EU Clinical Trials Register

Clinical trial results:
A randomized, participant- and investigator-blinded, placebo-controlled study to investigate efficacy, safety and tolerability of LTP001 in participants with pulmonary arterial hypertension

Summary

EudraCT number	2021-000670-28
Trial protocol	DE NL ES
Global end of trial date	25 April 2024

Results information

Result version number	v2 (current)
This version publication date	14 June 2025
First version publication date	03 April 2025
Version creation reason	

Trial information

Trial identification

Sponsor protocol code	CLTP001A12201

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT05135000
WHO universal trial number (UTN)	-

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	25 April 2024
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	25 April 2024
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

The primary objective was to assess the efficacy of LTP001 in participants with pulmonary arterial hypertension (PAH). Due to EudraCT system limitations, which EMA is aware of, data using 999 as data points in this record are not an accurate representation of the clinical trial results. Please use https://www.novctrd.com/CtrdWeb/home.nov for complete trial results.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	30 June 2022
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United Kingdom: 7
Country: Number of subjects enrolled	United States: 3
Country: Number of subjects enrolled	Germany: 8
Country: Number of subjects enrolled	Netherlands: 6
Country: Number of subjects enrolled	Poland: 9
Country: Number of subjects enrolled	Argentina: 3
Country: Number of subjects enrolled	Spain: 11
Worldwide total number of subjects	47
EEA total number of subjects	34

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0

Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	43
From 65 to 84 years	4
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

A total of 56 participants were screened for the study. Out of these, 47 participants were randomized.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	LTP001

Arm description:

Participants received LTP001, 6 mg, oral capsules, once daily in the morning for approximately 24 weeks

Arm type	Experimental
Investigational medicinal product name	LTP001
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

LTP001, 6 mg, once daily in the morning for approximately 24 weeks

Arm title	Placebo

Arm description:

Participants received LTP001 placebo capsules matching LTP001 orally once daily in the morning for approximately 24 weeks

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

LTP001-matching placebo, once daily, in the morning for approximately 24 weeks

Number of subjects in period 1	LTP001	Placebo
Started	35	12
Completed	26	9
Not completed	9	3
Adverse event, non-fatal	2	-

Study Terminated by Sponsor	6	3
Lost to follow-up	1	-

arithmetic mean (standard deviation)	0.067 (± 1.0772)	0.493 (± 0.9075)		

Statistical analyses

No statistical analyses for this end point

Secondary: Change From Baseline in Fractional Area Change (FAC)

End point title	Change From Baseline in Fractional Area Change (FAC)

End point description:

Key right ventricular (RV) function endpoints such as RV fractional area change (RV FAC) were assessed with echocardiography.

End point type	Secondary

End point timeframe:

Baseline, Weeks 5, 13, and 25

End point values	LTP001	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	31	10		
Units: percent				
arithmetic mean (standard deviation)				
Week 5 n=31,9	0.35 (± 6.944)	0.92 (± 5.622)		
Week 13 n=29,10	-1.19 (± 6.424)	2.62 (± 4.417)		
Week 25 n=26,8	-1.85 (± 5.412)	-1.45 (± 7.532)		

Statistical analyses

No statistical analyses for this end point

Secondary: Change From Baseline in Peak Velocity of Excursion (RV S')

End point title	Change From Baseline in Peak Velocity of Excursion (RV S')

End point description:

Key right ventricular (RV) function per echocardiography. The terms Tricuspid Annular Systolic Velocity (TASV) and Peak Velocity of Excursion (RV S') are synonymous in echocardiography to describe the peak systolic velocity of the lateral tricuspid annulus. Including both TASV and RV S' as separate

secondary endpoints was an oversight in the protocol as the data, calculation, and analyses for both (TASV and RV S') are identical. Therefore, the TASV and RV S' data in this results disclosure are the same.

End point type	Secondary

End point timeframe:

Baseline, Weeks 5, 13, and 25

End point values	LTP001	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	33	11

Week 25 n=26,9	0.4 (± 2.28)	-1.0 (± 3.00)		

Statistical analyses

No statistical analyses for this end point

Secondary: Change From Baseline in EmPHasis-10

End point title	Change From Baseline in EmPHasis-10

End point description:

emPHasis-10 is a questionnaire with 10 questions designed to determine how pulmonary hypertension affects a participant's life. Each item is scored on a scale of 0 to 5, with a total score ranging from 0 to 50. A higher score indicates worse quality of life.

End point type	Secondary

End point timeframe:

Baseline, Weeks 13 and 25

End point values	LTP001	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	21	9		
Units: score				
arithmetic mean (standard deviation)				
Week 13 n=21,9	-1.490 (± 5.7108)	-3.622 (± 3.1712)		

Week 25 n=17,9	-4.972 (± 8.7643)	-3.000 (± 4.2961)		

Statistical analyses

No statistical analyses for this end point

Secondary: Change From Baseline in Pulmonary Arterial Hypertension—Symptoms and Impact (PAH-SYMPACT)

End point title	Change From Baseline in Pulmonary Arterial Hypertension—Symptoms and Impact (PAH-SYMPACT)

End point description:

PAH-SYMPACT is a questionnaire used to assess pulmonary arterial hypertension symptoms and their impact. Individual item scores range from 0 to 4. Total score is calculated as the sum of the scores for the individual items divided by the number of items. A higher score indicates more severe symptoms/impacts.

End point type	Secondary

End point timeframe:

Baseline, Weeks 13 and 25

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
01 December 2021	This amendment: required a negative serum pregnancy test within 7 days prior to first dose administration on Day 1 to rule out pregnancy where required by health authority (e. g., the United Kingdom) or local regulations. In countries where this was not required, a negative urine pregnancy test needed to be available prior to dosing on Day 1; excluded participants who took strong CYP3A4/5 inducers or inhibitors; excluded participants who had a long QT syndrome or who took drugs known to prolong the QT interval; added strong CYP3A4/5 inducers, strong CYP3A4/5 inhibitors, and known drugs which cause QT prolongation to the prohibited medications list; specified that 6MWT was only to be conducted on-site to remove testing variability in the assessment; removed the requirement for participants to record investigational medicinal product (IMP) dosing every day in the eDiary; specified that compliance for IMP administration was to be done by medication reconciliation; added coagulation assays (PT, INR, aPTT) and luteinizing hormone and follicle stimulating hormone (FSH) to the safety laboratory panel.
02 March 2022	This amendment: updated clinical safety data; added guidance text for 6MWT and multi-sensor device; updated withdrawal of consent language to improve clarity.
01 November 2022	This amendment: incorporated language regarding the implementation of a data monitoring committee (DMC); updated exclusion criteria with information about sperm donation to reflect the requirements described in the protocol appendix; updated protocol appendix with further guidance details for hepatic and renal alert criteria and event follow-up; updated protocol appendix with considerations about the use of LTP001 in combination with allowed standard therapies.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Due to EudraCT system limitations, which EMA is aware of, data using 999 as data points in this record are not an accurate representation of the clinical trial results. Please use https://www.novctrd.com/CtrdWeb/home.nov for complete trial results.
