

Clinical trial results:

A Multicentre, Open label, Randomised, Controlled, Basket, Pragmatic, Phase II, Clinical and Translational Study to Determine the Efficacy and Safety of Plitidepsin versus Control in Immunocompromised Adult Patients with Symptomatic COVID-19 requiring Hospital Care (NEREIDA)

Summary

EudraCT number	2022-002489-34
Trial protocol	ES HU PT PL IT BE FR
Global end of trial date	19 April 2024

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	19 April 2024
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	19 April 2024
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

The main objective of the study was to evaluate the efficacy of plitidepsin in pre-specified groups of immunocompromised participants with symptomatic COVID-19 requiring hospital care versus control in terms of mortality.

Protection of trial subjects:

This study was conducted in compliance with Good Clinical Practice, including the archiving of essential documents. An independent data monitoring committee was established to provide study oversight considering that this was a multicentre, randomised study being performed in a population at high risk for morbidity and mortality.

Background therapy:

Best standard care as per applicable local, institutional, national, supranational COVID-19 treatment guidelines.

Evidence for comparator:

Other regulatory-approved antiviral (if clinically indicated) were administered to participants in control groups.

Actual start date of recruitment	30 December 2022
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Belgium: 3
Country: Number of subjects enrolled	Spain: 14
Country: Number of subjects enrolled	France: 1
Country: Number of subjects enrolled	Greece: 14
Country: Number of subjects enrolled	Italy: 1
Country: Number of subjects enrolled	Portugal: 4
Worldwide total number of subjects	37
EEA total number of subjects	37

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0

Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	11
From 65 to 84 years	25
85 years and over	1

Subject disposition

Recruitment

Recruitment details:

A total of 37 participants were enrolled at 15 investigative sites between April 2023 and April 2024. Randomised participants who received at least 1 dose of study treatment and completed follow-up for survival until Day 30 (± 2) were included in the Full Analysis Set (FAS) population.

Pre-assignment

Screening details:

Disposition data pertaining to the participants not included in the FAS Population are presented within the pre-assignment period due to EudraCT system limitations.

Pre-assignment period milestones

Number of subjects started	37
Number of subjects completed	25

Pre-assignment subject non-completion reasons

Reason: Number of subjects	Randomised but not Treated: 9
Reason: Number of subjects	Discontinued Prior to FAS Eligibility: 3

Period 1

Period 1 title	Overall Study - FAS Population (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Group 1: Plitidepsin 2.5 mg

Arm description:

Best standard care (as per applicable local, institutional, national, supranational COVID-19 treatment guidelines) and plitidepsin (administered as a 60-minute intravenous (IV) infusion, every 24 hours for 3 consecutive days, at a dose of 2.5 mg) were administered to participants in Group 1.

Group 1 – Participants who received immune-suppression due to haematopoietic or organ transplantation.

Arm type	Experimental
Investigational medicinal product name	Plitidepsin
Investigational medicinal product code	SAPL01
Other name	
Pharmaceutical forms	Powder and solvent for concentrate for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

IV infusion over 60-minutes.

Arm title	Group 1: Control
------------------	------------------

Arm description:

Best standard care (as per applicable local, institutional, national, supranational COVID-19 treatment guidelines) \pm other regulatory-approved antiviral (if clinically indicated) were administered to participants in Group 1.

Group 1 – Participants who received immune-suppression due to haematopoietic or organ transplantation.

Arm type	Other regulatory-approved antiviral
----------	-------------------------------------

No investigational medicinal product assigned in this arm

Arm title	Group 2: Plitidepsin 2.5 mg
------------------	-----------------------------

Arm description:

Best standard care (as per applicable local, institutional, national, supranational COVID-19 treatment guidelines) and plitidepsin (administered as a 60-minute IV infusion, every 24 hours for 3 consecutive days, at a dose of 2.5 mg) were administered to participants in Group 2.

Group 2 – Participants who received B-cell depleting therapies.

Arm type	Experimental
Investigational medicinal product name	Plitidepsin
Investigational medicinal product code	SAPL01
Other name	
Pharmaceutical forms	Powder and solvent for concentrate for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

IV infusion over 60-minutes.

Arm title	Group 2: Control
------------------	------------------

Arm description:

Best standard care (as per applicable local, institutional, national, supranational COVID-19 treatment guidelines) ± other regulatory-approved antiviral (if clinically indicated) were administered to participants in Group 2.

Group 2 – Participants who received B-cell depleting therapies.

Arm type	Other regulatory-approved antiviral
----------	-------------------------------------

No investigational medicinal product assigned in this arm

Arm title	Group 3: Plitidepsin 2.5 mg
------------------	-----------------------------

Arm description:

Best standard care (as per applicable local, institutional, national, supranational COVID-19 treatment guidelines) and plitidepsin (administered as a 60-minute IV infusion, every 24 hours for 3 consecutive days, at a dose of 2.5 mg) were administered to participants in Group 3.

Group 3 – Participants who received other immune-suppressive therapies.

Arm type	Experimental
Investigational medicinal product name	Plitidepsin
Investigational medicinal product code	SAPL01
Other name	
Pharmaceutical forms	Powder and solvent for concentrate for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

IV infusion over 60-minutes.

Arm title	Group 3: Control
------------------	------------------

Arm description:

Best standard care (as per applicable local, institutional, national, supranational COVID-19 treatment guidelines) ± other regulatory-approved antiviral (if clinically indicated) were administered to participants in Group 3.

Group 3 – Participants who received other immune-suppressive therapies.

Arm type	Other regulatory-approved antiviral
----------	-------------------------------------

No investigational medicinal product assigned in this arm

Arm title	Group 4: Plitidepsin 2.5 mg
------------------	-----------------------------

Arm description:

Best standard care (as per applicable local, institutional, national, supranational COVID-19 treatment guidelines) and plitidepsin (administered as a 60-minute IV infusion, every 24 hours for 3 consecutive days, at a dose of 2.5 mg) were administered to participants in Group 4.

Group 4 – Other situations with immune deficiencies.

Arm type	Experimental
Investigational medicinal product name	Plitidepsin
Investigational medicinal product code	SAPL01
Other name	
Pharmaceutical forms	Powder and solvent for concentrate for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

IV infusion over 60-minutes.

Secondary: Number of Participants Requiring Oxygen Therapy

End point title	Number of Participants Requiring Oxygen Therapy
-----------------	---

End point description:

The maximum number of participants requiring oxygen therapy on any day during each visit window is reported.

FAS Population: All randomised participants who received at least 1 dose of study treatment (plitidepsin or control) and completed follow-up for survival until Day 30 (± 2). Participants who died before the end of the follow-up period were also included in the FAS population.

End point type	Secondary

Secondary: Time to Sustained Discontinuation of Oxygen Supplementation

End point title	Time to Sustained Discontinuation of Oxygen Supplementation
-----------------	---

End point description:

Time to sustained discontinuation is calculated as time from randomisation to the corresponding event using KM estimates. Corresponding events were defined as discontinuation of oxygen supplementation for at least 7 days. Participants with no available data for any time to event efficacy endpoint were censored at time 0, end of study (Day 60 \pm 3), or date of early study termination. Also, participants who had not achieved the time to event endpoint were censored at the last valid assessment.

FAS Population: All randomised participants who received at least 1 dose of study treatment (plitidepsin or control) and completed follow-up for survival until Day 30 (\pm 2). Participants who died before the end of the follow-up period were also included in the FAS population. Values of "-99999" and "99999" indicate median and/or CI were not reached due to low number of events.

Reporting groups

Reporting group title	Group 3: Control
-----------------------	------------------

Reporting group description:

Best standard care (as per applicable local, institutional, national, supranational COVID-19 treatment guidelines) \pm other regulatory-approved antiviral (if clinically indicated) were administered to participants in Group 3.

Group 3 – Participants who received other immune-suppressive therapies.

Reporting group title	Group 4: Plitidepsin 2.5 mg
-----------------------	-----------------------------

Reporting group description:

Best standard care (as per applicable local, institutional, national, supranational COVID-19 treatment guidelines) and plitidepsin (administered as a 60-minute IV infusion, every 24 hours for 3 consecutive days, at a dose of 2.5 mg) were administered to participants in Group 4.

Group 4 – Other situations with immune deficiencies.

Reporting group title	Group 1: Plitidepsin 2.5 mg
-----------------------	-----------------------------

Reporting group description:

Best standard care (as per applicable local, institutional, national, supranational COVID-19 treatment guidelines) and plitidepsin (administered as a 60-minute IV infusion, every 24 hours for 3 consecutive days, at a dose of 2.5 mg) were administered to participants in Group 1.

Group 1 – Participants who received immune-suppression due to haematopoietic or organ transplantation.

Reporting group title	Group 3: Plitidepsin 2.5 mg
-----------------------	-----------------------------

Reporting group description:

Best standard care (as per applicable local, institutional, national, supranational COVID-19 treatment guidelines) and plitidepsin (administered as a 60-minute IV infusion, every 24 hours for 3 consecutive days, at a dose of 2.5 mg) were administered to participants in Group 3.

Group 3 – Participants who received other immune-suppressive therapies.

Reporting group title	Group 2: Plitidepsin 2.5 mg
-----------------------	-----------------------------

Reporting group description:

Best standard care (as per applicable local, institutional, national, supranational COVID-19 treatment guidelines) and plitidepsin (administered as a 60-minute IV infusion, every 24 hours for 3 consecutive days, at a dose of 2.5 mg) were administered to participants in Group 2.

Group 2 – Participants who received B-cell depleting therapies.

Reporting group title	Group 2: Control
-----------------------	------------------

Reporting group description:

Best standard care (as per applicable local, institutional, national, supranational COVID-19 treatment guidelines) \pm other regulatory-approved antiviral (if clinically indicated) were administered to participants in Group 2.

Group 2 – Participants who received B-cell depleting therapies.

Reporting group title	Group 1: Control
-----------------------	------------------

Reporting group description:

Best standard care (as per applicable local, institutional, national, supranational COVID-19 treatment guidelines) ± other regulatory-approved antiviral (if clinically indicated) were administered to participants in Group 1.

Group 1 – Participants who received immune-suppression due to haematopoietic or organ transplantation.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
19 September 2022	The main objective and rationale for the substantial amendment was to correct the errors detected after the signature of the study protocol and to implement some changes (amendments) in response to clarifications requested by different drug agencies from the countries where the NEREIDA study was to be carried out and that had led to country-specific protocol versions.
22 March 2023	The main objective and rationale for the substantial amendment was to include all changes applied in the local and global amendments.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

The study was early terminated due to significant difficulties in the recruitment of participants.

Notes:
