

Table 3. Association between treatment with invasive mechanical ventilation and p-chlordiazepoxide

|  | No invasive mechanical ventilation (n=18) | Invasive mechanical ventilation (n=8) | Median difference [95% confidence interval] | P-value |
|--|---|---------------------------------------|---|---------|
| P-chlordiazepoxide (µg/ml) at T <sub>inclusion</sub> | 11 (8.4-17)                               | 6.9 (3.6-14)                          | 4.7 [-2.9-11]                               | 0.26    |
| P-chlordiazepoxide (µg/ml) at T <sub>12H</sub>       | 9.8 (6.1-14)                              | 5.3 (2.6-9.0)                         | 3.9[-1.7-10]                                | 0.20    |

*T<sub>inclusion</sub>*: Time of inclusion in the study. *T<sub>12H</sub>*: 12 hours after inclusion. Median (IQR). Mann Whitney test.
