Global end of trial date	28 May 2024
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective of this study was to evaluate the effect of obicetrapib on low-density lipoprotein cholesterol (LDL-C) levels at Day 84.

Protection of trial subjects:

The study was conducted in accordance with the Declaration of Helsinki and with all applicable laws and regulations of the locale and country where the study was conducted, and in compliance with Good Clinical Practice Guidelines

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	20 July 2022
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes
