More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
27 May 2021	The main purpose of amendment 1 was to incorporate changes from the Protocol Clarification Memorandum dated 18 March 2021.
15 October 2021	The purpose of amendment 2 was to: 1. update the eGFR exclusion criterion to < 30 mL/min/1.73 m ² 2. clarify the types of cardiomyopathies that are excluded from the trial 3. clarify the testing needed for HBV at screening 4. update the K ⁺ exclusion criterion to the upper limit of normal of the standard reference range of the study's central lab (5.1 mmol/L) and update, accordingly, the potassium safety monitoring rule to allow for physiological variability from the upper limit of normal.
15 March 2022	The purpose of amendment 3 was to: 1. extend the screening period from four to ten weeks 2. include an additional dose cohort (cohort C, 120 mg) or placebo). Based on AGT levels observed at the interim analysis, a decision was made to close enrollment for Cohort A and enroll the remainder of the subjects into Cohort B (approximately n=36) and Cohort C (approximately n=18).

Notes:

Interruptions (globally)
