

Clinical trial results:

A Randomized, Double-Blind, 12-Week (with an Extension to 52 Weeks in a subset of Participants), Multi-Center Study to Assess the Safety of Budesonide, Glycopyrronium, and Formoterol Fumarate (BGF) Delivered by MDI HFO Compared to BGF delivered by MDI HFA in Participants with Moderate to Very Severe Chronic Obstructive Pulmonary Disease (COPD)

Summary

EudraCT number	2022-001476-33
Trial protocol	DE PL BG
Global end of trial date	26 March 2024

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	10 June 2024
Is this the analysis of the primary completion data?	Yes
Primary completion date	26 March 2024
Global end of trial reached?	Yes
Global end of trial date	26 March 2024
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To assess the safety and tolerability of BGF MDI HFO as compared to BGF MDI HFA over 12 to 52 weeks in participants with moderate to very severe COPD.

Protection of trial subjects:

Immediate safety concerns should be discussed with the Sponsor immediately upon occurrence or awareness to determine if the participant should continue or discontinue study intervention.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	27 September 2022
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Argentina: 69
Country: Number of subjects enrolled	Canada: 72
Country: Number of subjects enrolled	Mexico: 18
Country: Number of subjects enrolled	United States: 111
Country: Number of subjects enrolled	Bulgaria: 55
Country: Number of subjects enrolled	Germany: 140
Country: Number of subjects enrolled	Poland: 71
Country: Number of subjects enrolled	Türkiye: 5
Country: Number of subjects enrolled	United Kingdom: 18
Worldwide total number of subjects	559
EEA total number of subjects	266

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23	0

months)	
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	177
From 65 to 84 years	382
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details: -

Pre-assignment period milestones

Number of subjects started	874 ^[1]
----------------------------	--------------------

Number of subjects completed	559
------------------------------	-----

Pre-assignment subject non-completion reasons

Reason: Number of subjects	Screen failures: 311
----------------------------	----------------------

Reason: Number of subjects	Not randomised and not screen failed: 4
----------------------------	---

Notes:

[1] - The number of subjects reported to have started the pre-assignment period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Pre-assignment is the screening period, and the number screened is not expected to equal the number enrolled/randomised.

Period 1

Period 1 title	Randomisation
----------------	---------------

Is this the baseline period?	Yes
------------------------------	-----

Allocation method	Randomised - controlled
-------------------	-------------------------

Blinding used	Double blind
---------------	--------------

Roles blinded	Subject, Investigator, Monitor, Carer, Data analyst, Assessor
---------------	---

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	BGF MDI HFO 320/14.4/9.6 µg
------------------	-----------------------------

Arm description:

Budesonide, Glycopyrronium, and Formoterol Fumarate (BGF) Delivered by MDI HFO (HFO-1234ze)

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Budesonide/ Glycopyrronium/ Formoterol fumarate pressurized inhalation suspension, HFO
--	--

Investigational medicinal product code	
--	--

Other name	
------------	--

Pharmaceutical forms	Inhalation vapour, Inhalation solution
----------------------	--

Routes of administration	Inhalation use
--------------------------	----------------

Dosage and administration details:

160/7.2/4.8 µg per actuation. 2 inhalations BID.

Arm title	BGF MDI HFA 320/14.4/9.6 µg
------------------	-----------------------------

Arm description:

Budesonide, Glycopyrronium, and Formoterol Fumarate (BGF) Delivered by MDI HFA

Arm type	Active comparator
----------	-------------------

Investigational medicinal product name	Budesonide/ Glycopyrronium/ Formoterol fumarate pressurized inhalation suspension, HFA
--	--

Investigational medicinal product code	
--	--

Other name	
------------	--

Pharmaceutical forms	Inhalation solution
----------------------	---------------------

Routes of administration	Inhalation use
--------------------------	----------------

Dosage and administration details:

160/7.2/4.8 µg per actuation. 2 inhalations BID.

Number of subjects in period 1	BGF MDI HFO 320/14.4/9.6 µg	BGF MDI HFA 320/14.4/9.6 µg
Started	280	279
Completed	280	279

Period 2

Period 2 title	12-week treatment period
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Data analyst, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	BGF MDI HFO 320/14.4/9.6 µg

Arm description:

Budesonide, Glycopyrronium, and Formoterol Fumarate (BGF) Delivered by MDI HFO (HFO-1234ze)

Arm type	Experimental
Investigational medicinal product name	Budesonide/ Glycopyrronium/ Formoterol fumarate pressurized inhalation suspension, HFO
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation vapour, Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

160/7.2/4.8 µg per actuation. 2 inhalations BID.

Arm title	BGF MDI HFA 320/14.4/9.6 µg
------------------	-----------------------------

Arm description:

Budesonide, Glycopyrronium, and Formoterol Fumarate (BGF) Delivered by MDI HFA

Arm type	Active comparator
Investigational medicinal product name	Budesonide/ Glycopyrronium/ Formoterol fumarate pressurized inhalation suspension, HFA
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

160/7.2/4.8 µg per actuation. 2 inhalations BID.

Number of subjects in period 2	BGF MDI HFO 320/14.4/9.6 µg	BGF MDI HFA 320/14.4/9.6 µg
Started	280	279
Started treatment	280	278
Completed	235	257
Not completed	45	22
Consent withdrawn by subject	8	5
Physician decision	1	2
Adverse event, non-fatal	20	9
Protocol-specified withdrawal criterion met	1	-
Lost to follow-up	2	-
Randomised, not treated	-	1
Discontinued intervention - other reason	10	4
Protocol deviation	3	1

Period 3

Period 3 title	52-week treatment period
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Data analyst, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	BGF MDI HFO 320/14.4/9.6 µg

Arm description:

Budesonide, Glycopyrronium, and Formoterol Fumarate (BGF) Delivered by MDI HFO (HFO-1234ze)

Arm type	Experimental
Investigational medicinal product name	Budesonide/ Glycopyrronium/ Formoterol fumarate pressurized inhalation suspension, HFO
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

160/7.2/4.8 µg per actuation. 2 inhalations BID.

Arm title	BGF MDI HFA 320/14.4/9.6 µg
Arm description: Budesonide, Glycopyrronium, and Formoterol Fumarate (BGF) Delivered by MDI HFA	
Arm type	Active comparator
Investigational medicinal product name	Budesonide/ Glycopyrronium/ Formoterol fumarate pressurized inhalation suspension, HFA
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

160/7.2/4.8 µg per actuation. 2 inhalations BID.

Number of subjects in period 3^[2]	BGF MDI HFO 320/14.4/9.6 µg	BGF MDI HFA 320/14.4/9.6 µg
Started	120	120
Assigned 52 weeks and started treatment	120	120
Completed	86	94
Not completed	34	26
Adverse event, serious fatal	1	1
Consent withdrawn by subject	9	5
Physician decision	2	2
Adverse event, non-fatal	11	8
Lost to follow-up	1	1
Discontinued intervention - other reason	9	8
Protocol deviation	1	1

Notes:

[2] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: All participants randomised were enrolled in the 12-week study. Of these, 120 participants in each arm were assigned (on first-in-study basis) to continue in the extended 52-week study. This is why the number who started the 52-week treatment period is less than the number who completed the 12-week period.

occurrences (all)	39	24	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
14 December 2023	The CSP was amended primarily to comply with EU CTR requirements for drug abuse and misuse handling, SAE reporting, data archiving and breach reporting, and study results submissions to trial registries. The CSP was also revised to remove the planned clinical data lock after 12 weeks of treatment. The study will now be unblinded only once at the end of the study (after the last subject completes the 52-week treatment period). Both the 12-week analysis and the 52-week analysis will be completed after unblinding occurs at the end of the 52-week treatment period.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
