

## Clinical trial results:

### A Randomised, Double-blind, Multicentre Phase III Study to Assess the Efficacy and Safety of RGB-14-P Compared to Prolia® in Women with Postmenopausal Osteoporosis

#### Summary

EudraCT number	2020-006017-38
Trial protocol	PL CZ HU BG ES IT
Global end of trial date	15 November 2023

#### Results information

Result version number	v1 (current)
This version publication date	25 October 2024
First version publication date	25 October 2024

#### Trial information

##### Trial identification

Sponsor protocol code	RGB-14-101
-----------------------	------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT05087030
WHO universal trial number (UTN)	-
Other trial identifiers	IND: 146025

Notes:

##### Sponsors

Sponsor organisation name	Gedeon Richter Plc.
Sponsor organisation address	1103 Budapest, Gyömrői út 19-21, Budapest, Hungary,
Public contact	Medical Information Service, Gedeon Richter Plc., medinfo@richter.hu
Scientific contact	Medical Information Service, Gedeon Richter Plc., medinfo@richter.hu

Notes:

##### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	13 February 2024
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	15 November 2023
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

Efficacy

To demonstrate similar efficacy and effect of RGB 14 P with US licensed Prolia® on BMD at the lumbar spine at Week 52 in female subjects with postmenopausal osteoporosis

Pharmacodynamics

To demonstrate similar pharmacodynamics (AUEC of %CfB in sCTX) of RGB 14 P with US licensed Prolia® in female subjects with postmenopausal osteoporosis (only required for EMA)

Protection of trial subjects:

This study was conducted in accordance with the principles laid down in the International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH) Good Clinical Practice (GCP) guidance – ICH E6(R2), and in accordance with the Declaration of Helsinki and in accordance with applicable national laws and regulations.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	21 September 2021
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Poland: 225
Country: Number of subjects enrolled	Spain: 35
Country: Number of subjects enrolled	Bulgaria: 67
Country: Number of subjects enrolled	Czechia: 61
Country: Number of subjects enrolled	Hungary: 39
Country: Number of subjects enrolled	Italy: 23
Country: Number of subjects enrolled	United States: 20
Country: Number of subjects enrolled	Ukraine: 3
Worldwide total number of subjects	473
EEA total number of subjects	450

Notes:

### Subjects enrolled per age group

In utero	0
----------	---

Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	186
From 65 to 84 years	287
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

The study was conducted between 21-September-2021 (first subject first visit) to 15-November-2023 (last subject last visit).

### Pre-assignment

Screening details:

Subjects who met the inclusion criteria and none of the exclusion criteria were enrolled to the study. All study assessments were performed as per the schedule of assessment.

### Period 1

Period 1 title	Main period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	RGB-14-P

Arm description:

Subjects received RGB-14-P as subcutaneous (SC) injection on Day 1 of treatment period 1 (week 0) and treatment period 2 (week 26).

Arm type	Experimental
Investigational medicinal product name	RGB-14-P
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

RGB-14-P was provided as a single-dose (1 mL solution) pre-filled syringe for subcutaneous injection administration.

<b>Arm title</b>	Prolia®
------------------	---------

Arm description:

Subjects received Prolia® as SC injection on Day 1 of treatment period 1 (week 0) and treatment period 2 (week 26).

Arm type	Experimental
Investigational medicinal product name	Prolia®
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Prolia® was provided as a single-dose (1 mL solution) pre-filled syringe for subcutaneous injection administration.

Number of subjects in period 1	RGB-14-P	Prolia®
Started	242	231
Completed	225	211
Not completed	17	20
Exclusion criteria met	1	-
Adverse event, serious fatal	-	1
Consent withdrawn by subject	8	13
Adverse event, non-fatal	2	2
Unspecified	1	2
Lost to follow-up	3	-
Study objective confounded	1	-
Subject's personal reason	-	2
Protocol deviation	1	-

## Period 2

Period 2 title	Transition period
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

## Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	RGB-14-P to RGB-14-P

### Arm description:

Subjects who received RGB-14-P during the main period were re-randomized and received Prolia® as SC injection on day 1 of treatment period 3 (week 52).

Arm type	Experimental
Investigational medicinal product name	RGB-14-P
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

### Dosage and administration details:

RGB-14-P was provided as a single-dose (1 mL solution) pre-filled syringe for subcutaneous injection administration.

<b>Arm title</b>	Prolia® to RGB-14-P
------------------	---------------------

### Arm description:

Subjects who received Prolia® during the main period were re-randomized and received RGB-14-P as SC injection on Day 1 of treatment period 3 (week 52).

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Prolia®
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Prolia® was provided as a single-dose (1 mL solution) pre-filled syringe for subcutaneous injection administration.

<b>Arm title</b>	Prolia® to Prolia®
------------------	--------------------

Arm description:

Subjects who received Prolia® during the main period were re-randomized and received Prolia® as SC injection on Day 1 of treatment period 3 (week 52).

Arm type	Experimental
Investigational medicinal product name	Prolia®
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Prolia® was provided as a single-dose (1 mL solution) pre-filled syringe for subcutaneous injection administration.

<b>Number of subjects in period 2<sup>[1]</sup></b>	RGB-14-P to RGB-14-P	Prolia® to RGB-14-P	Prolia® to Prolia®
Started	63	62	63
Completed	63	62	62
Not completed	0	0	1
Consent withdrawn by subject	-	-	1

Notes:

[1] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: Only a subset of patients continued the study in the Transition period (as outlined in the clinical study protocol).

## Baseline characteristics

### Reporting groups

Reporting group title	RGB-14-P
-----------------------	----------

Reporting group description:

Subjects received RGB-14-P as subcutaneous (SC) injection on Day 1 of treatment period 1 (week 0) and treatment period 2 (week 26).

Reporting group title	Prolia®
-----------------------	---------

Reporting group description:

Subjects received Prolia® as SC injection on Day 1 of treatment period 1 (week 0) and treatment period 2 (week 26).

Reporting group values	RGB-14-P	Prolia®	Total
Number of subjects	242	231	473
Age categorical			
Units: Subjects			
In utero	0	0	0
Preterm newborn infants (gestational age < 37 wks)	0	0	0
Newborns (0-27 days)	0	0	0
Infants and toddlers (28 days-23 months)	0	0	0
Children (2-11 years)	0	0	0
Adolescents (12-17 years)	0	0	0
Adults (18-64 years)	100	86	186
From 65-84 years	142	145	287
85 years and over	0	0	0
Age continuous			
Units: years			
arithmetic mean	66.7	66.8	
standard deviation	± 5.20	± 4.91	-
Gender categorical

Female	242	231	473
Male	0	0	0

## End points

### End points reporting groups

Reporting group title	RGB-14-P
Reporting group description: Subjects received RGB-14-P as subcutaneous (SC) injection on Day 1 of treatment period 1 (week 0) and treatment period 2 (week 26).	
Reporting group title	Prolia®
Reporting group description: Subjects received Prolia® as SC injection on Day 1 of treatment period 1 (week 0) and treatment period 2 (week 26).	
Reporting group title	RGB-14-P to RGB-14-P
Reporting group description: Subjects who received RGB-14-P during the main period were re-randomized and received Prolia® as SC injection on day 1 of treatment period 3 (week 52).	
Reporting group title	Prolia® to RGB-14-P
Reporting group description: Subjects who received Prolia® during the main period were re-randomized and received RGB-14-P as SC injection on Day 1 of treatment period 3 (week 52).	
Reporting group title	Prolia® to Prolia®
Reporting group description: Subjects who received Prolia® during the main period were re-randomized and received Prolia® as SC injection on Day 1 of treatment period 3 (week 52).	

### Primary: Percentage Change from Baseline (%CfB) in Lumbar Spine Bone Mineral Density (BMD)

End point title	Percentage Change from Baseline (%CfB) in Lumbar Spine Bone Mineral Density (BMD)
End point description: Percentage change from baseline in lumbar bone BMD was assessed. BMD at the lumbar spine was measured by dual-energy x-ray absorptiometry (DXA). This outcome measure was assessed for main period. The Full analysis set (FAS) included all subjects to whom the investigational medicinal product (IMP) has been randomized. Here, 'number of subjects analyzed' specifies all subjects who were evaluated for this outcome measure.	
End point type	Primary
End point timeframe: Week 52	

End point values	RGB-14-P	Prolia®		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	222	206		
Units: percent				
arithmetic mean (standard deviation)	5.68 (± 3.535)	5.19 (± 4.118)		

### Statistical analyses

<b>Statistical analysis title</b>	RGB-14-P v/s Prolia®
Statistical analysis description:	
The analysis was performed with an ANCOVA model with %CfB in lumbar spine BMD at Week 52 as the dependent variable; covariates were treatment Arm (RGB-14-P and US licenced Prolia), stratification factors at randomization (Previous use of bisphosphonates [yes/no] and geographical region [Europe, US], Baseline BMD value in lumbar spine, machine type and machine type*baseline BMD value interaction.	
Comparison groups	RGB-14-P v Prolia®
Number of subjects included in analysis	428
Analysis specification	Pre-specified
Analysis type	equivalence <sup>[1]</sup>
Parameter estimate	Estimated Difference
Point estimate	0.34

### Secondary: Percentage Change from Baseline (%CfB) in serum Type I Collagen C-telopeptide (sCTX)

End point title	Percentage Change from Baseline (%CfB) in serum Type I Collagen C-telopeptide (sCTX)
-----------------	--

End point description:

Percentage Change from Baseline in sCTX was assessed as part of pharmacodynamics parameter with US-licensed Prolia® was assessed in female subjects with postmenopausal osteoporosis.

PDS included all subjects in safety population with at least one evaluable PD parameter (%CfB and AUEC) and not had any protocol deviations that have a relevant impact on sCTX or serum P1NP results included in PD parameter calculation. Here, 'number of subjects analyzed' specifies all subjects who were evaluated for this outcome measure.

Here, 9999 indicates that the data were not available due to insufficient number of subjects.

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
03 August 2021	The protocol was amended to Substantial Amendment 1, dated 03 Aug 2021, to incorporate and implement responses and suggestions made by the USFDA.
10 January 2022	The protocol was amended to Substantial Amendment 2, dated 10 Jan 2022, to incorporate and implement changes for statistical analysis, consistency with supporting study documents and suggestions made based on Investigator experiences.
19 January 2023	The protocol was amended to Substantial Amendment 3, dated 19 Jan 2023, to incorporate and implement 10% increase in the number of subjects to be enrolled for the Transition Period to meet the requirements of USFDA, considering the drop-out was higher than expected.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
