Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
--	----

Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	05 June 2024
Is this the analysis of the primary completion data?	Yes
Primary completion date	31 December 2023
Global end of trial reached?	Yes
Global end of trial date	31 December 2023
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

The overarching goal of the trial is to find effective strategies for inpatient management of patients with COVID-19. Therapeutic goals for patients hospitalized for COVID-19 include hastening recovery and preventing progression to critical illness, multiorgan failure, or death. Our objective is to determine whether modulating the host tissue response improves clinical outcomes among patients with COVID-19.

The overarching objective of this platform is to iteratively test treatment strategies targeting the host tissue response for improving clinical outcomes among adults hospitalized with COVID-19. Treatment strategies will be added to the current best practice and tested against best practice plus placebo. Best practice may itself be updated as therapies become available or are shown to be effective (or ineffective).

Protection of trial subjects:

The safety profile of the selected agents being considered for this platform is based on prior clinical trials in patients with acute illness, both COVID-19 and non-COVID-19 related. Intensive patient monitoring in the clinical setting during and immediately following treatment was used planned to ensure protection of trial subjects.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 July 2022
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 19
Country: Number of subjects enrolled	Germany: 1
Country: Number of subjects enrolled	Italy: 2
Country: Number of subjects enrolled	Brazil: 1
Country: Number of subjects enrolled	South Africa: 5
Country: Number of subjects enrolled	United States: 871

Worldwide total number of subjects	899
EEA total number of subjects	22

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	514
From 65 to 84 years	385
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Participants were recruited following hospital admission with COVID-19

Pre-assignment

Screening details:

Participants were over 18 years old with documented SARS-COV-2 infection confirmed by nucleic acid test. Participants were assigned to one of the three therapies (TRV-027, TXA-127, and Fostamatinib) and either the active drug or matching placebo.

Pre-assignment period milestones

Number of subjects started	6046 ^[1]
Intermediate milestone: Number of subjects	Randomised: 899
Number of subjects completed	899 ^[2]

Pre-assignment subject non-completion reasons

Reason: Number of subjects	Ineligible: 3524
Reason: Number of subjects	Declined: 856
Reason: Number of subjects	Not approached: 352
Reason: Number of subjects	the patient was to be discharged from the hospital: 415

Notes:

[1] - The number of subjects reported to have started the pre-assignment period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Placebo participants were pooled across trials. Specifically, for each trial, the placebo comparator group consisted of all placebo participants that were eligible for that trial at the time of randomization. Each participant is identified by the trial (i.e., the study drug) and active/placebo assignment at randomization and, for placebo participants, the trials for which that participant was eligible,

[2] - The number of subjects reported to be in the pre-assignment period is not consistent with the number starting period 1. It is expected that the number completing the pre-assignment period are also present in the arms in period 1.

Justification: Placebo participants were pooled across trials. Specifically, for each trial, the placebo comparator group consisted of all placebo participants that were eligible for that trial at the time of randomization. Each participant is identified by the trial (i.e., the study drug) and active/placebo assignment at randomization and, for placebo participants, the trials for which that participant was eligible,

Period 1

Period 1 title	Post randomisation- Study Period (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor

Arms

Are arms mutually exclusive?	No
Arm title	TRV-027 Active
Arm description: -	
Arm type	Experimental

Investigational medicinal product name	TRV-027
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for solution for infusion
Routes of administration	Intravenous use
Dosage and administration details:	
Dosage of 12 mg/h as a continuous 24- hour infusion, will be infused for 5 days or until hospital discharge, whichever comes first.	
Arm title	TXA-127 Active
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	TXA-127
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for solution for infusion
Routes of administration	Intravenous drip use
Dosage and administration details:	
0.5 mg/kg/day will be infused for 3 hours daily for 5 days or until hospital discharge, whichever comes first.	
Arm title	Fostamatinib Active
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	Fostamatinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Coated tablet
Routes of administration	Oral use
Dosage and administration details:	
150mg or 100mg tablets will be taken twice daily for a total of 14 days	
Arm title	Fostamatinib Placebo
Arm description: -	
Arm type	Placebo
Investigational medicinal product name	Fostamatinib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Coated tablet
Routes of administration	Oral use
Dosage and administration details:	
150mg whole tablets administered orally twice a day for 14 days.	
Arm title	TXA-127 Placebo
Arm description: -	
Arm type	Placebo
Investigational medicinal product name	Sterile saline
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use
Dosage and administration details:	
Single daily intravenous infusion of 100ml for 3 days	
Arm title	TRV-027 Placebo

Arm description: -	
Arm type	Placebo
Investigational medicinal product name	Sterile saline
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

275ml solution will be administered through continuous 24 hour intravenous infusion for 5 days

Number of subjects in period 1	TRV-027 Active	TXA-127 Active	Fostamatinib Active
Started	149	176	207
Completed	99	124	152

Statistical analyses

Statistical analysis title	Effect of study agent vs placebo Fostamatinib
Comparison groups	Fostamatinib Active v Fostamatinib Placebo
Number of subjects included in analysis	400
Analysis specification	Pre-specified
Analysis type	other ^[1]
Method	Regression, Logistic
Parameter estimate	Odds ratio (OR)
Point estimate	0.82
Confidence interval	
level	95 %
sides	2-sided
lower limit	0.58
upper limit	1.17
Variability estimate	Standard deviation

Notes:

[1] - The effect of the active drug versus placebo will be quantified using an odds ratio – the primary estimand – which quantifies the treatment effect on the odds of greater oxygen-free days at day 28. Evidence for efficacy will be quantified using the posterior probability that the active drug versus placebo odds ratio is greater than one (i.e., treatment is associated with greater oxygen free days at day 28)

Statistical analysis title	Effect of study agent vs placebo TXA-127

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
07 June 2022	Remove TRV-027 and TXA-127 from the platform Update to exclusion criteria #1 and #2 to provide clarification Revised fostamatinib appendix to clarify exclusions of concomitant use with strong CYP3A4 medications
16 September 2022	Minor changes to respond to international regulatory requests Updated text to clarify emergency unblinding
18 October 2022	Added definition of Adverse Events of Special Interest (AESIs)

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
26 September 2023	Fostamatinib study arm ceased enrollment and discontinued study medication following the DSMB recommendation released on the 26th September 2023.	-

Notes:

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Patients assigned to placebo TXA-127 or TRV-027 were included in the fostamatinib placebo group. Shared placebo group reduces the total number of patients who received placebo, accounting for difference in baseline total and reporting group total

Notes:
