

Clinical trial results: Hyperpolarized xenon lung MRI in long-term COVID19 Summary

EudraCT number	2021-006335-26
Trial protocol	DK
Global end of trial date	05 September 2024

Results information

Result version number	v1 (current)
This version publication date	23 October 2025
First version publication date	23 October 2025

Trial information

Trial identification

Sponsor protocol code	Xe-long-COVID
-----------------------	---------------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

Sponsors

Sponsor organisation name	Aarhus University
Sponsor organisation address	Palle Juul-Jensens Boulevard 99, Aarhus, Denmark, 8200
Public contact	MR Research Center, Aarhus University, cl@clin.au.dk
Scientific contact	MR Research Center, Aarhus University, cl@clin.au.dk

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	05 September 2024
Is this the analysis of the primary completion data?	Yes
Primary completion date	29 August 2024
Global end of trial reached?	Yes
Global end of trial date	05 September 2024
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

To study lung gas uptake in long COVID19

Protection of trial subjects:

All subject were thoroughly screened for MRI contraindications.

During IMP inhalation, peripheal saturation was continuously monitored, and subjects were instructed to resume breathing if the saturation dropped below 85% or more than 5%-points.

Background therapy: -

Evidence for comparator:

An age and gender matched control group was recruited to compare to the gas transfer of patients

Actual start date of recruitment	01 July 2023
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Denmark: 22
Worldwide total number of subjects	22
EEA total number of subjects	22

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	19
From 65 to 84 years	3
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Patients were contacted through the long covid-19 clinic, at the department of infectious diseases, Aarhus University hospital. Healthy through public advertisement. If a subject was interested in participation, they were contacted by sponsors representative to elaborate on the study. If still interested, a date for inclusion was set as appropriate

Pre-assignment

Screening details:

Screening was based on the patient self reported health scales with medical research council score above 2.

Period 1

Period 1 title	Overall Trial (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Blinding implementation details:

Explorative physiological study

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Patients
------------------	----------

Arm description:

PAlients with Post COVID-19 Condition with MRC dyspnea above 2

Arm type	Experimental
Investigational medicinal product name	xenon
Investigational medicinal product code	PRD10485456
Other name	Xenon-129
Pharmaceutical forms	Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

For subjects of height 160 cm and above: 500 ml mixed with 500 ml nitrogen.

For subjects of height 150 cm till 160 cm: 450ml mixed with 350 ml nitrogen.

Arm title	Healthy Controls
------------------	------------------

Arm description:

Healthy age and gender matched controls

Arm type	Active comparator
Investigational medicinal product name	Xenon
Investigational medicinal product code	PRD10485456
Other name	Xenon-129
Pharmaceutical forms	Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

For subjects of height 160 cm and above: 500 ml mixed with 500 ml nitrogen.

For subjects of height 150 cm till 160 cm: 450ml mixed with 350 ml nitrogen.

Number of subjects in period 1	Patients	Healthy Controls
Started	14	8
Completed	14	8

alternative assessment type: Non-systematic			

subjects affected / exposed	1 / 14 (7.14%)	0 / 8 (0.00%)	
occurrences (all)	1	0	
Taste disorder	Additional description: taste of metal		
subjects affected / exposed	1 / 14 (7.14%)	1 / 8 (12.50%)	
occurrences (all)	1	1	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Study was terminated early due to slow recruitment. This lead to a smaller than desired sample size.
