

Clinical trial results:

A Phase 2, Randomized, Double-Blind, Placebo Controlled, Dose Ranging, Dose Finding, Parallel Group Study to Assess Efficacy and Safety of PF-07081532, And Open Label Oral Semaglutide, In Adults with Type 2 Diabetes Mellitus (T2DM) Inadequately Controlled on Metformin, And Separately PF-07081532 Compared to Matching Placebo in Adults with Obesity but Without T2DM.

Summary

EudraCT number	2022-002834-15
Trial protocol	CZ HU BG
Global end of trial date	22 September 2023

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	26 January 2024
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	22 September 2023
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

To evaluate the efficacy of a range of PF-07081532 doses compared to placebo, in subjects with T2DM inadequately controlled on metformin and subjects with obesity but without T2DM.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and in compliance with all International Council for Harmonization (ICH) Good Clinical Practice (GCP) Guidelines. All the local regulatory requirements pertinent to safety of trials subjects were followed.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	27 October 2022
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Canada: 95
Country: Number of subjects enrolled	Czechia: 22
Country: Number of subjects enrolled	Hungary: 90
Country: Number of subjects enrolled	Japan: 97
Country: Number of subjects enrolled	Puerto Rico: 29
Country: Number of subjects enrolled	Bulgaria: 34
Country: Number of subjects enrolled	Poland: 89
Country: Number of subjects enrolled	United States: 445
Worldwide total number of subjects	901
EEA total number of subjects	235

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0

Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	683
From 65 to 84 years	218
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

This study had 2 cohorts: Cohort 1 included subjects with type 2 diabetes mellitus (T2DM) on a background therapy of metformin. Cohort 2 included subjects with obesity But without T2DM.

Pre-assignment

Screening details:

A total of 902 subjects were randomized in this study of which 1 subject did not receive treatment. The study was terminated based on pharmacokinetic data from Phase 1 drug-drug-interaction studies and laboratory measurements of elevated transaminases in these Phase 1 studies as well as this Phase 2 study.

Period 1

Period 1 title	Treatment Phase
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Subject

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo (T2DM)

Arm description:

Subjects randomized to receive a single dose of PF-07081532-matching placebo once daily (QD) orally.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received placebo tablets orally QD.

Arm title	PF-07081532 20mg (T2DM)
------------------	-------------------------

Arm description:

Subjects randomized to receive PF-07081532 20 mg QD orally.

Arm type	Experimental
Investigational medicinal product name	PF-07081532
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

PF-07081532 was available as tablets at unit dose strength of 20, 60 and 100 mg to be administered orally QD at the desired dose levels.

Arm title	PF-07081532 40mg (T2DM)
------------------	-------------------------

Arm description:

Subjects with T2DM inadequately controlled with metformin were administered PF-07081532 20 mg QD orally for 4 weeks followed by PF-07081532 40 mg QD orally.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	PF-07081532
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

PF-07081532 was available as tablets at unit dose strength of 20, 60 and 100 mg to be administered orally QD at the desired dose levels.

Arm title	PF-07081532 80mg (T2DM)
------------------	-------------------------

Arm description:

Subjects with T2DM inadequately controlled with metformin were administered titrating doses of PF-07081532 20 mg QD, 40 mg QD and 60 mg QD orally for 4 weeks each followed by PF-07081532 80 mg QD orally.

Arm type	Experimental
Investigational medicinal product name	PF-07081532
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

PF-07081532 was available as tablets at unit dose strength of 20, 60 and 100 mg to be administered orally QD at the desired dose levels.

Arm title	PF-07081532 160mg (T2DM)
------------------	--------------------------

Arm description:

Subjects with T2DM inadequately controlled with metformin were administered titrating doses of PF-07081532 20 mg QD 40 mg QD, 60 mg QD, 80 mg QD and 120 mg QD orally for 4 weeks each followed by PF-07081532 160 mg QD orally.

Arm type	Experimental
Investigational medicinal product name	PF-07081532
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

PF-07081532 was available as tablets at unit dose strength of 20, 60 and 100 mg to be administered orally QD at the desired dose levels.

Arm title	PF-07081532 260mg (T2DM)
------------------	--------------------------

Arm description:

Subjects with T2DM inadequately controlled with metformin were administered titrating doses of PF-07081532 20 mg QD, 40 mg QD, 80 mg QD, 140 mg QD and 200 mg QD orally for 4 weeks each followed by PF-07081532 260 mg QD orally.

Arm type	Experimental
Investigational medicinal product name	PF-07081532
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

PF-07081532 was available as tablets at unit dose strength of 20, 60 and 100 mg to be administered orally QD at the desired dose levels.

Arm title	Rybelsus 14mg (T2DM)
------------------	----------------------

Arm description:

Subjects with T2DM inadequately controlled with metformin were administered titrating doses of Rybelsus 3 mg QD and 7 mg QD each for 4 weeks followed by 14 mg QD.

Arm type	Experimental
Investigational medicinal product name	Rybelsus
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Rybelsus was available as tablets at unit dose strength of 3, 7 and 14 mg to be administered orally QD at the desired dose levels.

Arm title	Placebo (Obesity)
------------------	-------------------

Arm description:

Subjects randomized to receive a single dose of PF-07081532-matching placebo QD orally.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received placebo tablets orally QD.

Arm title	PF-07081532 80mg (Obesity)
------------------	----------------------------

Arm description:

Subjects with obesity were administered titrating doses of PF-07081532 20 mg QD, 40 mg QD and 60 mg QD orally for 4 weeks each followed by PF-07081532 80 mg QD orally.

Arm type	Experimental
Investigational medicinal product name	PF-07081532
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

PF-07081532 was available as tablets at unit dose strength of 20, 60 and 100 mg to be administered orally QD at the desired dose levels.

Arm title	PF-07081532 140mg (Obesity)
------------------	-----------------------------

Arm description:

Subjects with obesity were administered titrating doses of PF-07081532 20 mg QD, 40 mg QD and 60 mg QD, 80 mg QD, 120 mg QD orally for 4 weeks each followed by PF-07081532 140 mg QD orally.

Arm type	Experimental
Investigational medicinal product name	PF-07081532
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

PF-07081532 was available as tablets at unit dose strength of 20, 60 and 100 mg to be administered orally QD at the desired dose levels.

Arm title	PF-07081532 200mg (Obesity,5 steps)
------------------	-------------------------------------

Arm description:

Subjects with obesity were administered titrating doses of PF-07081532 20 mg QD, 40 mg QD and 60 mg QD, 100 mg QD, 160 mg QD orally for 4 weeks each followed by PF-07081532 200 mg QD orally.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	PF-07081532
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

PF-07081532 was available as tablets at unit dose strength of 20, 60 and 100 mg to be administered orally QD at the desired dose levels.

Arm title	PF-07081532 200mg (Obesity,4 steps)
------------------	-------------------------------------

Arm description:

Subjects with obesity were administered titrating doses of PF-07081532 20 mg QD, 40 mg QD and 80 mg QD, 140 mg QD orally for 4 weeks each followed by PF-07081532 200 mg QD orally.

Arm type	Experimental
Investigational medicinal product name	PF-07081532
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

PF-07081532 was available as tablets at unit dose strength of 20, 60 and 100 mg to be administered orally QD at the desired dose levels.

Arm title	PF-07081532 260mg (Obesity)
------------------	-----------------------------

Arm description:

Subjects with obesity were administered titrating doses of PF-07081532 20 mg QD, 40 mg QD and 80 mg QD, 140 mg QD, 200 mg QD orally for 4 weeks each followed by PF-07081532 260 mg QD orally.

Arm type	Experimental
Investigational medicinal product name	PF-07081532
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

PF-07081532 was available as tablets at unit dose strength of 20, 60 and 100 mg to be administered orally QD at the desired dose levels.

End point title	Number of Subjects With Hypoglycemic Adverse Events According to Titration Dose: Cohort 2 (Obesity) ^[86]
-----------------	---

End point description:

Glucose values monitored by glucometer. Hypoglycemia =plasma/blood glucose value of <70 mg/dL (3.9 millimoles per liter [mmol/L]). Severe HAE: Subject unable to self treat due to neurological impairment (not age) and required assistance, at least one neurological symptom of memory loss, confusion, etc. Documented blood glucose<=54 mg/dL (2.7 mmol/L). Documented symptomatic: event during which symptoms of HAE were accompanied with plasma/blood glucose <70 mg/dL and prompt resolution with food intake, SC glucagon, or IV glucose. Probable symptomatic: event during which symptoms of HAE were not accompanied by a plasma glucose determination but was presumably caused by a plasma glucose <70 mg/dL. Asymptomatic: An event not accompanied by typical symptoms of HAE, plasma/blood glucose value of <70 mg/dL. Safety Analysis set used. Here, N= total number of subjects with at least one dose of the given titration dose level after pooling of data across each titration dose.

End point title	Number of Subjects According to Columbia-Suicide Severity Rating Scale (C-SSRS) Category: Cohort 2 (Obesity) Only ^[93]
-----------------	---

End point description:

C-SSRS is an interview-based rating scale to assess suicidal ideation and behavior and had a binary response (yes/no). C-SSRS data was mapped to C-CASA per Guidance: Suicidal Ideation and Behavior: prospective assessment of occurrence in clinical trials. A subject was said to have suicidal behavior in case of any events: 1) completed suicide; 2) suicide attempt 3) preparatory acts toward imminent suicidal behavior. A subject showed suicidal ideation if they responded 'yes' to any of the 5 questions, Wish to be dead; non-specific active suicidal thoughts active suicidal ideation with any methods (Not Plan) without Intent to Act; active suicidal ideation with some intent to act, without specific plan; Active suicidal ideation with specific plan and intent. Subjects was said to exhibit Self-injurious behavior, no suicidal intent if they responded as Yes to Has subject engaged in Non-suicidal Self-Injurious Behavior. SAS was used. This endpoint was planned to be assessed in Cohort 2 only.

-----------------------	----------------------------

Reporting group description:

Subjects with obesity were administered titrating doses of PF-07081532 20 mg QD, 40 mg QD and 60 mg QD orally for 4 weeks each followed by PF-07081532 80 mg QD orally.

Reporting group title	PF-07081532 140mg (Obesity)
-----------------------	-----------------------------

Reporting group description:

Subjects with obesity were administered titrating doses of PF-07081532 20 mg QD, 40 mg QD and 60 mg QD, 80 mg QD, 120 mg QD orally for 4 weeks each followed by PF-07081532 140 mg QD orally.

Reporting group title	PF-07081532 200mg (Obesity, 5 steps)
-----------------------	--------------------------------------

Reporting group description:

Subjects with obesity were administered titrating doses of PF-07081532 20 mg QD, 40 mg QD and 60 mg QD, 100 mg QD, 160 mg QD orally for 4 weeks each followed by PF-07081532 200 mg QD orally.

Reporting group title	PF-07081532 200mg (Obesity, 4 steps)
-----------------------	--------------------------------------

Reporting group description:

Subjects with obesity were administered titrating doses of PF-07081532 20 mg QD, 40 mg QD and 80 mg QD, 140 mg QD orally for 4 weeks each followed by PF-07081532 200 mg QD orally.

Reporting group title	Placebo (Obesity)
-----------------------	-------------------

Reporting group description:

Subjects with obesity were administered a single dose of PF-07081532-matching placebo QD orally.

Reporting group title	PF-07081532 260mg (Obesity)
-----------------------	-----------------------------

Reporting group description:

Subjects with obesity were administered titrating doses of PF-07081532 20 mg QD, 40 mg QD and 80

mg QD, 140 mg QD, 200 mg QD orally for 4 weeks each followed by PF-07081532 260 mg QD orally.

Reporting group title	PF-07081532 260mg (T2DM)
-----------------------	--------------------------

Reporting group description:

Subjects with T2DM inadequately controlled with metformin were administered titrating doses of PF-07081532 20 mg QD, 40 mg QD, 80 mg QD, 140 mg QD and 200 mg QD orally for 4 weeks each followed by PF-07081532 260 mg QD orally.

Reporting group title	PF-07081532 160mg (T2DM)
-----------------------	--------------------------

Reporting group description:

Subjects with T2DM inadequately controlled with metformin were administered titrating doses of PF-07081532 20 mg QD 40 mg QD, 60 mg QD, 80 mg QD and 120 mg QD orally for 4 weeks each followed by PF-07081532 160 mg QD orally.

Reporting group title	Rybelsus 14mg (T2DM)
-----------------------	----------------------

Reporting group description:

Subjects with T2DM inadequately controlled with metformin were administered titrating doses of Rybelsus 3 mg QD and 7 mg QD each for 4 weeks followed by 14 mg QD.

Gastroenteritis viral			
subjects affected / exposed	0 / 73 (0.00%)		
occurrences (all)	0		
Gastroenteritis			
subjects affected / exposed	2 / 73 (2.74%)		
occurrences (all)	2		
Ear infection			
subjects affected / exposed	0 / 73 (0.00%)		
occurrences (all)	0		

Viral infection	subjects affected / exposed	0 / 73 (0.00%)		
	occurrences (all)	0		
Pharyngitis	subjects affected / exposed	0 / 73 (0.00%)		
	occurrences (all)	0		
Metabolism and nutrition disorders				
Decreased appetite	subjects affected / exposed	0 / 73 (0.00%)		
	occurrences (all)	0		
Hyperglycaemia	subjects affected / exposed	3 / 73 (4.11%)		
	occurrences (all)	4		
Hypokalaemia	subjects affected / exposed	2 / 73 (2.74%)		
	occurrences (all)	2		

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

1 participant in placebo (T2DM) arm with withdrawal reason as Death in treatment phase was also counted in follow-up with the reason for discontinuation as death since exact date of last dose was unknown.
