Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	09 September 2021
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	19 April 2021
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To investigate the efficacy of PF- 06462700 administered intravenously at 40 mg/kg/day for 4 days in Japanese participants with moderate and above aplastic anemia.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and in compliance with all International Council for Harmonisation (ICH) Good Clinical Practice (GCP) Guidelines. All the local regulatory requirements pertinent to safety of trial subjects were followed.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	25 July 2020
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Japan: 3
Worldwide total number of subjects	3
EEA total number of subjects	0

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	1
Adults (18-64 years)	2
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

The study was conducted in single country from 25 July 2020 to 19 Apr 2021. Total 3 subjects signed the informed consent form (ICF). Out of which 0 subjects were screen failures, 3 actually enrolled into the study and assigned to a study treatment.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	PF-06462700
-----------	-------------

Arm description:

Subjects aged 2 years or greater than (>) 2 years with moderate and above severity aplastic anemia received PF-06462700 at a dose of 40 milligram per kilogram per day (mg/kg/day), intravenously (IV) for 4 days. Subjects after treatment were followed up for 24 weeks.

Arm type	Experimental
Investigational medicinal product name	PF-06462700
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Subjects received PF-06462700 dose of 40 mg/kg/day for 4 days.

Number of subjects in period 1	PF-06462700
Started	3
Treated	3
Follow-up	3

Reporting group title	PF-06462700
Reporting group description: Subjects aged 2 years or greater than (>) 2 years with moderate and above severity aplastic anemia received PF-06462700 at a dose of 40 milligram per kilogram per day (mg/kg/day), intravenously (IV) for 4 days. Subjects after treatment were followed up for 24 weeks.	

Primary: Number of Subjects With Hematologic Response at Week 12

End point title	Number of Subjects With Hematologic Response at Week 12 ^[1]
End point description: Hematologic response was considered to be "effective" when 2 or more of the following criteria were met: absolute neutrophil count greater than or equal to (\geq) 500 per microliters, platelet count \geq 20,000 per microliters and reticulocyte count \geq 60,000 per microliters was observed. In this outcome measure, number of subjects with hematologic response classified as effective and not effective were reported. Improvement in counts that were dependent upon exogenously administered growth factors or transfusion, was not considered as fulfilling response criteria. Full analysis set (FAS) included subjects were assigned to investigational product and who took at least 1 dose of investigational	
End point type	Primary
End point timeframe: Week 12 Follow-up Visit	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive data was planned to be analyzed for this endpoint because of the limited sample size (n=3), no summary statistics were planned to be provided, and the result of primary endpoint was planned to be listed individually for each patients.
