Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	31 December 2023
Is this the analysis of the primary completion data?	Yes
Primary completion date	31 December 2023
Global end of trial reached?	Yes
Global end of trial date	31 December 2023
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

The primary objective of the study is to assess effectiveness of citizens being vaccinated with one of SARS-CoV2 vaccines the government has purchased, and the Danish Medicines Agency has approved for use in Denmark. The study will compare and predict the durability of the minimal protective titre afforded by each of the vaccines against COVID-19 through conducting comprehensive high-throughput SARS-CoV-2 antibody analyses and in-depth characterization of the vaccine-induced cellular immune response.

Protection of trial subjects:

Informed Consent is obtained from the participant before any trial-related procedures were conducted.

Background therapy:

As the study was observing the effect and roll-out of a vaccination programme in the middle of an ongoing epidemic, there were some changes in the study due to changes in the political environment.

1. The intended 4 arms were reduced to 3, as one of the vaccines was stopped by the government due to high risk of unintended and fatal side-effects.
2. ENFORCE set out to monitor the immunological response to the standard recommended COVID-19 vaccine regimens at the time of inception over a two-year period (i.e., two doses). However, the need of additional doses (3 or 4) to further boost/preserve immunity was clarified in the second half 2021 and ENFORCE was approved to observe the evolving use of vaccines during a 5-year follow-up of the cohort.
3. It was also decided, that ENFORCE should continue to assess the impact new vaccine technologies, that would be licensed and used in the cohort as part of the national vaccine program, as well as additional doses of existing vaccines. As an observation study it will not interfere with the participants choice of receiving such doses/types of vaccines.

Evidence for comparator: -

Actual start date of recruitment	08 February 2021
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Denmark: 6941
Worldwide total number of subjects	6941
EEA total number of subjects	6941

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	3733
From 65 to 84 years	3200
85 years and over	8

Subject disposition

Recruitment

Recruitment details:

The study population consisted of consecutive consenting persons who were invited to be vaccinated at 20- 50 participating units throughout Denmark. A targeted effort was made to enrol a high proportion of participants who was considered at 'high-risk' of COVID-19 (as defined by SST in the national vaccination plan).

Pre-assignment

Screening details:

Subjects to be vaccinated with one of the COVID-19 vaccines given as part of the Danish COVID-19 Vaccine Program.

Period 1

Period 1 title	Entire Trial (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Vaccine COMIRNATY

Arm description:

Comirnaty is a vaccine for preventing coronavirus disease 2019 (COVID-19) in people aged 16 years and older.

Comirnaty contains a molecule called messenger RNA (mRNA) with instructions for producing a protein from SARS-CoV-2, the virus that causes COVID-19. Comirnaty does not contain the virus itself and cannot cause COVID-19.

The active substance is a single-stranded, 5'-capped messenger RNA produced using a cell-free in vitro transcription from corresponding DNA templates, encoding the viral spike (S) protein of SARS-CoV-2

Arm type	Strategy
Investigational medicinal product name	Vaccine Comirnaty
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intramuscular use

Dosage and administration details:

The vaccine is not IMP in the trial, but used according to the approved Summary of Product Characteristics - and is given as part of the Danish COVID-19 Vaccine Program.

Arm title	Vaccine Moderna
------------------	-----------------

Arm description:

COVID-19 Vaccine Moderna is a vaccine used to prevent COVID-19 caused by SARS-CoV-2. It is given to adults aged 18 years and older.

The active substance in COVID-19 Vaccine Moderna is mRNA encoding the SARS-CoV-2 Spike protein. The mRNA is embedded in SM-102 lipid nanoparticles.

As COVID-19 Vaccine Moderna does not contain the virus, it cannot cause COVID-19.

Arm type	Strategy
Investigational medicinal product name	Vaccine Moderna
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intramuscular use

Dosage and administration details:

The vaccine is not IMP in the trial, but used according to the approved Summary of Product Characteristics - and is given as part of the Danish COVID-19 Vaccine Program.

Arm title	Vaccine AstraZeneca
------------------	---------------------

Arm description:

COVID-19 Vaccine AstraZeneca is indicated for active immunisation to prevent COVID-19 caused by SARS-CoV-2, in individuals 18 years and older.

One dose (0.5 ml.) contains Chimpanzee Adenovirus encoding the SARS-CoV-2 Spike glycoprotein (ChAdOx1-s), not less than 2.5×10^8 infectious units (Inf.U)

COVID-19 Vaccine AstraZeneca is a monovalent vaccine composed of a single recombinant, replication-deficient chimpanzee adenovirus (ChAdOx1) vector encoding the S glycoprotein of SARS-CoV-2.

Arm type	Strategy
Investigational medicinal product name	Vaccine AstraZeneca
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intramuscular use

Dosage and administration details:

The vaccine is not IMP in the trial, but used according to the approved Summary of Product Characteristics - and is given as part of the Danish COVID-19 Vaccine Program.

Number of subjects in period 1	Vaccine COMIRNATY	Vaccine Moderna	Vaccine AstraZeneca

COVID-19 Vaccine AstraZeneca is a monovalent vaccine composed of a single recombinant, replication-deficient chimpanzee adenovirus (ChAdOx1) vector encoding the S glycoprotein of SARS-CoV-2.

Primary: Antibody Level

End point title	Antibody Level
-----------------	----------------

End point description:

Primary Outcome: Minimal protective neutralising antibody titre (MPNAT)

i.e. the minimum level of neutralising antibodies sufficient to protect the person from becoming infected. MPNAT will be measured via profiling of antibodies against SARS-CoV-2 Spike epitopes performed at each visit until month 60.

We will use two different large-scale methods.

1. ELISA detection of total serum Ig to the Receptor Binding Domain (Wantai), this specific method will be stopped after January 2023 as the positive rate has reached 99%.
2. A multiantigen serological test including both the N-terminal Domain (NTD), The Receptor Binding Domain (RBD), the complete Spike (S) protein and the Nucleocapsid (NC) protein as antigens (from Mesoscale).

Additionally, an ACE2 competition assay will be used to score the receptor blocking potential of antibodies raised by vaccination (Mesoscale).

End point type	Primary
----------------	---------

End point timeframe:

Antibody level will be measured via profiling of antibodies against SARS-CoV-2 Spike epitopes performed at each visit until month 24.

End point values	Vaccine COMIRNATY	Vaccine Moderna	Vaccine AstraZeneca	
Subject group type	Reporting group	Reporting group	Reporting group	
Number of subjects analysed	3749	2541	481	
Units: Number of participants				
SSI Antibody data 0-14 days before 3rd dose	1395	1165	160	
Wantai result prior to booster - Negative	43	1	0	
Wantai result prior to booster - Positive	1352	1163	160	
Wantai result prior to booster - Inconclusive	0	1	0	
SSI Antibody data 28 days after 3rd dose	2269	1883	269	
Wantai result after booster - Negative	40	7	0	
Wantai result after booster - Positive	2227	1875	269	
Wantai result after booster - Inconclusive	2	1	0	

Statistical analyses

Statistical analysis title	Total spike IgG Geometric Mean
Statistical analysis description:	
For antibody response to each of the vaccines and subsequent vaccine dose, we reported the geometric means together with 95% confidence intervals (2-sided).	
Comparison groups	Vaccine COMIRNATY v Vaccine Moderna v Vaccine AstraZeneca
Number of subjects included in analysis	6771
Analysis specification	Pre-specified
Analysis type	other ^[1]
Parameter estimate	Geometric mean
Point estimate	473602
Confidence interval	
level	95 %
sides	2-sided
lower limit	467043
upper limit	480252

Notes:

[1] - There was no formal statistical comparison as the aim of the study was not to compare the response to the different vaccines. The outcome at the 2 years study visit was presented stratified by the number of doses an individual had received rather than by vaccine type as participants received different vaccine combinations. The geometric mean antibody levels at each study visit were plotted graphically together with the 95% confidence intervals.

Secondary: Breakthrough infections

End point title	Breakthrough infections
-----------------	-------------------------

End point description:

Breakthrough infection was defined as a positive SARS-CoV-2 PCR test result reported in the KIDS dataset after the date of first vaccination.

The timing of the infection was based on the date of first positive test.

The number of participants experiencing a positive PCR test following their first vaccination 4473 participants remaining in the study.

Overall, half of the cohort had tested positive for SARS-CoV-2 at least once since their first vaccination and prior to the end of the study (31st December 2023).

A higher proportion of younger individuals (< 55 years) had experienced a breakthrough infection

defined by a positive PCR test compared to those aged ≥ 65 years.

End point type	Secondary
End point timeframe:	
Breakthrough infections throughout the 24 month follow-up period	

End point values	Vaccine COMIRNATY	Vaccine Moderna	Vaccine AstraZeneca	
Subject group type	Reporting group	Reporting group	Reporting group	
Number of subjects analysed	3823	2620	498	
Units: Number of participants				
Ever tested for SARS-CoV-2 via KIDS	3599	2537	496	
Participants testing positive for SARS-CoV-2	1594	1195	317	
Days from first vaccine dose to positive test	320	268	340	

Statistical analyses

No statistical analyses for this end point

Vascular disorders Vascular disorder	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed occurrences (all)	15 / 3824 (0.39%) 15	11 / 2620 (0.42%) 11	4 / 499 (0.80%) 4
Surgical and medical procedures Surgical procedure	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed occurrences (all)	15 / 3824 (0.39%) 15	6 / 2620 (0.23%) 6	1 / 499 (0.20%) 1
Pregnancy, puerperium and perinatal conditions Abortion spontaneous			
subjects affected / exposed occurrences (all)	0 / 3824 (0.00%) 0	0 / 2620 (0.00%) 0	1 / 499 (0.20%) 1
General disorders and administration site conditions Administration site discomfort	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed occurrences (all)	127 / 3824 (3.32%) 127	173 / 2620 (6.60%) 173	44 / 499 (8.82%) 44
Immune system disorders Immune system disorder			
subjects affected / exposed occurrences (all)	4 / 3824 (0.10%) 4	6 / 2620 (0.23%) 6	1 / 499 (0.20%) 1
Reproductive system and breast disorders Reproductive system disorder	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed occurrences (all)	5 / 3824 (0.13%) 5	1 / 2620 (0.04%) 1	3 / 499 (0.60%) 3
Respiratory, thoracic and mediastinal disorders Respiratory disorder	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed occurrences (all)	46 / 3824 (1.20%) 46	27 / 2620 (1.03%) 27	7 / 499 (1.40%) 7
Psychiatric disorders			

Psychiatric disorder	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed	8 / 3824 (0.21%)	11 / 2620 (0.42%)	5 / 499 (1.00%)
occurrences (all)	8	11	5
Investigations			
Investigation	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed	6 / 3824 (0.16%)	5 / 2620 (0.19%)	1 / 499 (0.20%)
occurrences (all)	6	5	1
Injury, poisoning and procedural complications			
Complications	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed	38 / 3824 (0.99%)	21 / 2620 (0.80%)	7 / 499 (1.40%)
occurrences (all)	38	21	7
Cardiac disorders			
Cardiac disorder	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed	17 / 3824 (0.44%)	8 / 2620 (0.31%)	1 / 499 (0.20%)
occurrences (all)	17	8	1
Nervous system disorders			
Nervous system disorder	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed	66 / 3824 (1.73%)	45 / 2620 (1.72%)	18 / 499 (3.61%)
occurrences (all)	66	45	18
Blood and lymphatic system disorders			
Blood disorder	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed	5 / 3824 (0.13%)	1 / 2620 (0.04%)	0 / 499 (0.00%)
occurrences (all)	5	1	0
Ear and labyrinth disorders			
Ear disorder	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed	3 / 3824 (0.08%)	2 / 2620 (0.08%)	1 / 499 (0.20%)
occurrences (all)	3	2	1
Eye disorders			
Eye disorder	Additional description: Due to the high number of participants participating in the study the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed	5 / 3824 (0.13%)	7 / 2620 (0.27%)	0 / 499 (0.00%)
occurrences (all)	5	7	0
Gastrointestinal disorders			

Gastrointestinal disorder	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed	52 / 3824 (1.36%)	27 / 2620 (1.03%)	3 / 499 (0.60%)
occurrences (all)	52	27	3
Hepatobiliary disorders			
Hepatobiliary disease	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed	2 / 3824 (0.05%)	4 / 2620 (0.15%)	0 / 499 (0.00%)
occurrences (all)	2	4	0
Skin and subcutaneous tissue disorders			
Skin disorder	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed	12 / 3824 (0.31%)	18 / 2620 (0.69%)	7 / 499 (1.40%)
occurrences (all)	12	18	7
Renal and urinary disorders			
Renal disorder	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed	6 / 3824 (0.16%)	6 / 2620 (0.23%)	0 / 499 (0.00%)
occurrences (all)	6	6	0
Endocrine disorders			
Endocrine disorder	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed	4 / 3824 (0.10%)	2 / 2620 (0.08%)	1 / 499 (0.20%)
occurrences (all)	4	2	1
Musculoskeletal and connective tissue disorders			
Musculoskeletal disorder	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed	82 / 3824 (2.14%)	54 / 2620 (2.06%)	10 / 499 (2.00%)
occurrences (all)	82	54	10
Infections and infestations			
Infection	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed	78 / 3824 (2.04%)	81 / 2620 (3.09%)	13 / 499 (2.61%)
occurrences (all)	78	81	13
Metabolism and nutrition disorders			
Metabolic disorder	Additional description: Due to in general the high number of participants in the study, the numbers for this system organ class consists of several different preferred terms. A detailed report is available upon request.		
subjects affected / exposed	17 / 3824 (0.44%)	7 / 2620 (0.27%)	1 / 499 (0.20%)
occurrences (all)	17	7	1

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
