Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-002938-PIP01-20
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	11 June 2024
Is this the analysis of the primary completion data?	Yes
Primary completion date	18 July 2023
Global end of trial reached?	Yes
Global end of trial date	11 June 2024
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

This study evaluated whether oral islatravir (ISL) is effective in preventing Human Immunodeficiency Virus Type 1 (HIV-1) infection in women at high-risk for HIV-1 infection. The study compared oral ISL taken once a month versus standard-of-care medication for prevention of HIV-1 infection, emtricitabine/tenofovir disoproxil (FTC/TDF) taken once per day. The primary hypothesis is that oral ISL is more effective than FTC/TDF at reducing the incidence rate per year of confirmed HIV-1 infections.

Protection of trial subjects:

This study was conducted in conformance with Good Clinical Practice standards and applicable country and/or local statutes and regulations regarding ethical committee review, informed consent, and the protection of human subjects participating in biomedical research.

The following additional measure defined for this individual study was in place for the protection of trial subjects:

Based on laboratory findings of decreased lymphocyte and CD4+ T-cell counts across the islatravir program, dosing of blinded study intervention was halted on 13-Dec-2021 and screening and randomization of new participants was ended. Blinded assessments conducted prior to this date are designated as Study Part 1. During Study Part 2, participants from Part 1 have the option to receive daily open-label FTC/TDF while continuing in the study for safety monitoring. Study Part 3 was added to unblind each participant's Part 1 study intervention assignment, continue participants on FTC/TDF, and monitor safety.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	24 February 2021
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	South Africa: 656
Country: Number of subjects enrolled	United States: 74
Worldwide total number of subjects	730
EEA total number of subjects	0

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37	0

wk	
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	730
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

One person mistakenly received study drug without being randomized. They are not included in Participant Flow or Baseline Characteristics because they were not enrolled in the study, but their adverse events are reported in the Adverse Events module because they received study drug.

Period 1

Period 1 title	Randomization
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Data analyst, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	ISL QM

Arm description:

ISL (islatravir) once monthly AND placebo to FTC/TDF (emtricitabine/tenofovir disoproxil) once daily. Following study-wide cessation of ISL administration, participants had the option to receive open-label FTC/TDF. Placebo was no longer administered once open label treatment began.

Arm type	Experimental
Investigational medicinal product name	Placebo to FTC/TDF
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

0 mg tablet administered once daily during Part 1.

Investigational medicinal product name	Islatravir
Investigational medicinal product code	
Other name	MK-8591
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Oral 60 mg tablet administered once monthly during Part 1.

Arm title	FTC/TDF QD
------------------	------------

Arm description:

FTC/TDF (TRUVADA™ or generic product emtricitabine/tenofovir disoproxil) administered once daily. Placebo to ISL (islatravir) administered once monthly. Following study-wide cessation of ISL administration, participants had the option to continue on open-label FTC/TDF. Placebo was no longer administered once open label treatment began.

Arm type	Active comparator
Investigational medicinal product name	Placebo to ISL
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

0 mg tablet administered orally once monthly in Part 1.

Investigational medicinal product name	FTC/TDF
Investigational medicinal product code	
Other name	TRUVADA™ Emtricitabine/Tenofovir disoproxil Emtricitabine/Tenofovir disoproxil fumarate
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Each tablet contains 200 mg emtricitabine and 245 mg of tenofovir disoproxil (equivalent to 300 mg tenofovir disoproxil fumarate or 201.22 mg tenofovir disoproxil phosphate), administered orally once daily in Parts 1, 2, and 3.

Number of subjects in period 1	ISL QM	FTC/TDF QD
Started	364	366
Completed	362	365
Not completed	2	1
Randomized in error: not treated	2	1

Period 2

Period 2 title	Treatment
Is this the baseline period?	Yes ^[1]
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Data analyst, Assessor

Blinding implementation details:

Part 1: A double-blinding technique with in-house blinding was used. Participants, investigators, and Sponsor personnel or delegates involved in study intervention administration or clinical evaluation were blinded.

Part 2: Sponsor personnel not directly involved with blinded safety monitoring were unblinded to participants' Part 1 study intervention.

Part 3: Participants, investigators, and all Sponsor personnel were unblinded to participants' original study intervention group.

Arms

Are arms mutually exclusive?	Yes
Arm title	ISL QM

Arm description:

ISL (islatravir) once monthly AND placebo to FTC/TDF (emtricitabine/tenofovir disoproxil) once daily. Following study-wide cessation of ISL administration, participants had the option to receive open-label FTC/TDF. Placebo was no longer administered once open label treatment began.

Arm type	Experimental
Investigational medicinal product name	Placebo to FTC/TDF
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:	
0 mg tablet administered once daily during Part 1.	
Investigational medicinal product name	Islatravir
Investigational medicinal product code	
Other name	MK-8591
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Oral 60 mg tablet administered once monthly during Part 1.

Arm title	FTC/TDF QD
------------------	------------

Arm description:

FTC/TDF (TRUVADA™ or generic product emtricitabine/tenofovir disoproxil) administered once daily. Placebo to ISL (islatravir) administered once monthly. Following study-wide cessation of ISL administration, participants had the option to continue on open-label FTC/TDF. Placebo was no longer administered once open label treatment began.

Arm type	Active comparator
Investigational medicinal product name	Placebo to ISL
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

0 mg tablet administered orally once monthly in Part 1.

Investigational medicinal product name	FTC/TDF
Investigational medicinal product code	
Other name	TRUVADA™ Emtricitabine/Tenofovir disoproxil Emtricitabine/Tenofovir disoproxil fumarate
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Each tablet contains 200 mg emtricitabine and 245 mg of tenofovir disoproxil (equivalent to 300 mg tenofovir disoproxil fumarate or 201.22 mg tenofovir disoproxil phosphate), administered orally once daily in Parts 1, 2, and 3.

Notes:

[1] - Period 1 is not the baseline period. It is expected that period 1 will be the baseline period.

Justification: The All Patients as Treated population was used as the baseline population.

Number of subjects in period 2^[2]	ISL QM	FTC/TDF QD
Started	362	365
Received Open-Label FTC/TDF	343	345
Completed	0	0
Not completed	362	365
Adverse event, serious fatal	1	-
Physician decision	1	2
Consent withdrawn by subject	21	19
Unknown	-	1
Study Terminated by Sponsor	308	309
Lost to follow-up	31	34

Notes:

[2] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Baseline characteristics were calculated on the number of participants treated instead of the number randomized (worldwide total). 3 participants randomized in error and were not treated, so this "Treated" period is a more accurate representation of the population assessed throughout the study.

Baseline characteristics

Reporting groups

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Blinded arms and mistaken treatment arm: Up to approximately 325 days

Open-label arms: Up to approximately 866 days (starting 42 days after last blinded treatment; includes the time leading up to first open-label treatment)

Adverse event reporting additional description:

Following sponsor decision to stop dosing blinded study treatment, participants were offered the option to receive open-label FTC/TDF. Open-label arms include all events occurring >42 days after a participant's final blinded treatment.

All-Cause Mortality includes all randomized participants starting from the time of randomization.

Reporting groups

Reporting group title	FTC/TDF QD
-----------------------	------------

Reporting group description:

FTC/TDF (TRUVADA™ or generic product emtricitabine/tenofovir disoproxil) administered once daily. Placebo to ISL (islatravir) administered once monthly. Following study-wide cessation of ISL administration, participants had the option to continue on open-label FTC/TDF. Placebo was no longer administered once open label treatment began. Adverse events during the open-label period are not counted in this arm.

Reporting group title	ISL QM
-----------------------	--------

Reporting group description:

ISL (islatravir) once monthly AND placebo to FTC/TDF (emtricitabine/tenofovir disoproxil) once daily. Following study-wide cessation of ISL administration, participants had the option to receive open-label FTC/TDF administered once daily. Adverse events during the open-label period are not counted in this arm.

Reporting group title	FTC/TDF > Open-Label FTC/TDF Second Course
-----------------------	--------------------------------------------

Reporting group description:

This arm represents participants who received open-label FTC/TDF (TRUVADA™ or generic product emtricitabine/tenofovir disoproxil) administered once daily, after previously receiving FTC/TDF QD during the blinded portion of the study.

Reporting group title	FTC/TDF-Treated Without Randomization
-----------------------	---------------------------------------

Reporting group description:

The participant in this arm was mistakenly given daily FTC/TDF plus monthly placebo to ISL without completing enrollment and randomization. Following study unblinding, participant continued to receive open-label daily FTC/TDF. Adverse events were collected for this participant during blinded and open-label treatment due to receiving study drug, but zero participants are reported as affected and zero adverse event instances are reported due to the risk of identification of a person.

Reporting group title	ISL QM > Open-Label FTC/TDF
-----------------------	-----------------------------

Reporting group description:

This arm represents participants who received open-label FTC/TDF (TRUVADA™ or generic product emtricitabine/tenofovir disoproxil) administered once daily, after previously receiving ISL QM during the blinded portion of the study.

Bacterial vaginosis			
subjects affected / exposed	0 / 1 (0.00%)	158 / 343 (46.06%)	
occurrences (all)	0	263	
Urinary tract infection			
subjects affected / exposed	0 / 1 (0.00%)	31 / 343 (9.04%)	
occurrences (all)	0	38	
Vulvovaginal candidiasis			
subjects affected / exposed	0 / 1 (0.00%)	114 / 343 (33.24%)	
occurrences (all)	0	163	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
11 May 2021	Amendment 1: Modified the management of participants who become pregnant, modified PK assessments for participants who become pregnant and remain on ISL, and modified breastfeeding options for participants who become pregnant.
07 December 2021	Amendment 2: Increased frequency of monitoring of lymphocytes, added monitoring of CD4+ T-cells, and added discontinuation criteria in response to findings of decreases in lymphocytes (in studies of participants with or without HIV) and CD4+ T-cell counts (in studies of participants with HIV) in ISL clinical studies.
01 March 2022	Amendment 3: Defined changes in study design and conduct implemented due to stopping of blinded study intervention, and to describe continued monitoring of participants, as a result of the 13-Dec-2021 discontinuation of blinded study intervention and consequent treatment changes.
29 June 2022	Amendment 4: Added Part 3 to the study to unblind each participant's Part 1 study intervention assignment, continue participants on FTC/TDF, and monitor safety.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
11 June 2024	This is date of study termination after adequate follow-up with infants born to participants enrolled in the study.	-

Notes:

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Based on laboratory findings of decreased lymphocyte and CD4+ T-cell counts across the islatravir program, dosing of blinded study intervention was halted on 13-Dec-2021 and screening and randomization of new participants was ended.

Notes:
