

Clinical trial results:

A Phase 3, Open Label, Randomized, Non-Inferiority Pharmacokinetic Study of Nivolumab

Subcutaneous (Nivo SC) Versus Intravenous (Nivo IV) Administration in Participants with Stage IIIA/B/C/D or Stage IV Adjuvant Melanoma Following Complete Resection

Summary

EudraCT number	2021-003208-42
Trial protocol	ES BE PL DE IT
Global end of trial date	08 February 2024

Results information

Result version number	v1 (current)
This version publication date	22 February 2025
First version publication date	22 February 2025

Trial information

Trial identification

Sponsor protocol code	CA209-6GE

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	08 February 2024
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	08 February 2024
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To assess the safety and tolerability of nivolumab SC co-formulated with rHuPH20 and nivolumab IV

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and in compliance with all International Conference on Harmonization Good Clinical Practice Guidelines. All the local regulatory requirements pertinent to safety of trial subjects were followed.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 April 2022
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 10
Country: Number of subjects enrolled	Italy: 1
Country: Number of subjects enrolled	Belgium: 1
Country: Number of subjects enrolled	United States: 2
Worldwide total number of subjects	14
EEA total number of subjects	12

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	12
From 65 to 84 years	2

85 years and over	0
-------------------	---

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

14 participants were randomized and treated

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Arm A

Arm description:

Nivo SC (BMS-986298) 600 mg with 8,000 U of rHuPH20 administered via 2 sequential injections Q2W. Nivo SC will be administered in-clinic through cycle 5, Day 1.

Arm type	Experimental
Investigational medicinal product name	nivolumab/rHuPH20
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

150 mg/mL/2,000 U/mL Nivolumab/rHuPH20

Arm title	Arm B
------------------	-------

Arm description:

-Nivo IV (BMS-936558) 240 mg Q2W for Cycles 1 through 4. -Nivo IV 480 mg Q4W Cycle 5 onwards for up to total of 52 weeks. -All dosing will be performed in-clinic.

Arm type	Experimental
Investigational medicinal product name	nivolumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravascular use

Dosage and administration details:

10mg/mL

Primary: Number of Participants with Adverse Events

End point title	Number of Participants with Adverse Events ^[1]
End point description: An adverse event (AE) is defined as any new untoward medical occurrence or worsening of a pre-existing medical condition in a clinical investigation participant administered study treatment that does not necessarily have a causal relationship with this treatment. An AE can therefore be any unfavorable and unintended sign (such as an abnormal laboratory finding), symptom, or disease temporally associated with the use of study treatment, whether or not considered related to the study treatment.	
End point type	Primary
End point timeframe: From first dose to 100 days post last dose (Approximately up to 14 Months)	
Notes: [1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point. Justification: No statistical analysis done for this endpoint

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse Events and Serious Adverse Events: (From first dose to last dose + 100 days): Approximately 14 Months

All-Cause mortality (From randomization to end of study): Approximately 14 Months

Adverse event reporting additional description:

The number at Risk for All-Cause Mortality represents all Randomized Participants. The number at Risk for Serious Adverse Events and Other (Not Including Serious) Adverse Events represents all participants that received at least 1 dose of study medication

Assessment type	Systematic

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
25 May 2023	<p>Bristol-Myers Squibb has made a strategic decision to terminate the CA2096GE trial. This decision was not related to any safety concerns. Study recruitment has closed and treatment of ongoing, active participants will continue per Protocol Amendment 01. Changes implemented in this amendment aim to alleviate participant and site burden and include updates to sample collection, study procedures, and study design.</p> <p>Pharmacokinetic (PK) co-primary endpoints, and secondary endpoints have been removed. Efficacy, patient-reported outcomes (PROs), and biomarker analyses will not be completed. Samples already collected for PK and immunogenicity assessments will be analyzed bioanalytically for nivolumab concentrations and anti-drug antibodies (ADAs) and reported as listings. Further collections for PK, ADAs, biomarkers, and PROs will be discontinued. Only safety assessments will be conducted.</p> <p>Part 2 was removed (Part 2 was scheduled to start when 90% of participants in Part 1 were enrolled).</p> <p>Balanced the frequency of clinic visits between treatment arms.</p>

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
