

## Clinical trial results:

### A Phase 2 Study of Once-Daily LY3502970 Compared with Placebo in Participants Who Have Obesity or Are Overweight with Weight-Related Comorbidities

#### Summary

EudraCT number	2021-002805-88
Trial protocol	HU
Global end of trial date	22 November 2022

#### Results information

Result version number	v1 (current)
This version publication date	08 September 2023
First version publication date	08 September 2023

#### Trial information

##### Trial identification

Sponsor protocol code	J2A-MC-GZGI
-----------------------	-------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT05051579
WHO universal trial number (UTN)	-
Other trial identifiers	Trial Number: 18210

Notes:

##### Sponsors

Sponsor organisation name	Eli Lilly and Company
Sponsor organisation address	Lilly Corporate Center, Indianapolis, IN, United States, 46285
Public contact	Available Mon - Fri 9 AM - 5 PM EST, Eli Lilly and Company, 1 877CTLilly,
Scientific contact	Available Mon - Fri 9 AM - 5 PM EST, Eli Lilly and Company, 1 8772854559,

Notes:

##### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

---

**Results analysis stage**

Analysis stage	Final
Date of interim/final analysis	22 November 2022
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	22 November 2022
Was the trial ended prematurely?	No

Notes:

---

**General information about the trial**

Main objective of the trial:

The main purpose of the study was to assess the effect of LY3502970 in participants who have obesity or are overweight.

Protection of trial subjects:

This study was conducted in accordance with International Conference on Harmonization (ICH) Good Clinical Practice, and the principles of the Declaration of Helsinki, in addition to following the laws and regulations of the country or countries in which a study is conducted.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	29 September 2021
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

---

**Population of trial subjects****Subjects enrolled per country**

Country: Number of subjects enrolled	Canada: 48
Country: Number of subjects enrolled	Hungary: 31
Country: Number of subjects enrolled	United States: 193
Worldwide total number of subjects	272
EEA total number of subjects	31

Notes:

---

**Subjects enrolled per age group**

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	230
From 65 to 84 years	42

85 years and over	0
-------------------	---

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

For maintenance doses of LY3502970: 12, 24, 36, and 45 milligram (mg), the initial dose will be 2 or 3 mg followed by additional escalation steps as appropriate. The dose-escalation varied by dose group where the target maintenance dose was achieved between Weeks 5 and 16.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	12 mg LY3502970

Arm description:

Participants received maintenance dose 12 mg with dose escalation starting from 3 mg, 6 mg and then 12 mg LY3502970 administered orally once daily until 36 weeks.

Arm type	Experimental
Investigational medicinal product name	12 mg LY3502970
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Participants received maintenance dose 12 mg with dose escalation starting from 3 mg, 6 mg and then 12 mg LY3502970 administered orally once daily until 36 weeks.

<b>Arm title</b>	24 mg LY3502970
------------------	-----------------

Arm description:

Participants received maintenance dose 24 mg with dose escalation starting from 3 mg, 6 mg, 8 mg, 12 mg and then 24 mg LY3502970 administered orally once daily until 36 weeks.

Arm type	Experimental
Investigational medicinal product name	24 mg LY3502970
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Participants received maintenance dose 24 mg with dose escalation starting from 3 mg, 6 mg, 8 mg, 12 mg and then 24 mg LY3502970 administered orally once daily until 36 weeks.

<b>Arm title</b>	36 mg-1 LY3502970
------------------	-------------------

Arm description:

Participants received maintenance dose 36 mg with dose escalation starting from 2 mg, 3 mg, 6 mg, 8 mg, 12 mg, 24 mg and then 36 mg LY3502970 administered orally once daily until 36 weeks.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	36 mg LY3502970
Investigational medicinal product code	
Other name

## Baseline characteristics

### Reporting groups

Reporting group title	12 mg LY3502970
Reporting group description:	
Participants received maintenance dose 12 mg with dose escalation starting from 3 mg, 6 mg and then 12 mg LY3502970 administered orally once daily until 36 weeks.	
Reporting group title	24 mg LY3502970
Reporting group description:	
Participants received maintenance dose 24 mg with dose escalation starting from 3 mg, 6 mg, 8 mg, 12 mg and then 24 mg LY3502970 administered orally once daily until 36 weeks.	
Reporting group title	36 mg-1 LY3502970
Reporting group description:	
Participants received maintenance dose 36 mg with dose escalation starting from 2 mg, 3 mg, 6 mg, 8 mg, 12 mg, 24 mg and then 36 mg LY3502970 administered orally once daily until 36 weeks.	
Reporting group title	36 mg-2 LY3502970
Reporting group description:	
Participants received maintenance dose 36 mg with dose escalation starting from 3 mg, 6 mg, 12 mg, 24 mg and then 36 mg LY3502970 administered orally once daily until 36 weeks.	
Reporting group title	45 mg-1 LY3502970
Reporting group description:	
Participants received maintenance dose 45 mg with dose escalation starting from 3 mg, 6 mg, 8 mg, 12 mg, 24 mg, 36 mg and then 45 mg LY3502970 administered orally once daily until 36 weeks.	
Reporting group title	45 mg-2 LY3502970
Reporting group description:	
Participants received maintenance dose 45 mg with dose escalation starting from 2 mg, 3 mg, 6 mg, 12 mg, 24 mg, 36 mg and then 45 mg LY3502970 administered orally once daily until 36 weeks.	
Reporting group title	Placebo
Reporting group description:	
Participants received placebo administered orally once daily until 36 weeks.

## End points

### End points reporting groups

Reporting group title	12 mg LY3502970
Reporting group description: Participants received maintenance dose 12 mg with dose escalation starting from 3 mg, 6 mg and then 12 mg LY3502970 administered orally once daily until 36 weeks.	
Reporting group title	24 mg LY3502970
Reporting group description: Participants received maintenance dose 24 mg with dose escalation starting from 3 mg, 6 mg, 8 mg, 12 mg and then 24 mg LY3502970 administered orally once daily until 36 weeks.	
Reporting group title	36 mg-1 LY3502970
Reporting group description: Participants received maintenance dose 36 mg with dose escalation starting from 2 mg, 3 mg, 6 mg, 8 mg, 12 mg, 24 mg and then 36 mg LY3502970 administered orally once daily until 36 weeks.	
Reporting group title	36 mg-2 LY3502970
Reporting group description: Participants received maintenance dose 36 mg with dose escalation starting from 3 mg, 6 mg, 12 mg, 24 mg and then 36 mg LY3502970 administered orally once daily until 36 weeks.	
Reporting group title	45 mg-1 LY3502970
Reporting group description: Participants received maintenance dose 45 mg with dose escalation starting from 3 mg, 6 mg, 8 mg, 12 mg, 24 mg, 36 mg and then 45 mg LY3502970 administered orally once daily until 36 weeks.	
Reporting group title	45 mg-2 LY3502970
Reporting group description: Participants received maintenance dose 45 mg with dose escalation starting from 2 mg, 3 mg, 6 mg, 12 mg, 24 mg, 36 mg and then 45 mg LY3502970 administered orally once daily until 36 weeks.	
Reporting group title	Placebo
Reporting group description: Participants received placebo administered orally once daily until 36 weeks.	
Subject analysis set title	36 mg LY3502970
Subject analysis set type	Modified intention-to-treat
Subject analysis set description: Participants received maintenance dose 36 mg with dose escalation starting from 2 mg, 3 mg, 6 mg, 8 mg, 12 mg, 24 mg and then 36 mg LY3502970 in LY 36mg-1 and dose escalation starting from 3 mg, 6 mg, 12 mg, 24 mg and then 36 mg LY3502970 in LY 36mg-2 administered orally once daily until 36 weeks.	
Subject analysis set title	45 mg LY3502970
Subject analysis set type	Modified intention-to-treat
Subject analysis set description: Participants received maintenance dose 45 mg with dose escalation starting from 3 mg, 6 mg, 8 mg, 12 mg, 24 mg, 36 mg and then 45 mg LY3502970 in LY 45mg-1 and dose escalation starting from 2 mg, 3 mg, 6 mg, 12 mg, 24 mg, 36 mg and then 45 mg LY3502970 in LY 45mg-2 administered orally once daily until 36 weeks.	
Subject analysis set title	Placebo
Subject analysis set type	Modified intention-to-treat
Subject analysis set description: Participants received placebo administered orally once daily until 36 weeks.	

### Primary: Percent Change from Baseline in Body Weight in LY3502970 and Placebo

End point title	Percent Change from Baseline in Body Weight in LY3502970 and Placebo <sup>[1]</sup>
End point description: Least Squares (LS) mean was determined by mixed model repeated measures (MMRM) model with Baseline + Baseline BMI Group + Sex + Treatment + Time + Treatment*Time (Type III sum of squares)	

as variables. Variance-Covariance structure (Actual Value) = Unstructured. Variance-Covariance structure (Percent Change from Baseline) = Unstructured. Analysis population of description (APD) included all randomized participants who received at least one dose of study drug and had baseline and at least one post-baseline body weight value.

End point type	Primary
End point timeframe:	
Baseline, Week 26	

Notes:

[1] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Descriptive statistics was added in baseline period reporting arms, subject analysis set with evaluable endpoint data.

End point values	12 mg LY3502970	24 mg LY3502970	36 mg LY3502970	45 mg LY3502970

### Statistical analyses

<b>Statistical analysis title</b>	Percentage of Participants with $\geq 5\%$ Body Weight
Comparison groups	12 mg LY3502970 v Placebo
Number of subjects included in analysis	92
Analysis specification	Pre-specified
Analysis type	other
P-value	$< 0.001$
Method	Regression, Logistic
Parameter estimate	Odds ratio (OR)
Point estimate	7.79
Confidence interval	
level	95 %
sides	2-sided
lower limit	2.9
upper limit	20.92

<b>Statistical analysis title</b>	Percentage of Participants with $\geq 5\%$ Body Weight
Comparison groups	24 mg LY3502970 v Placebo
Number of subjects included in analysis	99
Analysis specification	Pre-specified
Analysis type	other
P-value	$< 0.001$
Method	Regression, Logistic
Parameter estimate	Odds ratio (OR)
Point estimate	25.07
Confidence interval	
level	95 %
sides	2-sided
lower limit	7.49
upper limit	83.91

<b>Statistical analysis title</b>	Percentage of Participants with $\geq 5\%$ Body Weight
Comparison groups	36 mg LY3502970 v Placebo
Number of subjects included in analysis	104
Analysis specification	Pre-specified
Analysis type	other
P-value	$< 0.001$
Method	Regression, Logistic
Parameter estimate	Odds ratio (OR)
Point estimate	34.76
Confidence interval	
level	95 %
sides	2-sided
lower limit	8.17
upper limit	147.86

<b>Statistical analysis title</b>	Percentage of Participants with $\geq 5\%$ Body Weight
Comparison groups	45 mg LY3502970 v Placebo
Number of subjects included in analysis	105
Analysis specification	Pre-specified
Analysis type	other
P-value	$< 0.001$
Method	Regression, Logistic
Parameter estimate	Odds ratio (OR)
Point estimate	28.01
Confidence interval	
level	95 %
sides	2-sided
lower limit	8.15
upper limit	96.29

## Secondary: Percentage of Participants with $\geq 10\%$ Body Weight Loss

End point title	Percentage of Participants with $\geq 10\%$ Body Weight Loss <sup>[12]</sup>
-----------------	--

End point description:

Percentage of participants with  $\geq 10\%$  body weight loss was reported. APD included all randomized participants who received at least one dose of study drug and had baseline and at least one post-baseline value for  $\geq 10\%$  body weight reduction.

End point type	Secondary
----------------	-----------

End point timeframe:

Week 36

Notes:

[12] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Descriptive statistics was added in baseline period reporting arms, subject analysis set with evaluable endpoint data.

<b>End point values</b>	12 mg LY3502970	24 mg LY3502970	36 mg LY3502970	45 mg LY3502970

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Baseline through Week 38 (36 weeks follow up with 2 weeks safety follow up)

Adverse event reporting additional description:

All randomized participants who received at least one dose of study drug regardless of adherence to study drug. Gender specific events occurring only in male or female participants have had the number of participants at risk adjusted accordingly.

Assessment type	Systematic
-----------------	------------

### Dictionary used

Dictionary name	MedDRA
-----------------	--------

Dictionary version	25.1
--------------------	------

### Reporting groups

Reporting group title	Placebo
-----------------------	---------

Reporting group description:

Participants received placebo administered orally once daily until 36 weeks.

Reporting group title	12 mg LY3502970
-----------------------	-----------------

Reporting group description:

Participants received maintenance dose 12 mg with dose escalation starting from 3 mg, 6 mg and then 12 mg LY3502970 administered orally once daily until 36 weeks.

Reporting group title	24 mg LY3502970
-----------------------	-----------------

Reporting group description:

Participants received maintenance dose 24 mg with dose escalation starting from 3 mg, 6 mg, 8 mg, 12 mg and then 24 mg LY3502970 administered orally once daily until 36 weeks.

Reporting group title	45 mg-2 LY3502970
-----------------------	-------------------

Reporting group description:

Participants received maintenance dose 45 mg with dose escalation starting from 2 mg, 3 mg, 6 mg, 12 mg, 24 mg, 36 mg and then 45 mg LY3502970 administered orally once daily until 36 weeks.

Reporting group title	36 mg-2 LY3502970
-----------------------	-------------------

Reporting group description:

Participants received maintenance dose 36 mg with dose escalation starting from 3 mg, 6 mg, 12 mg, 24 mg and then 36 mg LY3502970 administered orally once daily until 36 weeks.

Reporting group title	45 mg-1 LY3502970
-----------------------	-------------------

Reporting group description:

Participants received maintenance dose 45 mg with dose escalation starting from 3 mg, 6 mg, 8 mg, 12 mg, 24 mg, 36 mg and then 45 mg LY3502970 administered orally once daily until 36 weeks.

Reporting group title	36 mg-1 LY3502970
-----------------------	-------------------

Reporting group description:

Participants received maintenance dose 36 mg with dose escalation starting from 2 mg, 3 mg, 6 mg, 8 mg, 12 mg, 24 mg and then 36 mg LY3502970 administered orally once daily until 36 weeks.

Notes:

[1] - The number of subjects exposed to this adverse event is less than the total number of subjects exposed for the reporting group. These numbers are expected to be equal.

Justification: Gender specific events occurring only in male or female participants have had the number of participants at risk adjusted accordingly.

[2] - The number of subjects exposed to this adverse event is less than the total number of subjects exposed for the reporting group. These numbers are expected to be equal.

Justification: Gender specific events occurring only in male or female participants have had the number of participants at risk adjusted accordingly.

[3] - The number of subjects exposed to this adverse event is less than the total number of subjects exposed for the reporting group. These numbers are expected to be equal.

Justification: Gender specific events occurring only in male or female participants have had the number of participants at risk adjusted accordingly.

[4] - The number of subjects exposed to this adverse event is less than the total number of subjects exposed for the reporting group. These numbers are expected to be equal.

Justification: Gender specific events occurring only in male or female participants have had the number of participants at risk adjusted accordingly.

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
27 September 2021	Modified schedule of activities; - Objectives, overview of study periods and exclusion criteria were updated; - Provided additional guidance on Concomitant therapy; - Clarified QTc stopping criteria; - Changed wording regarding restarting study drug through IWRS; - Removed ABPM measurements and lipids measurements from exploratory efficacy assessments; - Statistical analysis general considerations were modified.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
