

## Clinical trial results:

### Does 4% 5-fluorouracil pre-treatment improve the efficacy of daylight photodynamic therapy for actinic keratoses – a randomized controlled study

#### Summary

EudraCT number	2021-001586-21
Trial protocol	DK
Global end of trial date	06 December 2023

#### Results information

Result version number	v1 (current)
This version publication date	29 August 2024
First version publication date	29 August 2024

#### Trial information

##### Trial identification

Sponsor protocol code	5FUDPDT78842
-----------------------	--------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

##### Sponsors

Sponsor organisation name	Department of Dermatology, Bispebjerg Hospital
Sponsor organisation address	Nielsine Nielsens Vej 9, Copenhagen NV, Denmark, 2400
Public contact	Principal investigator, Bispebjerg Hospital, Department of Dermatology, stine.regin.wiegell@regionh.dk
Scientific contact	Principal investigator, Bispebjerg Hospital, Department of Dermatology, 0045 30914617, stine.regin.wiegell@regionh.dk

Notes:

##### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	13 August 2024
Is this the analysis of the primary completion data?	Yes
Primary completion date	05 December 2023
Global end of trial reached?	Yes
Global end of trial date	06 December 2023
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The aim of the study is to compare the efficacy of sequential 4% 5-FU and daylight MAL-PDT with daylight MAL-PDT alone in the treatment of multiple actinic keratoses in the face and scalp

Protection of trial subjects:

This study was conducted in accordance with the ethical principles of the Declaration of Helsinki. Signed informed consent was obtained from all participants prior to entry into the study and the Good Clinical Practice Unit, Copenhagen University, performed external monitoring. The protocol was approved by the Danish Medicine Agency (EudraCT 2021-0015860-21), The Regional Ethics Committee of Region Hovedstaden (H-78842), and the Danish Data Protection Agency.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	27 October 2021
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Denmark: 60
Worldwide total number of subjects	60
EEA total number of subjects	60

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	9
From 65 to 84 years	48
85 years and over	3

## Subject disposition

### Recruitment

Recruitment details:

Patients were recruited from October 2021 to November 2022

### Pre-assignment

Screening details:

Patients referred to the Department of Dermatology, Bispebjerg University Hospital, Copenhagen (n=50) or Private Hospital Mølholm, Vejle, Denmark (n=10) for treatment of multiple AKs.

### Pre-assignment period milestones

Number of subjects started	60
Number of subjects completed	60

### Period 1

Period 1 title	Treatment and follow-up (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	No
<b>Arm title</b>	5-FU dPDT

Arm description:

Patients applied 5-FU cream (Tolak® 40 mg/g, Pierre-Fabre Dermatologie, Boulogne, France) twice daily for 7 days. At day 7 MAL patients were treated with MAL-daylight PDT

Arm type	Experimental
Investigational medicinal product name	Tolak
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Cream
Routes of administration	Cutaneous use

Dosage and administration details:

twice daily for 7 days

Investigational medicinal product name	Metvix
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Cream
Routes of administration	Cutaneous use

Dosage and administration details:

One treatment with daylight photodynamic therapy

<b>Arm title</b>	dPDT
------------------	------

Arm description:

At day 7 patients were treated with MAL-dPDT

Arm type	Active comparator
----------	-------------------

Investigational medicinal product name	Metvix
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Cream
Routes of administration	Cutaneous use

Dosage and administration details:

One treatment with daylight photodynamic therapy

<b>Number of subjects in period 1</b>	5-FU dPDT	dPDT
Started	60	60
Completed	60	60

## Baseline characteristics

### Reporting groups

Reporting group title	Treatment and follow-up
-----------------------	-------------------------

Reporting group description:

Inter-individual design, split-face/scalp study

Reporting group values	Treatment and follow-up	Total	
Number of subjects	60	60	
Age categorical			
Units: Subjects			
18-64 years	9	9	
65-84 years	48	48	
85 years and over	3	3	
Age continuous			
Units: years			
arithmetic mean	73		
full range (min-max)	56 to 89	-	
Gender categorical			
Units: Subjects			
Female	6	6	
Male	54	54	

## End points

### End points reporting groups

Reporting group title	5-FU dPDT
Reporting group description: Patients applied 5-FU cream (Tolak® 40 mg/g, Pierre-Fabre Dermatologie, Boulogne, France) twice daily for 7 days. At day 7 MAL patients were treated with MAL-daylight PDT	
Reporting group title	dPDT
Reporting group description: At day 7 patients were treated with MAL-dPDT	

### Primary: Lesion response rate

End point title	Lesion response rate
End point description:	
End point type	Primary
End point timeframe: 3-month after treatment	

End point values	5-FU dPDT	dPDT		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	60	60		
Units: %	87	75		

### Statistical analyses

Statistical analysis title	Comparison
Comparison groups	5-FU dPDT v dPDT
Number of subjects included in analysis	120
Analysis specification	Pre-specified
Analysis type	superiority
P-value	< 0.05
Method	t-test, 2-sided
Parameter estimate	Mean difference (final values)

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

12-months

Adverse event reporting additional description:

Follow-up

Assessment type	Systematic
-----------------	------------

### Dictionary used

Dictionary name	None
-----------------	------

Dictionary version	0
--------------------	---

### Reporting groups

Reporting group title	5-FU dPDT
-----------------------	-----------

Reporting group description:

Patients applied 5-FU cream (Tolak® 40 mg/g, Pierre-Fabre Dermatologie, Boulogne, France) twice daily for 7 days. At day 7 MAL patients were treated with MAL-daylight PDT

Reporting group title	dPDT
-----------------------	------

Reporting group description:

At day 7 patients were treated with MAL-dPDT

Serious adverse events	5-FU dPDT	dPDT	
Total subjects affected by serious adverse events			
subjects affected / exposed	10 / 60 (16.67%)	10 / 60 (16.67%)	
number of deaths (all causes)	0	0	
number of deaths resulting from adverse events	0	0	
Neoplasms benign, malignant and unspecified (incl cysts and polyps)			
cancer coli			
subjects affected / exposed	1 / 60 (1.67%)	1 / 60 (1.67%)	
occurrences causally related to treatment / all	0 / 1	0 / 1
