

Clinical trial results:

Effect and safety of semaglutide 7.2 mg once-weekly in participants with obesity and type 2 diabetes

Summary

EudraCT number	2022-002235-60
Trial protocol	PT SK HU BG
Global end of trial date	13 December 2024

Results information

Result version number	v1 (current)
This version publication date	24 December 2025
First version publication date	24 December 2025

Trial information

Trial identification

Sponsor protocol code	NN9536-7545

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	10 March 2025
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	13 December 2024
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The main objective of the trial was to demonstrate the superiority of semaglutide s.c. 7.2 mg once weekly versus placebo as an adjunct to a reduced calorie diet and increased physical activity, with respect to relative change in body weight after 72 weeks, in adults with obesity and T2D and to demonstrate the superiority of semaglutide subcutaneously (s.c.) 7.2 milligrams (mg) once weekly versus placebo as an adjunct to a reduced calorie diet and increased physical activity, with respect to achieving body weight reduction greater than or equal to (\geq) 5 percentage (%) after 72 weeks, in adults with obesity and type 2 diabetes (T2D).

Protection of trial subjects:

The trial was conducted in accordance with the Declaration of Helsinki (Oct 2013) and International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH) Good Clinical Practice, including archiving of essential documents (May 1996) and EN ISO 14155 Part 1 and 2 and Food and Drugs Administration (FDA) 21 Code of Federal Regulations (CFR) 312.120.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	04 January 2023
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Bulgaria: 80
Country: Number of subjects enrolled	Canada: 32
Country: Number of subjects enrolled	Hungary: 76
Country: Number of subjects enrolled	Poland: 74
Country: Number of subjects enrolled	Portugal: 10
Country: Number of subjects enrolled	Slovakia: 61
Country: Number of subjects enrolled	United States: 125
Country: Number of subjects enrolled	South Africa: 54
Worldwide total number of subjects	512
EEA total number of subjects	301

Notes:

Subjects enrolled per age group

In utero	0
----------	---

Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	391
From 65 to 84 years	121
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

The trial was conducted across 68 sites in 8 countries.

Pre-assignment

Screening details:

A total of 512 subjects were randomised in the study out of which 491 subjects completed the study. The study consisted of a 20-week dose escalation period followed by a 52-week maintenance period and a 9-week follow-up period.

Period 1

Period 1 title	Overall study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	Semaglutide 7.2 mg

Arm description:

Subjects received escalated dose of semaglutide s.c. (0.25, 0.5, 1.0, 1.7, and 2.4 mg) once weekly for 20 weeks followed by a maintenance dose of semaglutide 7.2 mg s.c. once weekly for 52 weeks.

Arm type	Experimental
Investigational medicinal product name	Semaglutide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Subjects received escalated dose of semaglutide s.c. (0.25, 0.5, 1.0, 1.7, and 2.4 mg) once weekly for 20 weeks followed by a maintenance dose of semaglutide 7.2 mg s.c. once weekly for 52 weeks. The subcutaneous injection was administered in the thigh, abdomen, or upper arm.

Arm title	Semaglutide 2.4 mg
------------------	--------------------

Arm description:

Subjects received escalated dose of semaglutide s.c. (0.25, 0.5, 1.0, 1.7, and 2.4 mg) once weekly for 20 weeks followed by a maintenance dose of semaglutide 2.4 mg s.c. once weekly for 52 weeks.

Arm type	Experimental
Investigational medicinal product name	Semaglutide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Subjects received escalated dose of semaglutide s.c. (0.25, 0.5, 1.0, 1.7, and 2.4 mg) once weekly for 20 weeks followed by a maintenance dose of semaglutide 2.4 mg s.c. once weekly for 52 weeks. The subcutaneous injection was administered in the thigh, abdomen, or upper arm.

Arm title	Placebo
------------------	---------

Arm description:

Subjects received matching placebo to semaglutide s.c. once a week for 72 weeks.

Arm type	Placebo
----------	---------

Investigational medicinal product name	Placebo matched to semaglutide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Subjects received matching placebo to semaglutide s.c. once a week for 72 weeks. The subcutaneous injection was administered in the thigh, abdomen, or upper arm.

Number of subjects in period 1	Semaglutide 7.2 mg	Semaglutide 2.4 mg	Placebo
Started	307	103	102
Full analysis set (FAS)	307	103	102
Safety analysis set (SAS)	307	103	102
Completed	295	100	96
Not completed	12	3	6
Physician decision	1	1	-
Consent withdrawn by subject	5	-	3
Death	4	1	1
Unspecified reason	-	1	-
Lost to follow-up	2	-	2

Adverse events

Adverse events information

Timeframe for reporting adverse events:

From week 0 to week 81

Adverse event reporting additional description:

Safety analysis set included all participants who were exposed to at least one dose of randomised IMP. All presented AEs are treatment emergent AEs (TEAEs). A TEAE is defined as an adverse event which occurred during the in-trial period.

Reporting groups

Reporting group title	Semaglutide 7.2 mg
-----------------------	--------------------

Reporting group description:

Subjects received escalated dose of semaglutide subcutaneously (s.c.) (0.25, 0.5, 1.0, 1.7, and 2.4 milligrams [mg]) once weekly for 20 weeks followed by a maintenance dose of semaglutide 7.2 mg s.c. once weekly for 52 weeks.

Reporting group title	Placebo
-----------------------	---------

Reporting group description:

Subjects received matching placebo to semaglutide s.c. once a week for 72 weeks

Reporting group title	Semaglutide 2.4 mg
-----------------------	--------------------

Reporting group description:

Subjects received escalated dose of semaglutide s.c. (0.25, 0.5, 1.0, 1.7, and 2.4 mg) once weekly for 20 weeks followed by a maintenance dose of semaglutide 2.4 mg s.c. once weekly for 52 weeks.

Metabolism and nutrition disorders Decreased appetite subjects affected / exposed occurrences (all)	21 / 307 (6.84%) 25	5 / 102 (4.90%) 6	8 / 103 (7.77%) 9

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
09 December 2022	<p>Key changes are listed below:</p> <ul style="list-style-type: none">- Editorial changes example spelling errors, punctuation or updates to more exact wording in order to improve readability.- Wording related to a T2D indication had been removed including less strict requirements for T2D treatment- Discontinuation criteria line added.- Crosses corrected for contraceptive counselling, pharmacokinetic (PK) sampling, anti semaglutide antibodies, Columbia-Suicide Severity Rating Scale (C-SSRS) since last visit and administration of trial product.- Crosses corrected for contraceptive counselling, PK sampling, anti semaglutide antibodies, C-SSRS since last visit and administration of trial product.- Change in HbA1c changed to confirmatory secondary endpoint and estimands were updated accordingly.- Number of subjects increased to 500 and randomisation changed to 3:1:1.- Hepatic event text deleted.- Plan for Immunogenicity analyses changed.- HbA1c changed from primary to secondary endpoint.- Requirements updated for Canada, Germany, United States, South Africa.
07 March 2023	<p>The key changes are listed below:</p> <ul style="list-style-type: none">- Editorial changes e.g. spelling errors, punctuation or updates to more exact wording to improve readability.- Biochemistry and haematology assessments added at visit (V)16.- Patient Health Questionnaire-9 (PHQ-9) and C-SSRS added to V8, V10, V14 and V18. Removed from V12.- Handout of PK diaries at V22 removed from flowchart.- Added that delaying dose escalation was allowed.- Calcitonin ≥ 100 nanograms per litre (ng/L) added as a discontinuation criterion.- Added direct bilirubin, amylase, calcitonin and lipase.- Criteria for hepatic laboratory outliers added.- Slovakia requirements added.
21 August 2023	<p>The key changes are listed below:</p> <ul style="list-style-type: none">- Editorial changes e.g. spelling errors, punctuation or updates to more exact wording to improve readability.- Tobacco use assessment added at end-of treatment (V22) as new endpoint.- Removal of the potential risk of 'Neoplasms' (malignant and nonmalignant).- Update of the dosage and administration of, and transition to, the new drug-device combination product during the maintenance phase.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
