Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	25 October 2024
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	25 October 2024
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The main purpose of the study was to evaluate participant preference for atezolizumab subcutaneous (SC) administration compared with atezolizumab intravenous (IV).

Protection of trial subjects:

All study participants were required to read and sign an Informed Consent Form.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	04 April 2022
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Argentina: 21
Country: Number of subjects enrolled	Brazil: 4
Country: Number of subjects enrolled	Canada: 8
Country: Number of subjects enrolled	Costa Rica: 8
Country: Number of subjects enrolled	Chile: 1
Country: Number of subjects enrolled	Finland: 8
Country: Number of subjects enrolled	Italy: 20
Country: Number of subjects enrolled	Korea, Democratic People's Republic of: 14
Country: Number of subjects enrolled	Latvia: 20
Country: Number of subjects enrolled	Poland: 28
Country: Number of subjects enrolled	Spain: 39
Country: Number of subjects enrolled	United States: 8
Worldwide total number of subjects	179
EEA total number of subjects	115

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0

Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	74
From 65 to 84 years	102
85 years and over	3

Subject disposition

Recruitment

Recruitment details:

Participants took part in the study across 37 investigative sites in 12 countries (Spain, Brazil, Finland, Italy, United States, Argentina, Canada, Republic of Korea, Costa Rica, Latvia, Poland, and Chile) from 04 April 2022 to 25 October 2024.

Pre-assignment

Screening details:

A total of 179 participants with non-small cell lung cancer (NSCLC) were randomized in 1:1 ratio to Arm A (atezolizumab IV followed by atezolizumab SC) or Arm B (atezolizumab SC followed by atezolizumab IV). The study consists of two periods: Treatment Crossover Period, and Treatment Continuation Period.

Period 1

Period 1 title	Treatment Crossover Period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Crossover Atezolizumab IV/SC

Arm description:

Participants were administered atezolizumab, IV infusion, 1200 milligrams (mg), every 3 weeks (Q3W) for 3 cycles followed by atezolizumab, SC injections, 1875 mg, Q3W, for the next 3 cycles (cycle length=21 days) in the Treatment Crossover Period.

Arm type	Experimental
Investigational medicinal product name	Atezolizumab IV
Investigational medicinal product code	RO5541267
Other name	Tecentriq, MPDL3280A
Pharmaceutical forms	Concentrate for solution for injection/infusion
Routes of administration	Intravenous use

Dosage and administration details:

Atezolizumab, 1200 mg, Q3W as IV infusion on Day 1 of Cycles 1 to 3 (each cycle 21-day) or until loss of clinical benefit.

Investigational medicinal product name	Atezolizumab SC
Investigational medicinal product code	RO5541267
Other name	Tecentriq, MPDL3280A
Pharmaceutical forms	Concentrate for solution for injection/infusion
Routes of administration	Subcutaneous use

Dosage and administration details:

Atezolizumab, 1875 mg, Q3W SC on Day 1 of Cycles 4 to 6 (each cycle 21-day) or until loss of clinical benefit.

Arm title	Crossover Atezolizumab SC/IV
------------------	------------------------------

Arm description:

Participants were administered atezolizumab, SC injections, 1875 mg, Q3W for 3 cycles followed by atezolizumab, IV, 1200 mg, Q3W, for the next 3 cycles (cycle length=21 days) in the Treatment Crossover Period.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Atezolizumab IV
Investigational medicinal product code	RO5541267
Other name	Tecentriq, MPDL3280A
Pharmaceutical forms	Concentrate for solution for injection/infusion
Routes of administration	Intravenous use

Dosage and administration details:

Atezolizumab, 1200 mg, Q3W as IV infusion on Day 1 of Cycles 4 to 6 (each cycle 21-day) or until loss of clinical benefit.

Investigational medicinal product name	Atezolizumab SC
Investigational medicinal product code	RO5541267
Other name	Tecentriq, MPDL3280A
Pharmaceutical forms	Concentrate for solution for injection/infusion
Routes of administration	Subcutaneous use

Dosage and administration details:

Atezolizumab, 1875 mg, Q3W SC on Day 1 of Cycles 1 to 3 (each cycle 21-day) or until loss of clinical benefit.

Number of subjects in period 1	Crossover Atezolizumab IV/SC	Crossover Atezolizumab SC/IV
Started	89	90
Completed	55	60
Not completed	34	30

Period 2

Period 2 title	Treatment Continuation Period
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Continuation Atezolizumab IV
Arm description: After 6 cycles of Crossover Period, participants were given an option to choose between IV or SC administration of atezolizumab for the Treatment Continuation Period. Participants in this arm chose to continue treatment with atezolizumab IV, 1200 mg Q3W up to Cycle 16 for participants with early-stage NSCLC or until loss of clinical benefit for participants with advanced NSCLC.	
Arm type	Experimental
Investigational medicinal product name	Atezolizumab IV
Investigational medicinal product code	RO5541267
Other name	Tecentriq, MPDL3280A
Pharmaceutical forms	Concentrate for solution for injection/infusion
Routes of administration	Intravenous use

Dosage and administration details:

Atezolizumab, 1200 mg, Q3W as IV infusion on Day 1 of each 21-day cycle from cycle 6 for up to 16 cycles or until loss of clinical benefit.

Arm title	Continuation Atezolizumab SC
Arm description: After 6 cycles of Crossover Period, participants were given an option to choose between IV or SC administration of atezolizumab for the Treatment Continuation Period. Participants in this arm chose to continue treatment with atezolizumab SC, 1875 mg Q3W up to Cycle 16 for participants with early-stage NSCLC or until loss of clinical benefit for participants with advanced NSCLC.	
Arm type	Experimental
Investigational medicinal product name	Atezolizumab SC
Investigational medicinal product code	RO5541267
Other name	Tecentriq, MPDL3280A
Pharmaceutical forms	Concentrate for solution for injection/infusion
Routes of administration	Subcutaneous use

Dosage and administration details:

Atezolizumab, 1875 mg, Q3W SC on Day 1 of each 21-day cycle from cycle 6 for up to 16 cycles or until loss of clinical benefit.

Number of subjects in period 2	Continuation Atezolizumab IV	Continuation Atezolizumab SC

Subject analysis set title	Atezolizumab IV/SC
Subject analysis set type	Sub-group analysis
Subject analysis set description: Participants were administered atezolizumab, IV infusion, 1200 mg, Q3W for 3 cycles followed by atezolizumab, SC injections, 1875 mg, Q3W, for the next 3 cycles (cycle length=21 days) in the Treatment Crossover Period. HCPs who prepared and/or administered the IV/SC formulations completed the HCPQ questionnaire.	
Subject analysis set title	Atezolizumab SC/IV
Subject analysis set type	Sub-group analysis
Subject analysis set description: Participants were administered atezolizumab, SC injections, 1875 mg, Q3W for 3 cycles followed by	

atezolizumab, IV, 1200 mg, Q3W, for the next 3 cycles (cycle length=21 days) in the Treatment Crossover Period. HCPs who prepared and/or administered the IV/SC formulations completed the HCPQ questionnaire.

Subject analysis set title	Atezolizumab
Subject analysis set type	Full analysis

Subject analysis set description:

Participants received atezolizumab IV, 1200 mg and/or SC, 1875 mg Q3W up to Cycle 16 in Treatment Crossover Period and Treatment Continuation Period for participants with early-stage NSCLC or until loss of clinical benefit for participants with advanced NSCLC.

Subject analysis set title	Crossover Atezolizumab IV
Subject analysis set type	Sub-group analysis

Subject analysis set description:

Participants who were administered atezolizumab, IV infusion, 1200 mg, Q3W in Cycles 1 to 3 or Cycles 4 to 6 (cycle length=21 days), depending on the sequence (IV/SC or SC/IV) they were assigned in the Treatment Crossover Period are reported in this arm.

Subject analysis set title	Crossover Atezolizumab SC
Subject analysis set type	Sub-group analysis

Subject analysis set description:

Participants who were administered atezolizumab, SC injections, 1875 mg, Q3W for Cycles 1 to 3 or Cycles 4 to 6 (cycle length=21 days), depending on the sequence (IV/SC or SC/IV) they were assigned in the Treatment Crossover Period are reported in this arm.

Subject analysis set title	Continuation Atezolizumab IV
Subject analysis set type	Sub-group analysis

Subject analysis set description:

Participants in this arm chose to continue treatment with atezolizumab IV, 1200 mg Q3W up to Cycle 16 for participants with early-stage NSCLC or until loss of clinical benefit for participants with advanced NSCLC.

Subject analysis set title	Continuation Atezolizumab SC
Subject analysis set type	Sub-group analysis

Subject analysis set description:

Participants in this arm chose to continue treatment with atezolizumab SC, 1875 mg Q3W up to Cycle 16 for participants with early-stage NSCLC or until loss of clinical benefit for participants with advanced NSCLC.

Subject analysis set title	All Participants
Subject analysis set type	Per protocol

Subject analysis set description:

Participants either received atezolizumab IV, 1200 mg for the first 3 cycles, followed by SC, 1875 mg for the next three cycles, or atezolizumab SC 1875 mg, for the first 3 cycles, followed by IV 1200 mg for the next three cycles during the Treatment Crossover Period.

Primary: Percentage of Participants Who Preferred Atezolizumab SC to Atezolizumab IV Assessed Using Patient Preference Questionnaire (PPQ)

End point title	Percentage of Participants Who Preferred Atezolizumab SC to Atezolizumab IV Assessed Using Patient Preference Questionnaire (PPQ) ^[1]
-----------------	--

End point description:

Participants preference was assessed based on Question 1 (Q1) of PPQ. Q1: All things considered, which route of administration did you prefer? asks participants to report their preference for route of administration (IV/SC/preference). A point estimate with associated 95% CI for percentage of participants who preferred atezolizumab SC was calculated. Participants experiencing any of the following events: treatment withdrawal before eligibility for PPQ, or death without answering Q1 of PPQ, or treatment not started, were excluded from analysis set. Participants who answered Q1 of PPQ without having at least 2 consecutive administrations of treatment with each administration modality (SC & IV) were excluded from analysis. As planned participant preference was presented by overall (all participants) & by randomized treatment sequence using Full Analysis Set (FAS). FAS=all randomized participants. Number analyzed=number of participants who answered Q1 of PPQ. Percentages are rounded off.

End point type	Primary
----------------	---------

End point timeframe:

Cycle 6 Day 1 (cycle length=21 days)

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive statistics were planned for this endpoint.

End point values	Crossover Atezolizumab IV/SC	Crossover Atezolizumab SC/IV	All Participants

Secondary: Number of Participants by Their Level of Satisfaction With Atezolizumab SC and Atezolizumab IV Assessed Using Therapy Administration Satisfaction Questionnaire – Subcutaneous (TASQ-SC) and Intravenous (TASQ-IV)

End point title	Number of Participants by Their Level of Satisfaction With Atezolizumab SC and Atezolizumab IV Assessed Using Therapy Administration Satisfaction Questionnaire – Subcutaneous (TASQ-SC) and Intravenous (TASQ-IV)
-----------------	--

End point description:

TASQ=12-item, participant-reported questionnaire measuring the impact of each mode of treatment administration (TASQ-IV=IV treatment & TASQ-SC=SC treatment) on 5 domains: Physical Impact, Psychological Impact, Impact on Activities of Daily Living, Convenience, & Satisfaction. TASQ-IV/-SC was administered at treatment Cycles 3 & 6 according to order of treatment received per arm during Crossover Period. Participants satisfaction was assessed based on the Q1 of TASQ-IV/SC which asks participants about their satisfaction with respect to route of administration (very satisfied, satisfied, neither satisfied nor dissatisfied, dissatisfied, participant didn't answer question). TASQ- IV (Q1-How satisfied/dissatisfied were you with IV infusion?) & TASQ- SC (How satisfied or dissatisfied were you with SC injection?). FAS included all randomized participants. Number analyzed=number of participants with data available for analysis. n=number of participants who answered Q1 of TASQ IV/SC.

Secondary: Duration of Treatment Preparation According to Healthcare Professionals (HCPs) Response to Perception of Time, Assessed Using Question 1 of HCPQs – Drug Preparation Area

End point title	Duration of Treatment Preparation According to Healthcare Professionals (HCPs) Response to Perception of Time, Assessed
-----------------	---

End point description:

The HCPQ- Drug Preparation Area Question 1 was completed by the HCPs within the pharmacy/drug preparation area where atezolizumab IV reconstitution or atezolizumab SC was prepared before the actual drug administration took place. The HCPQs were completed for every participant at each treatment cycle (Cycles 1–6, i.e., 3 cycles of atezolizumab IV followed by 3 cycles of atezolizumab SC or vice versa) of the treatment cross-over period. HCPs responded to the following parts of Question 1 that sought to evaluate the amount of time it took to prepare the IV infusion/SC injection of atezolizumab: "How long (in minutes) did it take to prepare the treatment for use?". Number analyzed included HCPs who completed Question 1 of the survey. "n"=number of HCPs who completed Question 1 of the survey at the specified treatment cycles.

Secondary: Percentage of HCPs by Their Response to Perception of Time/Resource Use for Atezolizumab SC and Atezolizumab IV, Assessed Using Questions 3 and 4 of HCPQ - Drug Preparation Area

End point title	Percentage of HCPs by Their Response to Perception of Time/Resource Use for Atezolizumab SC and Atezolizumab IV, Assessed Using Questions 3 and 4 of HCPQ - Drug Preparation Area
End point description:	HCPs who prepared study treatment within the pharmacy/drug preparation area responded at Cycle 6 of the Treatment Crossover Period to the following HCPQ-Drug Preparation Area Questions 3 and 4: "Looking back over the Atezolizumab treatment sessions, please indicate based on your opinion which administration method: Q3. Was quickest from start to end of preparation to finish of administration (excluding observation period)?; Q4. Required less resource use for preparation and administration, for example nursing time, facility costs, equipment etc?" The four available response options were: Atezolizumab IV, Atezolizumab SC, No Difference, and Missing. Number analyzed included HCPs who completed Questions 3 and 4 of the survey at treatment Cycle 6. Percentages have been rounded off.

Secondary: Change From Baseline Over Time in Health-related Quality of Life (HRQoL) Score as Assessed by GHS/QoL Scale of the EORTC-QLQ-C30

End point title	Change From Baseline Over Time in Health-related Quality of Life (HRQoL) Score as Assessed by GHS/QoL Scale of the EORTC-QLQ-C30
-----------------	--

End point description:

EORTC QLQ-C30 consists of 30 questions that assess participant functioning (physical, emotional, role, cognitive, and social), symptom scales (fatigue, nausea and vomiting, pain), global health/ QoL, and six single items (dyspnea, insomnia, appetite loss, constipation, diarrhea, and financial difficulties). Change in HRQoL was assessed using participant responses to questions regarding Global Health Status (Q29: GHS; "How would you rate your overall health during the past week?") and QoL (Q30: QoL; "How would you rate your overall quality of life during the past week?") and were scored on a 7-point scale (1= Very poor to 7=Excellent). Using linear transformation, raw scores are standardized. Scores range from 0-100. A higher score indicates a better outcome. FAS=all randomized participants. Number analyzed=participants with data available for analysis. n=participants with data available for analysis at specified timepoint. 9999=no participants were analyzed at this timepoint.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
28 February 2022	<ol style="list-style-type: none">1. An error was corrected in the rational for the participant population regarding the dose to be used.2. The eligibility requirement for a life expectancy of ≥ 18 weeks was updated to be in the opinion of the investigator.3. A pathology report must also be provided if samples were sent to a central laboratory for EGFR and/or Anaplastic Lymphoma Kinase (ALK) testing.4. Coagulation testing was only required at screening.
07 March 2023	<ol style="list-style-type: none">1. The two exploratory immunogenicity objectives were merged into one streamlined objective encompassing the two.2. The estimated sample size of the study was increased from approximately 140 participants to approximately 175 participants.3. Endobronchial ultrasound-guided transbronchial needle aspiration was clarified to be an accepted sampling method for a right thoracotomy.4. The definitions of the study populations and variables were replaced by cross-references to the Statistical Analysis Plan.5. Steps 7 and 8 of the procedure in the event of a suspected anaphylactic reaction during study treatment infusion were removed because they are no longer required for atezolizumab.6. The list of identified risks for atezolizumab was revised to include facial paresis, myelitis, pericardial disorders, and hemophagocytic lymphohistiocytosis.7. The autoimmune diseases and immune deficiencies table in Appendix 7 was revised to include autoimmune myelitis.
27 February 2024	<ol style="list-style-type: none">1. The list of approved indications for atezolizumab has been updated to include alveolar soft part sarcoma.2. The safety follow-up duration was clarified to include safety follow-up every 90 days until the end of the trial3. Personal identifiable information (i.e., name and telephone number) for the Medical Monitors has been removed from the protocol (front matter and Section 5.4.1). Medical Monitor contact information in Section 5.4.1 has been replaced with a sentence indicating that this information will be provided separately to sites.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
