

## Clinical trial results:

### Efficacy of ALXN1840 on human hepatic copper uptake quantified with $^{64}\text{CuCl}_2$ PET/CT-scan.

#### Summary

EudraCT number	2020-005832-31
Trial protocol	DK
Global end of trial date	04 July 2022

#### Results information

Result version number	v1 (current)
This version publication date	03 January 2024
First version publication date	03 January 2024

#### Trial information

##### Trial identification

Sponsor protocol code	ALXN1840-HV-Cu-Absorption
-----------------------	---------------------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Aarhus University Hospital
Sponsor organisation address	Palle Juul-Jensens Boulevard 99, Aarhus N, Denmark,, Aarhus N, Denmark,
Public contact	Public information about the trial., Aarhus University Hospital, thomsand@rm.dk
Scientific contact	Public information about the trial., Aarhus University Hospital, thomsand@rm.dk

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

---

**Results analysis stage**

Analysis stage	Final
Date of interim/final analysis	20 November 2022
Is this the analysis of the primary completion data?	Yes
Primary completion date	04 July 2022
Global end of trial reached?	Yes
Global end of trial date	04 July 2022
Was the trial ended prematurely?	No

Notes:

---

**General information about the trial**

Main objective of the trial:

To investigate the effect of ALXN1840 on hepatic copper uptake in healthy participants, compared to the effect of penicillamine, trientine and placebo.

Protection of trial subjects:

Blood samples before and after treatment, including liver, kidney and hematological parameters. Only inclusion of healthy persons as evaluated by clinical physicians. Medical supervision during tracer injection and scans. Participants given contact information of medical personnel and instructed to note all adverse events.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 February 2021
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

---

**Population of trial subjects****Subjects enrolled per country**

Country: Number of subjects enrolled	Denmark: 32
Worldwide total number of subjects	32
EEA total number of subjects	32

Notes:

---

**Subjects enrolled per age group**

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	29
From 65 to 84 years	3
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Participants were recruited through posts in local news papers and social media.

### Pre-assignment

Screening details:

Interested persons were contacted by phone and informed about the trial, written participant information was given by mail.

An in-person meeting was conducted for inclusion into the study and evaluation of health status.

### Period 1

Period 1 title	Pre-treatment
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

Blinding implementation details:

The tetrathiomolybdate and placebo groups were double blinded.

The Trientine and Penicillamine groups were not blinded.

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Trientine

Arm description: -

Arm type	Active comparator
Investigational medicinal product name	Cuprior
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

300 mg morning, 225 mg evening.

<b>Arm title</b>	Penicillamine
------------------	---------------

Arm description: -

Arm type	Active comparator
Investigational medicinal product name	Metalcaptase
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

600 mg morning and 600 mg evening

<b>Arm title</b>	Tetrathiomolybdate
------------------	--------------------

Arm description: -

Arm type	Experimental
Investigational medicinal product name	Tetrathiomolybdate
Investigational medicinal product code	
Other name	ALXN1840, bis-choline tetrathiomolybdate, WTX101
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

15 mg once daily

<b>Arm title</b>	Placebo
------------------	---------

Arm description:

Placebo which was visually identical to tetrathiomolybdate.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 tablet pr day. Visually identical to tetrathiomolybdate.

<b>Number of subjects in period 1</b>	Trientine	Penicillamine	Tetrathiomolybdate
Started	8	8	8
Completed	8	8	8

<b>Number of subjects in period 1</b>	Placebo
Started	8
Completed	8

## Period 2

Period 2 title	Post-treatment
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

Blinding implementation details:

The tetrathiomolybdate and placebo groups were double blinded.

The Trientine and Penicillamine groups were not blinded.

No statistical analyses for this end point

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Adverse events were reported from inclusion into the study (prior to initiation of treatment) and until 2 weeks following final day of treatment.

Adverse event reporting additional description:

Reporting adverse events possibly related to treatment.

Assessment type	Systematic

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Small sample size and use of healthy individuals.
---
