Clinical trial results:
A Phase 3, Open-label, and Rollover Study to Evaluate the Long-term Safety and Tolerability of Lumacaftor/Ivacaftor Treatment in Subjects With Cystic Fibrosis Who Are Homozygous for F508del and 12 to <24 Months of Age at Treatment Initiation

Summary

EudraCT number	2023-000946-41
Trial protocol	Outside EU/EEA
Global end of trial date	22 August 2023

Results information

Result version number	v1 (current)
This version publication date	06 March 2024
First version publication date	06 March 2024

Trial information

Trial identification

Sponsor protocol code	VX19-809-124

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT04235140
WHO universal trial number (UTN)	-

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMEA-001582-PIP01-13
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	18 September 2023
Is this the analysis of the primary completion data?	Yes
Primary completion date	22 August 2023
Global end of trial reached?	Yes
Global end of trial date	22 August 2023
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate the safety and tolerability of long-term lumacaftor/ivacaftor (LUM/IVA) treatment in subjects with cystic fibrosis (CF), who are homozygous for F508del and 12 to less than (<) 24 months of age at treatment initiation.

Protection of trial subjects:

The study was conducted in accordance with the ethical principles stated in the Declaration of Helsinki and the International Conference on Harmonization (ICH) Guideline for Good Clinical Practice (GCP).

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	24 February 2020
Long term follow-up planned	Yes
Long term follow-up rationale	Safety, Efficacy
Long term follow-up duration	30 Months
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 39
Country: Number of subjects enrolled	Canada: 13
Worldwide total number of subjects	52
EEA total number of subjects	0

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	52
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	0
From 65 to 84 years	0

85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

This study was conducted in subjects with CF aged 12 through less than 24 months of age at treatment initiation who are homozygous for F508del and subjects who completed the 24-week treatment period along with the safety follow-up in study VX16-809-122 (NCT03601637) part B.

Period 1

Period 1 title	Overall Period (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	LUM/IVA

Arm description:

Subjects weighing 7 to less than (<) 9 kilograms (kg) received LUM 75 milligrams (mg)/IVA 94 mg fixed-dose combination (FDC) every 12 hours (q12h) and those weighing 9 to <14 kg received LUM 100 mg/IVA 125 mg q12h for 96 weeks. Subjects weighing greater than or equal to (>=)14 kg at screening received LUM 150 mg/IVA 188 mg FDC q12h for 96 weeks.

Arm type	Experimental
Investigational medicinal product name	LUM/IVA
Investigational medicinal product code	VX-809/VX-770
Other name	Lumacaftor/Ivacaftor
Pharmaceutical forms	Granules
Routes of administration	Oral use

Dosage and administration details:

Subjects received LUM/IVA FDC every 12 hours.

Number of subjects in period 1	LUM/IVA
Started	52
Rollover Subjects	39
LUM/IVA-Naïve Subjects	13 [1]
Completed	38
Not completed	14
Adverse Event	2
Lost to follow-up	1
Withdrawal of consent (not due to AE)	4
Commercial drug is available for subject	7

Notes:

[1] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: A total of 52 subjects were enrolled in the study. However, only 39 subjects rolled over from the VX16-809-122 study to this study, and the rest of the subjects were enrolled in the LUM-IVA naive group. Subjects in LUMN-IVA naive group are those who did not participate in Study VX16-809-122.

Baseline characteristics

Reporting groups	
Reporting group title	Overall Period

Reporting group description:

Baseline value was defined as the most recent non-missing measurement (scheduled or unscheduled) collected on or before the first dose of LUM/IVA in Study 124.

Reporting group values	Overall Period	Total	
Number of subjects	52	52	
Age categorical Units: Subjects			
Age continuous Units: months arithmetic mean standard deviation	 18.8 ± 3.32	 -	
Gender categorical Units: Subjects			
Female	24	24	
Male	28	28	

End points

End points reporting groups

Reporting group title	LUM/IVA

Reporting group description:

Subjects weighing 7 to less than (<) 9 kilograms (kg) received LUM 75 milligrams (mg)/IVA 94 mg fixed-dose combination (FDC) every 12 hours (q12h) and those weighing 9 to <14 kg received LUM 100 mg/IVA 125 mg q12h for 96 weeks. Subjects weighing greater than or equal to (>=)14 kg at screening received LUM 150 mg/IVA 188 mg FDC q12h for 96 weeks.

Primary: Safety and tolerability as assessed by the number of adverse events (AEs) and serious adverse events (SAEs)

End point title	Safety and tolerability as assessed by the number of adverse events (AEs) and serious adverse events (SAEs)[1]

End point description:

Safety set included all subjects who are exposed to any amount of study drug in Study 124.

End point type	Primary

End point timeframe:

Day 1 up to Week 120

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.
Justification: Only descriptive statistics were planned. No statistical comparisons were planned for the primary safety endpoint.

End point values	LUM/IVA			
Subject group type	Reporting group			
Number of subjects analysed	52			
Units: Subjects				
Subjects with TEAEs	52			
Subjects with SAEs	12			

Statistical analyses

No statistical analyses for this end point

Adverse events

Adverse events information	
Timeframe for reporting adverse events:	
Day 1 to Week 120	
Assessment type	Systematic

Dictionary used

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
12 February 2021	Amended to add the new dose of LUM 75 mg/IVA 94 mg and adjusted the lower weight bound for the LUM 100 mg/IVA 125 mg dose.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
