of Participants Experiencing Treatment-Emergent Adverse Events (TEAEs) <sup>[1]</sup>
End point description: TEAEs were defined as any adverse events (AE) not present prior to the study treatment, or any events already present but worsening in either intensity or frequency following exposure to the study treatment. The TEAE reporting period is defined as the period from the date of the first dose of study treatment up to 30 days after the date of the last dose of study treatment or the day before initiation of subsequent antineoplastic therapy, whichever comes first. An AE was defined as any unfavorable and unintended sign, symptom, or disease temporally associated with the use of an investigational product or other protocol-imposed intervention, regardless of attribution. Analysis Population Description: Participants in the Safety Analysis Set were analyzed. The Safety Analysis Set included all participants who took at least 1 dose of any study drug.	
End point type	Primary
End point timeframe: First dose date up to 113 weeks plus 30 days	

#### Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical comparison was planned or performed.

End point values	Safety Run-in Cohort 1 (Magrolimab + Docetaxel)	Phase 2 Cohort 1a, mNSCLC (Magrolimab + Docetaxel)	Phase 2 Cohort 1b, mUC (Magrolimab + Docetaxel)	Phase 2 Cohort 1c, mSCLC (Magrolimab + Docetaxel)

No statistical analyses for this end point

## Primary: Percentage of Participants With Treatment-Emergent Laboratory Abnormalities

End point title	Percentage of Participants With Treatment-Emergent Laboratory Abnormalities <sup>[2]</sup>
-----------------	--

End point description:

Treatment-emergent laboratory abnormalities were defined as values that increase at least 1 toxicity grade from baseline at any postbaseline time point, up to and including the date of last dose of study drug plus 30 days and prior to the day of initiation of subsequent anti-cancer therapy. Percentages were rounded off. Analysis Population Description: Participants in the Safety Analysis Set were analyzed.

End point type	Primary
----------------	---------

End point timeframe:

First dose date up to 113 weeks plus 30 days

Notes:

[2] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical comparison was planned or performed.

End point values	Safety Run-in Cohort 1 (Magrolimab + Docetaxel)	Phase 2 Cohort 1a, mNSCLC (Magrolimab + Docetaxel)	Phase 2 Cohort 1b, mUC (Magrolimab + Docetaxel)	Phase 2 Cohort 1c, mSCLC (Magrolimab + Docetaxel)

## Statistical analyses

No statistical analyses for this end point

## Primary: Objective Response Rate (ORR) (Phase 2 Cohorts 1a, 1b, and 1c)

End point title	Objective Response Rate (ORR) (Phase 2 Cohorts 1a, 1b, and 1c) <sup>[3][4]</sup>
-----------------	--

End point description:

ORR was defined as the percentage of participants who achieve a complete response (CR) or partial response (PR), as measured by RECIST version 1.1, as determined by investigator assessment. CR was

defined as disappearance of all target lesions. Any pathological lymph nodes (whether target or non-target) must have reduction in short axis to <10 mm. PR was defined as at least a 30% decrease in the sum of diameters of target lesions, taking as reference the baseline sum diameters. Clopper-Pearson method was used in outcome measure analysis. Percentages were rounded-off. Analysis Population Description: Participants in the modified intent to treat analysis set were analyzed. The study had 2 parts - Safety Run-in and Phase 2. Per pre-specified analysis, this endpoint was applicable only to Phase 2 cohorts. Therefore, data for cohorts of Phase 2 are reported.

End point type	Primary
End point timeframe:	
Up to 90 Weeks	

Notes:

[3] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: The study had 2 parts - Safety Run-in and Phase 2. Per pre-specified analysis, this endpoint was applicable only to Phase 2 arms. Therefore, data for arms of Phase 2 are reported.

[4] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: The study had 2 parts - Safety Run-in and Phase 2. Per pre-specified analysis, this endpoint was applicable only to Phase 2 arms. Therefore, data for arms of Phase 2 are reported.

End point values	Phase 2 Cohort 1a, mNSCLC (Magrolimab + Docetaxel)	Phase 2 Cohort 1b, mUC (Magrolimab + Docetaxel)	Phase 2 Cohort 1c, mSCLC (Magrolimab + Docetaxel)

Units: percentage of participants				
number (confidence interval 95%)	17.2 (5.8 to 35.8)	3.8 (0.1 to 19.6)	4.8 (0.6 to 16.2)	

## Statistical analyses

No statistical analyses for this end point

## Secondary: Progression-free Survival (PFS) (Phase 2 Cohorts 1a, 1b, and 1c)

End point title	Progression-free Survival (PFS) (Phase 2 Cohorts 1a, 1b, and 1c) <sup>[5]</sup>
-----------------	---

End point description:

PFS was defined as the interval from the first dosing date of any study drug to the earlier date of the first documentation of objective disease progression (PD) by investigator assessment per RECIST, Version 1.1, or death from any cause. PD is defined as at least a 20% increase in the sum of diameters of target lesions, taking as reference the smallest sum on study (this includes the baseline sum if that is the smallest on study). In addition to the relative increase of 20%, the sum must also demonstrate an absolute increase of at least 5 mm. (appearance of one or more new lesions was also considered progression). Kaplan-Meier (KM) estimates were used in outcome measure analysis. Analysis Population Description: Participants in the modified Intent-to-Treat Analysis Set were analyzed. The study had 2 parts - Safety Run-in and Phase 2. Per pre-specified analysis, this endpoint was applicable only to Phase 2 cohorts. Therefore, data for cohorts of Phase 2 are reported.

End point type	Secondary
End point timeframe:	
Up to 117 Weeks	

Notes:

[5] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: The study had 2 parts - Safety Run-in and Phase 2. Per pre-specified analysis, this endpoint was applicable only to Phase 2 arms. Therefore, data for arms of Phase 2 are reported.

End point values	Phase 2 Cohort 1a, mNSCLC (Magrolimab + Docetaxel)	Phase 2 Cohort 1b, mUC (Magrolimab + Docetaxel)	Phase 2 Cohort 1c, mSCLC (Magrolimab + Docetaxel)

## Secondary: Duration of Response (DOR) (Phase 2 Cohorts 1a, 1b, and 1c)

End point title	Duration of Response (DOR) (Phase 2 Cohorts 1a, 1b, and
-----------------	---

End point description:

DOR was defined as time from first documentation of CR or PR to the earliest date of documented PD, per RECIST, Version 1.1, or death from any cause, whichever occurs first, as determined by investigator assessment. CR and PR are defined in endpoint #3 and PD is defined in endpoint#4. KM Estimates were used in endpoint analysis. Analysis Population Description: Participants in the modified Intent-to-Treat Analysis Set who achieved CR or PR were analyzed. The study had 2 parts - Safety Run-in and Phase 2. Per pre-specified analysis, this endpoint was applicable only to Phase 2 cohorts. Therefore, data for cohorts of Phase 2 are reported. 0000/9999 means data is not available

End point type	Secondary
----------------	-----------

End point timeframe:

Up to 117 Weeks

Notes:

[6] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period. Justification: The study had 2 parts - Safety Run-in and Phase 2. Per pre-specified analysis ,this endpoint was applicable only to Phase 2 arms. Therefore, data for arms of Phase 2 are reported.

End point values	Phase 2 Cohort 1a, mNSCLC (Magrolimab + Docetaxel)	Phase 2 Cohort 1b, mUC (Magrolimab + Docetaxel)	Phase 2 Cohort 1c, mSCLC (Magrolimab + Docetaxel)	
Subject group type	Reporting group	Reporting group	Reporting group	
Number of subjects analysed	5	1	2	
Units: months				
median (confidence interval 95%)	7.6 (3.7 to 9999)	9999 (9999 to 9999)	4.7 (4.6 to 9999)	

## Statistical analyses

No statistical analyses for this end point

## Secondary: Overall Survival (OS) (Phase 2 Cohorts 1a, 1b, and 1c)

End point title	Overall Survival (OS) (Phase 2 Cohorts 1a, 1b, and 1c) <sup>[7]</sup>
-----------------	---

End point description:

OS is defined as time from date of dose initiation to death from any cause. KM estimates were used in endpoint analysis. Analysis Population Description: Participants in the modified Intent-to-Treat Analysis

Set were analyzed. The study had 2 parts - Safety Run-in and Phase 2. Per pre-specified analysis, this endpoint was applicable only to Phase 2 cohorts. Therefore, data for cohorts of Phase 2 are reported. 9999: Upper limit of confidence interval was not estimable due to low number of participants with events.

End point type	Secondary
End point timeframe:	
Up to 117 Weeks	

Notes:

[7] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: The study had 2 parts - Safety Run-in and Phase 2. Per pre-specified analysis, this endpoint was applicable only to Phase 2 arms. Therefore, data for arms of Phase 2 are reported.

End point values	Phase 2 Cohort 1a, mNSCLC (Magrolimab + Docetaxel)	Phase 2 Cohort 1b, mUC (Magrolimab + Docetaxel)	Phase 2 Cohort 1c, mSCLC (Magrolimab + Docetaxel)

## Statistical analyses

No statistical analyses for this end point

## Secondary: Percentage of Participants who Developed Anti-Magrolimab Antibodies

End point title	Percentage of Participants who Developed Anti-Magrolimab Antibodies
End point description:	
Analysis Population Description:: Participants in the Immunogenicity Analysis Set with available data were analyzed. The Immunogenicity Analysis Set includes all participants who received any amount of magrolimab and have at least 1 evaluable anti-magrolimab antibody test result.	
End point type	Secondary
End point timeframe:	
Up to 113 Weeks	

End point values	Safety Run-in Cohort 1 (Magrolimab + Docetaxel)	Phase 2 Cohort 1a, mNSCLC (Magrolimab + Docetaxel)	Phase 2 Cohort 1b, mUC (Magrolimab + Docetaxel)	Phase 2 Cohort 1c, mSCLC (Magrolimab + Docetaxel)
Subject group type	Reporting group	Reporting group	Reporting group	Reporting group
Number of subjects analysed	7	25	25	37
Units: percentage of participants				
number (not applicable)	0	4.0	8.0	0

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

All-cause mortality: Up to 117 weeks; Adverse events: Up to 113 weeks plus 30 days

Adverse event reporting additional description:

All-cause mortality: All Enrolled Analysis Set included all participants who received a study subject identification number in the study after screening. Adverse events: The Safety Analysis Set included all participants who took at least 1 dose of any study drug.

Assessment type	Systematic

### Reporting groups

Reporting group title	Safety Run-in Cohort 1 (Magrolimab + Docetaxel)
-----------------------	---

Reporting group description:

Participants with solid tumors (including metastatic non small cell lung cancer (mNSCLC), metastatic urothelial cancer (mUC), and metastatic small cell lung cancer (mSCLC)) received 1 mg/kg magrolimab intravenously (IV) on Day 1, 30 mg/kg IV on Days 8 and 15 of cycle 1; 30 mg/kg IV on Days 1, 8 and 15 of Cycle 2; 60 mg/kg IV on Day 1 of Cycle 3 and onwards for up to 113 weeks; and 75 mg/m<sup>2</sup> docetaxel IV on Day 1 of each cycle for up to 113 weeks; each cycle length = 21 days.

Reporting group title	Phase 2 Cohort 1c, mSCLC (Magrolimab + Docetaxel)
-----------------------	---

Reporting group description:

Participants with mSCLC received 1 mg/kg magrolimab IV on Day 1, 30 mg/kg IV on Days 8 and 15 of cycle 1; 30 mg/kg IV on Days 1, 8 and 15 of Cycle 2; 60 mg/kg IV on Day 1 of Cycle 3 and onwards for up to 72 weeks; and 75 mg/m<sup>2</sup> docetaxel IV on Day 1 of each cycle for up to 72 weeks; each cycle length = 21 days.

Reporting group title	Phase 2 Cohort 1b, mUC (Magrolimab + Docetaxel)
-----------------------	---

Reporting group description:

Participants with mUC received 1 mg/kg magrolimab IV on Day 1, 30 mg/kg IV on Days 8 and 15 of cycle 1; 30 mg/kg IV on Days 1, 8 and 15 of Cycle 2; 60 mg/kg IV on Day 1 of Cycle 3 and onwards for up to 68 weeks; and 75 mg/m<sup>2</sup> docetaxel IV on Day 1 of each cycle for up to 68 weeks; each cycle length = 21 days.

Reporting group title	Phase 2 Cohort 1a, mNSCLC (Magrolimab + Docetaxel)
-----------------------	--

Reporting group description:

Participants with mNSCLC received 1 mg/kg magrolimab IV on Day 1, 30 mg/kg IV on Days 8 and 15 of cycle 1; 30 mg/kg IV on Days 1, 8 and 15 of Cycle 2; 60 mg/kg IV on Day 1 of Cycle 3 and onwards for up to 90 weeks; and 75 mg/m<sup>2</sup> docetaxel IV on Day 1 of each cycle for up to 69 weeks; each cycle length = 21 days.

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
03 March 2021	<p>Herein is a summary of the major changes made to original protocol dated 15 December 2020 and reflected in Amendment 1 dated 03 March 2021. The protocol has been amended primarily to:</p> <ul style="list-style-type: none"><li>- Modify various sections of the protocol to reflect the removal of the triple negative breast (TNBC) cancer cohorts, in response to initial regulatory feedback received from the FDA during the initial review of this protocol. This amendment removed the Safety Run-in Cohort 1 (Magrolimab + Nab-paclitaxel) and the Phase 2 Cohort 1a (mTNBC). The TNBC Cohorts will be a separate study under a different IND.</li><li>- Other sections of the protocol also revised to address regulatory feedback from the Food and Drug Administration (FDA) include clarifying eligibility criteria for small cell lung cancer (SCLC) and the definition of dose-limiting toxicity (DLT).</li><li>- In response to regulatory feedback received from International Health Authorities, language throughout the protocol has been harmonized with ongoing studies of magrolimab.</li><li>- Clarification of key study procedures.</li><li>- Biomarker sample collection timepoints at screening, Cycle 1, and the end of treatment have been adjusted to reflect current data needs for the characterization of the mechanism of action of magrolimab in solid tumors and for harmonization with other magrolimab solid tumor studies.</li></ul>
15 March 2021	<p>Herein is a summary of the major changes made to Amendment 1 dated 03 March 2021 and reflected in Amendment 2 dated 15 March 2021. The protocol has been amended to address feedback received from the FDA. The sections revised are as follows:</p> <ul style="list-style-type: none"><li>- Modify the exceptions to dose-limiting toxicity (DLT) definition for electrolyte abnormalities, tumor lysis, and hypomagnesemia.</li></ul>
14 December 2021	<p>This amendment provides the modification of the magrolimab dosing in Cycles 3 and beyond to 60 mg/kg (every 3 weeks) and guidance on dose delays of magrolimab in case of TEAEs.</p>
27 January 2022	<p>The primary reason for this amendment is to provide additional guidance for enhanced anemia management. Anemia is a known and well-described risk for magrolimab that can occur in early doses and is transient. Adequate monitoring and management of anemia during the first 2 doses of magrolimab are needed to ensure patient safety, especially in patients with low baseline hemoglobin. A minimum hemoglobin threshold prior to the first 2 doses of magrolimab treatment during treatment initiation along with post magrolimab treatment hemoglobin monitoring during those treatments are included in the amended protocol.</p>

24 October 2023	<p>High-level summaries of the history of this study's amendments are provided in tabular form in the subsections below (from most recent amendment to oldest), with changes listed in each table in order of importance. Minor changes such as the correction of typographic errors, grammar, or formatting are not detailed.</p> <ul style="list-style-type: none"> <li>- Collection period for treatment-emergent adverse events clarified.</li> <li>- Collection period for incidence of treatment-emergent laboratory abnormalities clarified.</li> <li>- Updates made to align with current safety recommendations.</li> <li>- Timing of primary analysis for Phase 2 Cohort 1 clarified.</li> <li>- Updated the toxicity management regarding hemoglobin monitoring to align with current recommendations.</li> <li>- Remove circulating tumor cell sample collection as not performed.</li> <li>- Sample size for urothelial cancer cohort updated.</li> <li>- Magrolimab administration language updated to clarify vital signs will be assessed prior to administration. Sections 5.4</li> <li>- Language added to allow local sourcing of docetaxel. Section 5.3.2</li> <li>- Updated guidance provided for the management of infusion-related reactions.</li> <li>- New sections provided for guidance on management of severe neutropenia and serious infections.</li> <li>- Text added to align with EU-CTR requirements.</li> <li>- Text updated to clarify that 'urine or serum pregnancy tests will be conducted from Cycle 1 Day 1' with respect to pregnancy test.</li> <li>- Analysis sets updated.</li> <li>- Guidance on COVID-19 vaccination provided. Section 5.7.1.1</li> <li>- Language updated to clarify that a final analysis may be conducted after the primary analysis.</li> <li>- Inclusion criteria were updated for clarification. Synopsis; Section 4.2</li> <li>- Text was updated to replace 'participants' with 'patients' to maintain consistency.</li> <li>- Changes from administrative amendment 1 were added to the protocol.</li> <li>- Changes from administrative amendment 2 were added to the protocol.</li> <li>- Minor changes to correct typographic errors.</li> </ul>
-----------------	---

Notes:

## Interruptions (globally)

Were there any global interruptions to the trial? No

## Limitations and caveats

None reported
